Talend Talend-Core-Developer Valid Dumps Demo & Regular Talend-Core-Developer Update

If you want to pass your exam just one time, then we will be your best choice. Talend-Core-Developer questions and answers are

edited by professional experts, and they have the professional knowledge in this field, therefore Talend-Core-Developer exam materials are high-quality. In addition, Talend-Core-Developer training materials contain most of the knowledge point for the exam, and you can have a good command of the exam dumps as well as improve your professional ability in the process of learning. You can also obtain the download link and password within ten minutes for Talend-Core-Developer Exam Dumps, so you can start your learning immediately.

Talend Core Certified Developer Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

After enabling the Observability Metric Collector metric generation located in the \etc\org.talend.ipaas.rt.observability.cfg, which additional configurations should you apply? Choose 2 answers.

- A. Configure the time zone
- B. Schedule the metrics generation using CRON based trigger
- **C. Lifetime**
- D. Frequency

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation:

After enabling the Observability Metric Collector in Talend's configuration file (org.talend.ipaas.rt.observability.cfg), it's essential to set additional parameters to control the behavior of metric collection:

- * Frequency (Option C):Determines how often metrics are collected. Setting this ensures that data is gathered at appropriate intervals for monitoring needs.
- * Lifetime (Option D):Specifies how long the collected metrics are retained. This helps manage storage and ensures that outdated metrics are purged.

Configuring these parameters ensures that the metric collection aligns with organizational requirements for monitoring and performance analysis.

NEW QUESTION # 12

User A shared a connection with User B. User B used the shared connection and created Dataset_1. User A stops sharing the connection with User B. Which statement is true about access to Dataset_1?

- A. User B has no access to Dataset_1.
- **B. User B has full access to Dataset_1.**
- C. User A has full access to Dataset_1.
- D. User B has limited access to Dataset_1.

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

In Talend Cloud Data Inventory, when a user creates a dataset using a shared connection, the following applies:

- * User B has full access to Dataset_1 (Option D):
- * Once User B creates Dataset_1 using the shared connection, they become the owner of that dataset. Even if User A later revokes access to the connection, User B retains full access to Dataset_1. The dataset's accessibility is independent of the connection's sharing status after its creation.

Why not other options?

- * Option A:User B's access to Dataset_1 is not limited; they have full ownership and control.
- * Option B:Revoking the connection does not remove User B's access to datasets they have already created.
- * Option C:User A's access to Dataset_1 depends on the sharing settings applied by User B; by default, User A does not have access unless granted.

NEW QUESTION # 13

Which method allows you to execute the compiled Job Talend Studio?

- A. Click the Export button in the Edit Properties window.
- B. Right-click the Job in the Repository and select Export items.

- C. Select Save As on the main File menu
- D. Right-click the Job in the Repository and select Build Job

Answer: D

Explanation:

To execute the compiled job outside Talend Studio, you need to right-click on the job in the Repository tree view and select Build Job option. This option allows you to export your job as an executable file that can be run independently from Talend Studio on any platform that supports Java. You can access this option by right-clicking on your job in the Repository tree view and selecting Build Job. This will open a dialog box where you can configure the build settings, such as destination folder, archive name, context, etc. You do not need to click the Export button in the Edit Properties window, right-click on the job in the Repository and select Export items, or select Save As on the main File menu. These options are not used to execute the compiled job outside Talend Studio. The Export button in the Edit Properties window is used to export your job properties as an XML file. The Export items option is used to export your items (such as jobs, metadata, routines, etc.) as an archive file that can be imported into another project or workspace. The Save As option is used to save a copy of your job with a different name or location. References: Talend Open Studio: Open-source ETL and Free Data Integration | Talend, [Build Job - 7.3]

NEW QUESTION # 14

You built multiple Jobs in Studio, each uses its own tDBInput component to connect to a common database server, but they all use different credentials. How should you configure the tDBInput components?

- A. Set the Database field to Metadata.
- B. Set the Property type to Repository and use a common DB connection metadata.
- C. Set the Property type to Repository and replace the credentials in each component.
- D. Set the Property type to Built-in and set all the relevant properties manually.

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

When multiple Jobs require connections to the same database server but with different credentials, the recommended approach is:

* Set the Property Type to Built-in and Set All the Relevant Properties Manually (Option C):

* In each tDBInput component, set the 'Property Type' to 'Built-in.'

* Manually enter the connection details, including the specific username and password required for that particular Job.

This approach ensures that each Job uses its own set of credentials, maintaining the necessary security and access controls.

NEW QUESTION # 15

What are the key capabilities of Talend Cloud Data Preparation that improve data quality and accessibility?

Choose 2 answers

- A. Standardize data
- B. Discover
- C. Cleanse data
- D. Transform

Answer: A,C

NEW QUESTION # 16
