https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started

NEW QUESTION # 120
You are designing a Microsoft Power Platform solution for a company.
Which components should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation
Graphical user interface, text, application Description automatically generated
Box 1: Business rule
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins.
Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
Box 2: Power Automate flow
Trigger the Power Automate flow with "When a record is updated", then add a Condition in the flow and configure it with Status Label equals to Won.

NEW QUESTION # 121
You are designing a business strategy for a client who has a Power Platform solution.
The client works with critical data where any data loss creates a high risk.
You need to document the failover process for the stakeholders.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 122

You need to recommend methods to resolve the organization's issues.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Add users to Microsoft 365.

Scenario: Users cannot view Power BI reports within the Power Platform apps.

Issue: The people you share with may see a locked tile in a dashboard, or a "Permission required" message when they try to view a report.

Solution: You need to grant them permission to the underlying dataset.

* Go to the All or the Datasets + dataflows tab in your content list.

* Select More options (...) next to a dataset, then select Manage permissions.

* Select Add user.

* Enter the full email addresses for individuals, distribution groups, or security groups.

* Select Grant access.

Box 2: Configure an on-premises data gateway.

Scenario: The company plans to reference historical data in the [on-premises] existing system. The records held in these systems will not be migrated to the new solution except for medication information.

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between on-premises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.
