

# PAP-001 Test Study Guide & PAP-001 Preparation

2026 Latest RealExamFree PAP-001 PDF Dumps and PAP-001 Exam Engine Free Share: <https://drive.google.com/open?id=1Szgflbv4oO4mSkpRtW1xdQqIPMAvSxUo>

The valid updated, and real RealExamFree PAP-001 questions and both practice test software are ready to download. Just take the best decision of your professional career and get registered in Certified Professional - PingAccess PAP-001 certification exam and start this journey with RealExamFree PAP-001 Exam PDF dumps and practice test software. All types of Ping Identity PAP-001 Exam Questions formats are available at the affordable price.

## Ping Identity PAP-001 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>General Configuration: This section of the exam measures skills of Security Administrators and introduces the different object types within PingAccess such as applications, virtual hosts, and web sessions. It explains managing application resource properties, creating web sessions, configuring identity mappings, and navigating the administrative console effectively.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>General Maintenance and File System: This section of the exam measures the skills of System Engineers and addresses maintenance tasks such as license management, backups, configuration imports or exports, auditing, and product upgrades. It also includes the purpose of log files and an overview of the PingAccess file system structure with important configuration files.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Security: This section of the exam measures skills of Security Administrators and highlights how to manage certificates and certificate groups. It covers the association of certificates with virtual hosts or listeners and the use of administrator roles for authentication management.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Product Overview: This section of the exam measures skills of Security Administrators and focuses on understanding PingAccess features, functionality, and its primary use cases. It also covers how PingAccess integrates with other Ping products to support secure access management solutions.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Policies and Rules: This section of the exam measures the skills of Security Administrators and focuses on how PingAccess evaluates paths for applying policies and resources. It covers the role of different rule types, their configuration, and the implementation of rule sets and rule set groups for consistent policy enforcement.</li> </ul>

### PAP-001 Preparation - Reliable PAP-001 Real Exam

Everyone wants to stand out in such a competitive environment, but they don't know how to act. Maybe our PAP-001 exam questions can help you. Having a certificate may be something you have always dreamed of, because it can prove that you have a certain capacity. Our PAP-001 learning materials can provide you with meticulous help and help you get your certificate. Our PAP-001 training prep is credible and their quality can stand the test. Therefore, our PAP-001 practice materials can help you get a great financial return in the future and you will have a good quality of life.

### Ping Identity Certified Professional - PingAccess Sample Questions (Q15-Q20):

#### NEW QUESTION # 15

A protected web application requires that additional attributes be provided once the user is authenticated. Which two steps must the administrator perform to meet this requirement? (Choose 2 answers.)

- A. Request that the token provider update the ID token with the additional attributes.
- B. Request that the token provider update the access token with the additional attributes.
- C. Update the Web Session.
- D. Update the Site Authenticator.
- E. Update the Identity Mapping.

**Answer: C,E**

Explanation:

When applications require additional attributes:

\* The Web Session must be configured to retrieve those attributes from the token provider (OIDC or PingFederate).

\* The Identity Mapping must be updated to forward those attributes to the application (e.g., as headers).

Exact Extract:

"Web sessions define how user attributes are retrieved from the token provider. Identity mappings determine how those attributes are inserted into requests to applications."

\* Option A is not necessarily required; attributes can be retrieved via userinfo endpoint or access token, not only ID tokens.

\* Option B is correct - Identity Mappings must be updated to pass attributes to the app.

\* Option C is incorrect - Site Authenticators define how PingAccess authenticates to apps, not attribute handling.

\* Option D is incorrect unless the architecture specifically requires access token updates; PingAccess often uses the Web Session to fetch attributes.

\* Option E is correct - Web Session must be updated to retrieve additional attributes.

Reference: PingAccess Administration Guide - Web Sessions and Identity Mapping

#### NEW QUESTION # 16

Where should an administrator adjust SameSite Cookie settings?

- A. Applications
- **B. Web Sessions**
- C. Rules
- D. Sites

**Answer: B**

Explanation:

TheSameSiteattribute is applied to session cookies to control cross-site behavior. In PingAccess, session cookie configuration (includingSameSite) is defined at theWeb Sessionlevel.

Exact Extract:

"Web session configuration includes cookie attributes such as name, domain, secure flag, HTTPOnly, and SameSite."

- \* Option A (Rules)is incorrect - rules govern access control, not cookies.
- \* Option B (Sites)defines backend connections, not session cookies.
- \* Option C (Applications)ties resources to sessions but does not define cookie behavior.
- \* Option D (Web Sessions)is correct - session cookie SameSite settings are configured here.

Reference:PingAccess Administration Guide -Web Session Cookies

### NEW QUESTION # 17

Developers report an issue with an application that is protected by PingAccess. Certain requests are not providing claims that are part of the access token.

What should the administrator add for the access token claims?

- A. An identity mapping definition
- **B. An OAuth attribute rule**
- C. A web session attribute rule
- D. An authentication requirement definition

**Answer: B**

Explanation:

In PingAccess, when an application relies on claims from an OAuth access token, you must configure PingAccess to evaluate those claims and potentially inject them into headers for the backend application.

\* Exact Extract from PingAccess documentation:

"OAuth rules allow you to evaluate claims in OAuth access tokens. You can configure PingAccess to look at specific claims and enforce policies or pass them to target applications."

"To extract attributes from an access token, configure anOAuth Attribute Rule." This clearly matches optionD.

Analysis of each option:

- \* A. An authentication requirement definition
- \* Incorrect. Authentication requirements determine how users authenticate to applications (OIDC provider, etc.), but do not manage access token claims.
- \* B. A web session attribute rule
- \* Incorrect. Web session attribute rules map attributes from the authenticated user's web session (SSO session), not from OAuth access tokens.
- \* C. An identity mapping definition
- \* Incorrect. Identity mappings transform user attributes (from IdP to app), but they don't directly pull claims from OAuth tokens.
- \* D. An OAuth attribute rule
- \* Correct. This rule is specifically designed to extract and enforce policies onclaims from OAuth access tokens.

Therefore, the correct answer isD. An OAuth attribute rule.

Reference:PingAccess Administration Guide-Rules # OAuth Attribute Rules.

### NEW QUESTION # 18

A business requires logs to be written to a centralized Oracle database. Which two actions must the PingAccess administrator take to enable this? (Choose 2 answers.)

- A. Enable the Audit flag in the Resource.
- **B. Configure log4j2.xml and log4j2.db.properties.**
- **C. Copy the database driver JAR file to the PA\_HOME/lib directory.**
- D. Remove the logs located in PA\_HOME/log.

- E. Import the database certificate into the Trusted Certificate Group.

**Answer: B,C**

Explanation:

PingAccess supports logging directly to a relational database using Log4j database appenders. To enable this:

- \* Configure log4j2.xml to use a JDBC Appender.
- \* Configure log4j2.db.properties with the database connection information.
- \* Provide the appropriate database driver in the PA\_HOME/lib directory.

Exact Extract:

"To log to a database, configure log4j2.xml and log4j2.db.properties, and place the JDBC driver JAR file in PA\_HOME/lib."

- \* Option A is correct - both files must be configured.
- \* Option B is incorrect - existing logs do not need removal.
- \* Option C is incorrect - enabling audit is unrelated to database logging.
- \* Option D is correct - the Oracle JDBC driver must be installed in PA\_HOME/lib.
- \* Option E is incorrect unless TLS is used to connect to the DB, but it is not required for standard DB logging setup.

### NEW QUESTION # 19

An organization wants to take advantage of a new product feature that requires upgrading the PingAccess cluster from 7.3 to the current version. The administrator downloads the required files and places the files on the PingAccess servers. What should the administrator do next?

- A. Disable cluster communication.
- B. Disable Key Rolling.
- **C. Upgrade the Admin Console.**
- D. Upgrade the Replica Admin.

**Answer: C**

### NEW QUESTION # 20

.....

With the rapid development of society, people pay more and more attention to knowledge and skills. So every year a large number of people take PAP-001 tests to prove their abilities. But even the best people fail sometimes. In addition to the lack of effort, may also not make the right choice. A good choice can make one work twice the result with half the effort, and our PAP-001 study materials will be your right choice. Since inception, our company has been working on the preparation of PAP-001 learning guide, and now has successfully helped tens of thousands of candidates around the world to pass the exam. As a member of the group who are about to take the PAP-001 exam, are you worried about the difficulties in preparing for the exam? Maybe this problem can be solved today, if you are willing to spend a few minutes to try our PAP-001 actual exam.
