## Test 300-430 Cram Review - Exam 300-430 Objectives Pdf

The desktop-based practice exam is customizable, tracks your progress, and creates a real Implementing Cisco Enterprise Wireless Networks (300-430) exam environment. This software works offline on Windows computers. The web-based practice exam is similar to the desktop-based practice exam and can be taken on any browser without needing to install separate software. Moreover, the web-based Implementing Cisco Enterprise Wireless Networks (300-430) practice exam is also compatible with all operating systems.

Cisco 300-430 (Implementing Cisco Enterprise Wireless Networks) Certification Exam is a comprehensive certification that validates the skills and knowledge of IT professionals in designing, deploying, and managing wireless networks in large enterprise environments. 300-430 Exam is designed to test the candidate's knowledge of wireless technologies, network design, deployment, and troubleshooting.

## Cisco Implementing Cisco Enterprise Wireless Networks Sample Questions (Q202-Q207):

### NEW QUESTION # 202

An IT team is growing quickly and needs a solution for management device access. The solution must authenticate users from an external repository instead of the current local on the WLC, and it must also identify the user and determine what level of access users should have. Which protocol do you recommend to achieve these goals?

- A. TACACS+

- B. network policy server
- C. RADIUS
- D. LDAP

**Answer: A**

Explanation:

TACACS+ (Terminal Access Controller Access-Control System Plus) is recommended for managing device access as it provides a more granular level of control over user authentication and authorization than RADIUS. It allows for different levels of access based on user identity by interfacing with external repositories such as Active Directory or LDAP. This protocol helps in distinguishing between different users and assigning appropriate access rights based on their roles within an organization.
