The EC-Council Certified CISO (CCISO) exam is a globally recognized certification program that is designed to assess an individual's knowledge and expertise in the field of information security management. EC-Council Certified CISO (CCISO) certification program is specifically targeted towards experienced information security professionals who are looking to take their career to the next level by becoming a Chief Information Security Officer (CISO).

EC-Council Certified CISO (CCISO) is a certification program designed for experienced information security professionals who aspire to become chief information security officers (CISOs). EC-Council Certified CISO (CCISO) certification is offered by the International Council of Electronic Commerce Consultants (EC-Council) and is recognized globally as a benchmark for excellence in the field of information security management. The CCISO program is aimed at professionals who have a minimum of five years of experience in the field of information security, with at least three years in a managerial or executive position.

The CCISO certification is highly regarded in the industry as it demonstrates the candidate's expertise in managing and leading information security programs. It is also recognized by government agencies and other organizations worldwide as a benchmark for excellence in the field of information security management. The CCISO program covers a wide range of topics, including risk management, regulatory compliance, security program management, and strategic planning, providing candidates with a comprehensive understanding of the role and responsibilities of a CISO. The CCISO certification is an excellent career path for information security professionals who aspire to become CISOs and lead their organizations in managing security risks and protecting critical information assets.

Free PDF EC-COUNCIL - 712-50 - Trustable Reliable EC-Council Certified CISO (CCISO) Practice Questions

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q14-Q19):

NEW QUESTION # 14
The Information Security Management program MUST protect:

- A. all organizational assets
- B. critical business processes and/or revenue streams
- C. Intellectual property released into the public domain
- D. Against distributed denial of service attacks

Answer: B

NEW QUESTION # 15
As the Chief Information Security Officer, you are performing an assessment of security posture to understand what your Defense-in-Depth capabilities are. Which network security technology examines network traffic flows to detect and actively stop vulnerability exploits and attacks?

- A. Intrusion Prevention System
- B. Gigamon
- C. Anti-virus
- D. Port Security

Answer: A

NEW QUESTION # 16
What type of attack requires the least amount of technical equipment and has the highest success rate?

- A. War driving
- B. Shrink wrap attack
- C. Operating system attacks
- D. Social engineering

Answer: D

NEW QUESTION # 17
Which of the following activities is the MAIN purpose of the risk assessment process?

- A. Classifying and organizing information assets into meaningful groups
- B. Calculating the risks to which assets are exposed in their current setting
- C. Assigning value to each information asset
- D. Creating an inventory of information assets

Answer: B

Explanation:
Purpose of Risk Assessment:
* Identifies risks to assets based on current vulnerabilities and threat landscapes.
* Provides a basis for prioritizing mitigation efforts.
Why This is Correct:
* Risk assessment focuses on evaluating risks, which is foundational for informed decision-making.
Why Other Options Are Incorrect:
* A. Inventory of assets: Prerequisite to risk assessment, not the main purpose.
* B. Classifying assets: Supports risk management but is not the primary goal of assessment.
* C. Assigning value: Helps prioritize but is not the ultimate purpose.
References:
EC-Council defines risk assessment as a critical process for calculating and understanding risks in the current environment.

NEW QUESTION # 18
A CISO has recently joined an organization with a poorly implemented security program. The desire is to base the security program on a risk management approach.
Which of the following is a foundational requirement in order to initiate this type of program?

- A. A clearly identified executive sponsor who will champion the effort to ensure organizational buy-in
- B. A complete inventory of Information technology assets including infrastructure, networks, applications and data
- C. A security organization that is adequately staffed to apply required mitigation strategies and regulatory compliance solutions
- D. A clear set of security policies and procedures that are more concept-based than controls-based than controls-based

Answer: A

NEW QUESTION # 19
......
