### CompTIA Project+ Certification Exam Sample Questions (Q314-Q319):

#### NEW QUESTION # 314

A project manager is in the closing phase of an IT asset refresh project that involves the disposal of several computers. The project sponsor notified the project manager that the company recently received a penalty as a result of disposing of some computers improperly. Which of the following should have been considered during initial planning to prevent this situation?

- A. ROI
- B. PHI
- C. PII
- **D. ESG**

**Answer: D**

Explanation:

Explanation

The project manager should have considered environmental, social, and governance (ESG) factors during initial planning to prevent the situation of receiving a penalty for disposing of some computers improperly.

ESG factors are criteria that measure the sustainability and ethical impact of an organization's activities. They include aspects such as environmental protection, social responsibility, human rights, diversity, and corporate governance. Considering ESG factors can help to reduce risks, improve reputation, and enhance performance of an organization<sup>12</sup>

#### NEW QUESTION # 315

A system was implemented, and testing was successfully completed. Which of the following should the project manager do NEXT?

- A. Review the risk register and close up residual risks.
- B. Run a control chart to ensure the quality of the deliverables.
- C. Start the training and handoff for the operations team.
- **D. Validate against the scope statement and ask for sign-off**

**Answer: D**

Explanation:

Explanation

The project manager should validate against the scope statement and ask for sign-off after a system was implemented and testing was successfully completed. The scope statement is a document that defines and documents the project scope, objectives, deliverables, requirements, assumptions, and constraints. The scope statement can help to establish a common understanding and agreement between the project manager and the stakeholders on what the project aims to achieve and deliver. Validating against the scope statement means checking whether the project deliverables meet the agreed-upon scope criteria and quality standards. Asking for sign-off means requesting formal acceptance and approval of the project deliverables from the stakeholders.

#### NEW QUESTION # 316

A PM has identified all the resources involved in a project. The next step is to identify which resources are responsible for which tasks. Which of the following should be used to document this information?

- A. RFI
- B. WBS
- **C. RACI**
- D. SOW

**Answer: C**

Explanation:

The RACI (Responsible, Accountable, Consulted, Informed) matrix is used to document which resources are responsible for which tasks. The RACI matrix is a tool that helps to clarify roles and responsibilities on a project. It assigns a level of responsibility to each resource involved in the project. References: CompTIA Project+ Study Guide Section 3.4.

The project manager should use a RACI matrix to document which resources are responsible for which tasks. A RACI matrix is a type of responsibility assignment matrix (RAM) that plots the roles and responsibilities of resources on a project team. RACI stands for Responsible, Accountable, Consulted, and Informed. A RACI matrix can help to clarify who does what on a project, avoid confusion and duplication of work, and improve communication and collaboration among team members.

#### NEW QUESTION # 317

A project manager wants to maximize the cost savings on software expenditures for a project. Currently, the project manager does not know how many users will acquire the product. Which of the following procurement methods should the project manager pursue?

- A. Build
- B. Buy
- C. Lease
- **D. Subscription**

**Answer: D**

#### NEW QUESTION # 318

A key stakeholder recommends to a senior developer that a new feature be added. The new feature is not part of the current requirement documentation. Which of the following is MOST likely happening?

- A. Project change
- B. Collecting requirements
- C. Decision-making
- **D. Scope creep**

**Answer: D**

Explanation:

Scope creep is most likely happening when a key stakeholder recommends to a senior developer that a new feature be added that is not part of the current requirement documentation. Scope creep is a term that refers to the uncontrolled expansion or change of a project's scope beyond its original boundaries or objectives. Scope creep can happen due to various reasons, such as changing customer demands, unclear or incomplete requirements, poor communication, lack of change control, or stakeholder interference. Scope creep can have negative impacts on a project, such as delays, cost overruns, quality issues, or reduced customer satisfaction<sup>12</sup>
