

New 300-745 Test Labs - New 300-745 Exam Labs

The 300-745 study guide to good meet user demand, will be a little bit of knowledge to separate memory, but when you add them together will be surprised to find a day we can make use of the time is so much debris. The 300-745 exam prep can allow users to use the time of debris anytime and anywhere to study and make more reasonable arrangements for their study and life. Choosing our 300-745 simulating materials is a good choice for you, and follow our step, just believe in yourself, you can do it perfectly!

Our professional experts have carefully compiled our 300-745 practice braindumps to be the best seller in the market. The information is provided in the form of our 300-745 exam questions and answers, following the style of the real exam paper pattern. So if you buy our 300-745 training guide, you will find that it is easy to pass the exam for it is exam-oriented. What is more, you will learn a lot of work skills according to the latest information.

New Cisco 300-745 Exam Labs | Valid Test 300-745 Testking

Are you looking for a reliable product for the 300-745 exam? If you do, our product will be your best choice. The reference materials of our company are edited by skilled experts and professionals who are quite familiar with the latest exam and testing center for years, therefore the quality of the practice materials for the 300-745 exam is guaranteed. Besides the practice material provide the demo, and you can have a try before you buy it, and the questions and answers online of the practice materials for the 300-745 Exam can also be seen. If you just want to test yourself, you can cancel it, after you finish it, you can see the answers by canceling the conceal. It's quite convenient and effective.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q39-Q44):

NEW QUESTION # 39

A logistics company wants to deploy an application in the cloud using cloud native techniques.

The company must ensure that the development, testing, and production environments are as identical as possible with the lowest risk of the development and testing environments impacting production. Which solution must be used to accomplish the task?

- A. network access control list
- B. lambda functions

- C. service quotas
- **D. separate cloud accounts**

Answer: D

Explanation:

Using separate cloud accounts for development, testing, and production ensures strong isolation between environments. This prevents accidental impact on production while maintaining consistent, cloud-native deployments across all stages with minimal risk.

NEW QUESTION # 40

A construction company recently introduced a BYOD policy, where contractors can bring personal devices and connect to the wireless network. The network engineer configured a Wi-Fi network with a guest splash page to provide internet access only. Although the policy was limited to wireless devices, contractors started bringing devices that needed wired connections without authorization and connecting to the network. The network team suggested shutting down ports where unauthorized devices are connected. Which technology must be implemented to ensure that wired and wireless devices are granted network access only after successful authentication?

- A. VxLANs
- **B. 802.1x**
- C. private VLANs
- D. VACLs

Answer: B

Explanation:

802.1X provides port-based network access control, requiring devices (wired or wireless) to authenticate before gaining network access. This ensures that only authorized users and devices can connect, enforcing the BYOD policy and preventing unauthorized wired connections.

NEW QUESTION # 41

A global energy company moved a monolithic application from the data center to public cloud. Over time, the company added many capabilities to the application, and it is now difficult for the application team to scale it. The application owner decided to modernize the application by moving to a Kubernetes cluster. However, he wants to ensure that the new application architecture provides a container network interface that is scalable, offers options for cloud-native security, and helps with visibility and observability. Which solution must be used to accomplish the task?

- **A. Cilium**
- B. ENI
- C. security group
- D. ingress gateway

Answer: A

Explanation:

Cilium is a Kubernetes Container Network Interface (CNI) that provides scalability, cloud-native security with eBPF-based enforcement, and strong visibility/observability into network traffic between microservices. It is purpose-built to modernize applications running in Kubernetes clusters.

NEW QUESTION # 42

After deploying a new API, the security team must identify the components of the application that are exposed to the internet and whether there are application authentication risks. Which technology must be deployed to discover the applications services and monitor for authentication issues?

- A. Cloud Workload Protection
- B. secret scanning
- C. Cloud Security Posture Management
- **D. API trace analysis**

Answer: D

Explanation:

API trace analysis allows the security team to map out which API endpoints are exposed to the internet and to detect authentication risks. By tracing API calls, it identifies exposed services, monitors traffic flow, and highlights weaknesses in authentication or authorization mechanisms.

NEW QUESTION # 43

A technology company has many remote workers who access corporate resources from various locations. The company must ensure that security policies are managed and enforced directly on endpoints, and endpoints are protected from threats regardless of location. Which firewall architecture meets the requirements?

- A. web application firewall
- B. traditional firewall
- **C. host-based firewall**
- D. next-generation firewall

Answer: C

Explanation:

A host-based firewall enforces security policies directly on endpoints, ensuring they remain protected regardless of location. This architecture provides consistent defense for remote workers accessing corporate resources from outside the traditional network perimeter.

NEW QUESTION # 44

.....

The Cisco 300-745 practice material of RealExamFree came into existence after consultation with many professionals and getting their positive reviews. The majority of aspirants are office professionals, and we recognize that you don't have enough time to prepare for the Cisco 300-745 Certification Exam. As a result, several versions of the Designing Cisco Security Infrastructure (300-745) exam questions will be beneficial to you.

New 300-745 Exam Labs: <https://www.realexamfree.com/300-745-real-exam-dumps.html>

If you encounter any questions about our 300-745 learning materials during use, you can contact our staff and we will be happy to serve for you, Cisco New 300-745 Test Labs They are also capable of assessing the security posture of an enterprise environment and are able to suggest the appropriate security solutions, Second, once we have compiled a new version of the 300-745 test question, we will send the latest version of our 300-745 training materials to our customers for free during the whole year after purchasing.

This also implies that the state is not important 300-745 Reliable Exam Questions for access by another client later, For the business-critical system, upgrades have a minimum impact, If you encounter any questions about our 300-745 learning materials during use, you can contact our staff and we will be happy to serve for you.

Absolute Your Exam Preparation With Cisco 300-745 Dumps

They are also capable of assessing the security posture of an 300-745 Reliable Exam Questions enterprise environment and are able to suggest the appropriate security solutions, Second, once we have compiled a new version of the 300-745 Test Question, we will send the latest version of our 300-745 training materials to our customers for free during the whole year after purchasing.

In addition, 300-745 exam dumps are verified by experienced experts, and the accuracy and correctness can be guaranteed, With the development of science and technology, 300-745 most people need to learn new knowledge and skills to keep up with the pace.
