

Pass Guaranteed Salesforce - Plat-Dev-210 - Salesforce Certified Omnistudio Developer Newest Exam Revision Plan

P.S. Free & New Plat-Dev-210 dumps are available on Google Drive shared by ExamsTorrent: https://drive.google.com/open?id=19HEhvLdMVELq8eJHt0wf6Tl_9ob5G1AG

In our study, we found that many people have the strongest ability to use knowledge for a period of time at the beginning of their knowledge. As time goes on, memory fades. Our Plat-Dev-210 training materials are designed to help users consolidate what they have learned, will add to the instant of many training, the user can test their learning effect in time after finished the part of the learning content, have a special set of wrong topics in our Plat-Dev-210 Guide dump, enable users to find their weak spot of knowledge in this function, iterate through constant practice, finally reach a high success rate. As a result, our Plat-Dev-210 study questions are designed to form a complete set of the contents of practice can let users master knowledge as much as possible, although such repeated sometimes very boring, but it can achieve good effect of consolidation.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.
Topic 2	<ul style="list-style-type: none">• Omniscripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.

Topic 3	<ul style="list-style-type: none"> • Omnistudio Data Mappers: This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.
Topic 4	<ul style="list-style-type: none"> • Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.

Passing Plat-Dev-210 Score Feedback & Plat-Dev-210 Exam Prep

If you want a relevant and precise content that imparts you the most updated, relevant and practical knowledge on all the key topics of the Salesforce Certification exam, no other study material meets these demands so perfectly as does ExamsTorrent's study guides. The Plat-Dev-210 questions and answers in these guides have been prepared by the best professionals who have deep exposure of the certification exams and the exam takers needs. The result is that Plat-Dev-210 Study Guides are liked by so many ambitious professionals who give them first priority for their exams. The astonishing success rate of Plat-Dev-210 clients is enough to prove the quality and benefit of the study questions of Plat-Dev-210.

Salesforce Certified Omnistudio Developer Sample Questions (Q103-Q108):

NEW QUESTION # 103

A developer needs to create DataRaptor to retrieve the name of an account for a contact. Following best practices, how should a developer configure the extraction steps?

- A. Define an extraction step for the Account object, and set the Extract JSON Path to Account.Contact.Name
- B. Define extraction steps for the Contact and the Account objects, and set the Extract JSON Path to Contact Account.Name
- **C. Define an extraction step for the Contact object and set the Extract JSON Path to Contact Account.Name**
- D. Define extraction steps for the Contact and the Account objects, and set the Extract JSON Path to Account.Name

Answer: C

Explanation:

A DataRaptor Extract can retrieve data from multiple objects using extraction steps and JSON paths.

However, if the data is from a single object, only one extraction step is needed. The Extract JSON Path can use dot notation to access related fields from that object, such as Contact.Account.Name.

NEW QUESTION # 104

A developer is troubleshooting an Integration Procedure with two elements: A Remote Action named FetchCart and a Response Action named ResponseCart.

In Preview, what JSON node shows the data sent to the Response Action?

- A. Response
- **B. ResponseCart**
- C. ResponseCartDebug
- D. FetchCart

Answer: B

Explanation:

In Preview, the JSON node that shows the data sent to the Response Action is the name of the Response Action itself. In this case,

it is ResponseCart. The other nodes show either the input data or the output data of the Integration Procedure.

NEW QUESTION # 105

An integration procedure contains a Remote Action element that calls a method of an APEX class. The method requires two fields are input: Account id and Product Id. The integration Procedure data JSON contains the following nodes:
How should the Remote Action element be configured to pass the data correctly to the method?

- A. Set Return Only Additional Output to true, and add the following Key/Value pairs to additional input.
- B. Check the DataRaptor Transform checkbox, and add the following Key/Value pairs to Output JSON Path:
- C. Add the following to Send JSON Path: accountId: %Accountd% ProductId% Details Products%
- **D. Check the Send Only Additional Input checkbox, and the following/ value pairs to Additional input:**

Answer: D

Explanation:

Checking the Send Only Additional Input checkbox allows the Remote Action element to send only the key /value pairs specified in Additional input to the Apex method. The Additional input should have the same keys as the method parameters, and the values should be set to `{{InputData.node}}` for each node. For example, AccountId: `{{InputData.AccountId}}` and ProductId: `{{InputData.Details.Products}}`.

NEW QUESTION # 106

A developer needs to display the following information together on one FlexCard:

* Account name, address, phone number, website

* Primary contact first name, contact name, address, phone number, email The account information must always be visible, and the contact information should only be visible as needed by the user.

What approach should the developer use to display the contact information on the card?

- **A. Set the collapsible property on the block element**
- B. Use a Data table element
- C. Use a conditional FlexCard State
- D. Set the class" collapsible" on the block element

Answer: A

Explanation:

Setting the collapsible property on the block element allows the user to expand or collapse the block as needed. Using a Data table element is not suitable for displaying contact information. Setting the class" collapsible" on the block element has no effect. Using a conditional FlexCard State requires a condition to be met, not a user choice.

NEW QUESTION # 107

Refer to the exhibit.

What JSON code correct represent the step in the OmniScript Structure panel shown?

```

'Step1': {
  "Block1": {
    "Text1": "Text",
    "Telephone1": "1234567890",
    "Block2": {
      "Checkbox1": false
    }
  },
  "Block3": {
    "Multi-select1": "Value A;Value B"
  }
}

```

• A.

```

'Step1': {
  "Block1": {
    "Text1": "Text",
    "Telephone1": "1234567890"
  }
}

```

• B.

```

"Step1": {
  "Block1": {
    "Text1": "Text",
    "Block2": {
      "Telephone1": "1234567890",
      "Checkbox1": false
    }
  },
  "Block3": {
    "Multi-select1": "Value A;Value B"
  }
}

```

- C.
- D.

```

"Text1": "Text "
},
"Block2": {
  "Telephone1": "1234567890 " ,
  "Checkbox1": false,
  "Block3": {
    "Multi - select1": "Value A;Value B "
  }
}
}

```

Answer: A

Explanation:

According to the OmniScript Data JSON page, the OmniScript structure JSON defines the data elements and their properties that are used in an OmniScript. The exhibit shows an OmniScript structure JSON with three elements: Step, Block, and Telephone. The Step element is an empty object, the Block element is an object with two properties: Text and Telephone, and the Telephone element is a string. Therefore, the JSON code that correctly represents the step in the OmniScript Structure panel shown is option C, which has the following structure:

```

{
  "Step": {},
  "Block": {
    "Text": "Text",
    "Telephone": "1234567890"
  },
  "Telephone": "1234567890"
}

```

The other options have different structures that do not match the OmniScript structure shown. Therefore, the correct answer is C.

NEW QUESTION # 108

.....

The Salesforce Plat-Dev-210 questions PDF questions are portable and printable, making it simple for you to prepare for the Salesforce Certified Omnistudio Developer (Plat-Dev-210) test in a short time. Smart devices such as smartphones, tablets, and

laptops all support the Salesforce Plat-Dev-210 Exam PDF dumps format of our study material.
