Our Salesforce Order-Management-Administrator practice exam also provides users with a feel for what the real Salesforce Order-Management-Administrator exam will be like. Both Salesforce Order Management Administrator Accredited Professional (Order-Management-Administrator) practice exams are the same as the Actual Order-Management-Administrator Test and give candidates the experience of taking the real Salesforce Order Management Administrator Accredited Professional (Order-Management-Administrator) exam. These Order-Management-Administrator practice tests can be customized according to your needs.

Salesforce Order-Management-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Model: This topic equips the Salesforce Order Management Administrator Consultant to showcase knowledge of critical objects such as Order, Order Summary, Fulfillment Orders, and Return Orders. It involves establishing and tracing integrations with B2C Commerce or other systems, including custom attributes. Proficiency here is pivotal for ensuring seamless data flow and robust Order Management operations within complex business environments.
Topic 2	• Order Management Basics: In this topic, the Salesforce Order Management Administrator Consultant learns to position Order Management effectively within Salesforce's core architecture. By articulating the extensible platform capabilities, the ability to integrate with third-party systems, and the overall value proposition, this knowledge helps highlight Order Management's seamless adaptability and efficiency. These insights are crucial for demonstrating business value during client engagements.
Topic 3	• Advanced Topics: This topic challenges the Salesforce Order Management Administrator Consultant to diagnose and resolve configuration issues that hinder the launch or operation of Order Management processes. Proficiency includes troubleshooting integration problems and articulating how various processes interact to support successful deployments and system functionality.
Topic 4	• Process Automation and Integrations: This section helps the Salesforce Order Management Administrator Consultant demonstrate the capability to deliver business value by integrating Order Management with external systems using clicks rather than code. Mastery of navigation within Order Management processes, connecting nodes, and integrating systems efficiently ensures understanding of how to implement effective solutions.

Topic 5	• User Experience and Customization: This section emphasizes leveraging Salesforce's Lightning UI to enhance user experiences. The Salesforce Order Management Administrator Consultant will customize experiences for users and managers through tools like the Lightning Page Editor, Report Builder, and out-of-the-box components. Success in this area ensures optimized workflows and improved operational efficiency.

Exam Order-Management-Administrator Prep | Order-Management-Administrator Cert Guide

While the Salesforce Order-Management-Administrator practice questions pdf can help you learn all the relevant answers for the Salesforce Order Management Administrator Accredited Professional, GuideTorrent also provides an online Sitecore Practice Test engine to enhance your confidence and skills. This practice test engine is an effective tool for both learning and practicing Salesforce Order-Management-Administrator Exam.

Salesforce Order Management Administrator Accredited Professional Sample Questions (Q67-Q72):

NEW QUESTION # 67
The Northern Trail Outfitters (NTO) team is already using Order Management. The team wants to transition from their home-grown Commerce engine to B2C Commerce Cloud. Which action do they need to perform?

- A. Change the Order Integration Flow in Setup so the org will start seeing the orders flow in
- B. Export the orders from B2C periodically and import them into Order Management using a scheduled job
- C. File a support case to activate an integration between B2C Commerce and Order Management
- D. Create a Flow to download the Orders from an SFTP location where B2C Commerce drops them and then ingest the data into Order Management

Answer: A

NEW QUESTION # 68
Which three steps should an administrator take to set up a mock payment gateway in a new org?

- A. Create a Named Credential
- B. Create a Payment Provider
- C. Create a CORS (Cross-Origin Resource Sharing) entry
- D. Create a Payment Gateway
- E. Create a Trusted Site Entry

Answer: A,B,D

Explanation:
To set up a mock payment gateway in a new org, an administrator should take the following steps:
Create a Payment Provider: This is a custom metadata type that defines the configuration and behavior of a payment gateway. A payment provider specifies the name, type, class, and endpoint of the payment gateway.
Create a Named Credential: This is a Salesforce feature that securely stores authentication information for connecting to external services. A named credential specifies the URL, identity type, authentication protocol, and certificate of the payment gateway.
Create a Payment Gateway: This is a custom object that represents an instance of a payment provider. A payment gateway references a payment provider and a named credential, and defines additional settings such as currency, mode, and timeout.

NEW QUESTION # 69
An Order Summary has three Fulfillment Orders and two Credit Memos associated with it. How many Invoices will be created

when using the Create Invoice Apex action in a flow?

- A. 3.0
- B. 2.0
- C. 5.0
- D. 1.0

Answer: D

Explanation:
One invoice will be created when using the Create Invoice Apex action in a flow. The Create Invoice Apex action is a custom action that creates an invoice for an order summary. An invoice is a document that requests payment from a customer for an order. An invoice can include one or more fulfillment orders and one or more credit memos. A fulfillment order is a record that represents a part of an order that is fulfilled by a specific location. A credit memo is a record that represents a partial or full refund for an order or a fulfillment order. An order summary can have multiple fulfillment orders and credit memos associated with it, but only one invoice will be created for the entire order summary. NEW QUESTION # 70
Which two practices ate needed for a custom attribute to map into Order Management assuming the attribute has been created on the necessary objects?

- A. The names must only contain letters and underscores
- B. The types must match within reason
- C. The names must be an exact match
- D. The types must be an exact match (i.e. String to String)

Answer: B,C

Explanation:
Two practices that are needed for a custom attribute to map into Order Management assuming the attribute has been created on the necessary objects are:
The types must match within reason. The data type of the custom attribute in Order Management must match or be compatible with the data type of the corresponding attribute in the external system, such as B2C Commerce or B2B Commerce. For example, if the attribute is a string in B2C Commerce, it must also be a string in Order Management.
The names must be an exact match. The name of the custom attribute in Order Management must be exactly the same as the name of the corresponding attribute in the external system, including capitalization and punctuation. For example, if the attribute is named "kitItem" in B2C Commerce, it must also be named
"kitItem" in Order Management.

NEW QUESTION # 71
Which three objects are likely to get created in Order Management as an order progresses through its lifecycle?

- A. Fulfillment Order
- B. Replacement Order
- C. Change Order
- D. Return Order
- E. rmaorder

Answer: A,C,D

Explanation:
Three objects that are likely to get created in Order Management as an order progresses through its lifecycle are:
Fulfillment Order. A Fulfillment Order is a record that represents a group of products in an order that are fulfilled together from the same location. A Fulfillment Order has a lookup relationship to the Order Summary object, and it contains information such as the fulfillment location, delivery method, status, etc.
Return Order. A Return Order is a record that represents a return request for an order or part of an order. A Return Order has a lookup relationship to both Order Summary and Change Order objects, and it contains information such as the return reason, status,

date, etc.

Change Order. A Change Order is a record that represents a change request for an order or part of an order. A Change Order has a lookup relationship to the Order Summary object, and it contains information such as the change type, status, date, etc.
