Huawei HCIP-Intelligent Vision V1.0 Sample Questions (Q57-Q62):

NEW QUESTION # 57

When the upper and lower domains of the intelligent vision platform collide, which of the following network planes should be used for connection between the servers?

- A. Inner_OM (internal management network)
- B. Inner_Service (internal business network)
- C. BNC_OM (Device Management Network)
- D. Outer--OM (External Management Network)

Answer: D

NEW QUESTION # 58

The characteristics of vehicles captured by the bayonet camera include (). (Multiple choice)

- A. Vehicle color recognition
- B. License plate recognition
- C. Vehicle logo recognition
- D. Vehicle identification

Answer: A,B,C,D

NEW QUESTION # 59

To enable an IVS3800 to provide the intelligent target or vehicle analysis function, which of the following hardware must be configured?

- A. SAS disk
- B. T4 GPU
- C. NVMe card
- D. AI accelerator card

Answer: D

Explanation:

The correct answer is A because the IVS3800 requires dedicated AI accelerator hardware to perform intelligent target analysis and vehicle analysis workloads. These functions rely on inference acceleration, not simply on general-purpose storage hardware. The training content directly links IVS3800 intelligent analysis capability to accelerator-card deployment by stating "Insert a maximum of six Ascend accelerator cards in slots 1 to 6" and then listing service capacities such as "Vehicle analysis ... 360 channels in video mode" and "Object classification ... 360 channels" for the accelerator-enabled configuration . This clearly shows that intelligent analysis capability is enabled by the AI accelerator card.

The other options do not satisfy this requirement. NVMe cards and SAS disks are storage components used for data access, caching, or storage expansion, but they do not provide the AI computing capability needed for intelligent analysis. T4 GPU is not the hardware specified in the material for IVS3800 intelligent target or vehicle analysis. Huawei identifies the Ascend AI accelerator card as the required component. Therefore, A is the correct answer.
