### CIPS Managing Ethical Procurement and Supply (L5M5) Sample Questions (Q52-Q57):

#### NEW QUESTION # 52

Supply Chain Operations Reference (SCOR) is a model of supply chain mapping used by many procurement professionals. Which of the following are advantages of SCOR? Select TWO

- A. It can relate to both internal and external factors
- B. It can be used across different industries
- C. It can improve and communicate organisational decisions
- D. It ensures costs remain low

**Answer: B,C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Documents:

The Supply Chain Operations Reference (SCOR) model is a widely adopted framework for analysing and improving supply chain performance. According to the L5M5 study guide (p.149), advantages of SCOR include its universality across industries (A) and its ability to improve and communicate organisational decisions (C) by providing a common language and structure for supply chain processes. A limitation of SCOR is that it focuses primarily on internal processes and does not adequately capture wider external environmental or social factors (making option B incorrect). While SCOR can help identify cost-saving opportunities, it does not guarantee low costs (D). For procurement professionals, SCOR is an important tool for benchmarking performance and driving improvements in ethical supply chain management.

#### NEW QUESTION # 53

Which of the following is NOT part of the UN's 17 Sustainable Development Goals?

- A. Take urgent action to combat climate change
- B. End poverty in all its forms, everywhere
- C. Eradicate unethical business practices
- D. Reduce inequality within and among countries

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Documents:

The UN's 17 Sustainable Development Goals (SDGs) form the 2030 Agenda for Sustainable Development. They cover areas such as ending poverty (A), reducing inequality (B), and combatting climate change (C). However, eradicate unethical business practices (D) is not one of the listed goals. The L5M5 study guide (p.4) stresses that while business ethics are important, the SDGs are broader, covering social, environmental, and economic development priorities. Procurement professionals should be able to identify the SDGs, as supply chain policies are increasingly aligned with them to support global sustainability efforts.

#### NEW QUESTION # 54

Knowledge that is not taught or learned from books but gained through personal experience is known as what?

- A. Primary knowledge
- B. Inherent knowledge
- C. Tacit knowledge
- D. Implied knowledge

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Documents:

The L5M5 study guide (old p.40, new p.64) defines tacit knowledge as knowledge gained through personal experience, observation, and practice rather than formal education. For example, an employee may develop an instinct for supplier negotiation strategies over years of practice. By contrast, explicit knowledge can be formally recorded and taught. Tacit knowledge provides competitive advantage because it is harder for competitors to imitate. Procurement leaders must capture and share tacit knowledge within teams to strengthen organisational learning.

#### NEW QUESTION # 55

Ruben is a new Procurement Manager at XYZ Company. He has been charged with buying a new piece of machinery for a factory. Having looked at several options, and considered sustainability, he has opted to buy the more expensive piece of machinery. In terms of sustainability, why might he have made this choice?

- A. The higher priced item will be of better quality
- B. In terms of life-cycle costing the more expensive item may be cheaper in the long term
- C. The more expensive piece of equipment will be more environmentally friendly
- D. The higher priced item is from a more reputable company

**Answer: B**

Explanation:

This question is testing if you know about Whole Life Cycle Costing. You'll have come across this already at level 4 (module 7). It's a big part of sustainability. See p.14 for a quick recap on this. In terms of this question, even if you don't remember life-cycle costing, options 1 2 and 4 can't be right- we don't have information in the question that tells us that the higher priced item is better quality, from a reputable company or environmentally friendly- we just don't know based on the information we've been given so these answers can't be right.

#### NEW QUESTION # 56

Seinfeld County Council has entered into a contract with a horticultural services provider. The contract contains a Community Benefit Clause. What is another term for this?

- A. Social value
- B. KPIs
- C. Payment terms
- D. Reward for performance

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Documents:

A Community Benefit Clause is also known as a Social Value Clause. The L5M5 study guide (p.126) explains that these clauses integrate economic, social, or environmental benefits into public sector contracts. For example, requiring the use of eco-friendly equipment or prioritising local employment. The Social Value Act 2012 formalised this requirement in UK public procurement. Procurement professionals must ensure such clauses are meaningful and enforceable to create real community benefits, not just tick-box exercises.
