Microsoft GH-100 Training Material - Exam GH-100 Dump

To find better job opportunities you have to learn new and in-demand skills and upgrade your knowledge. With the GitHub Administration GH-100 Exam you can do this job nicely and quickly. To do this you just need to get registered in the ITExamDownload GitHub Administration exam and put all your efforts to pass this challenging GitHub Administration exam with good scores. However, you should keep in mind that the GitHub Administration exam is a valuable credential and will play an important role in your career advancement

Microsoft GitHub Administration Sample Questions (Q35-Q40):

NEW QUESTION # 35

Which of the following correctly describes the difference between controlling actions at the enterprise level versus the organization level in GitHub?

- A. Enterprise policies and organization policies are independent, with organization policies taking precedence for repositories within the organization.
- **B. Enterprise policies configure mandatory settings for organizations.**
- C. Enterprise policies can block specific actions, while organization policies can only enable or disable actions entirely.
- D. Enterprise policies apply only to public repositories, while organization policies apply to public, internal, and private repositories.

Answer: B

Explanation:

Enterprise policies let you define and enforce mandatory settings across all member organizations - organization-level policies then operate within the options that the enterprise policy exposes.

NEW QUESTION # 36

When a token is used to perform actions across different GitHub resources, how is this reflected in audit logs?

- A. Each API action made with the token generates a separate audit log entry
- B. The audit log stores only the token name and not its actions
- C. Only the first repository accessed is recorded
- D. GitHub creates a ZIP archive of all token activity

Answer: A

Explanation:

Each API call authenticated with a token generates its own audit-log event, so you'll see a distinct entry for every action performed across different resources, each annotated with the token's hashed ID, actor, and source IP.

NEW QUESTION # 37

A team member is unable to push to a repository due to a 403-error related to branch protection. What should the GitHub Enterprise administrator do first?

- A. Raise a GitHub Support request for permissions issues
- B. Revert the branch to an earlier state
- C. Check the user's permissions and rulesets applied to the branch
- D. Remove the user from the team and re-add them

Answer: C

Explanation:

The administrator should first review the user's repository role and the branch protection rules applied to that branch. A 403 error on push almost always indicates that the user either lacks the necessary write permissions or is not listed among the actors authorized by the branch protection settings.

NEW QUESTION # 38

What do you need to successfully generate a support bundle on a GitHub Enterprise Server?

- A. A GitHub App with read:org permissions
- B. Approval from GitHub Support
- C. Administrator SSH access to the appliance
- D. A custom GitHub Action in the root repo

Answer: C

Explanation:

You must have administrator-level SSH access to the GitHub Enterprise Server appliance so you can run the `ghe-support-bundle` command over SSH and capture the bundle locally.

NEW QUESTION # 39

Which of the following is a benefit of creating a new GitHub organization?

- A. Simplified collaboration across all organizations.
- B. Clear separation of reggs, projects, teams, billing, and organization-specific policies.
- C. Reduced administrative overhead.
- D. Automatic inheritance of policies from other organizations.

Answer: B

Explanation:

Creating a new organization gives you a dedicated container for your shared work, letting you isolate repositories, projects, teams, billing settings, and policy configurations on an organization-by-organization basis.

NEW QUESTION # 40

.....

Free demo is available for Microsoft GH-100 training materials, so that you can have a better understanding of what you are going to buy. Free demo will represent you what the complete version is like. We suggest you try free demo before buying. In addition, GitHub Administration GH-100 Training Materials are high quality and accuracy, since we have a professional team to collect the latest information of the exam.
