MongoDB Certified Developer Associate Exam Sample Questions (Q159-

Q164):

NEW QUESTION # 159

Suppose we have a products collection with the following fields and values: `_id` (automatically created ObjectId) `product_code` (unique values for each product) `color` (as String values) `size` (this field is missing for some products) `origin_country` Which of these fields would be the best shard key?

- A. `origin_country`
- B. `_id`
- C. `color`
- D. `product_code`
- E. `size`

Answer: D

Explanation:

With `color`, `size`, and `origin_country` we run the risk of low cardinality. The `_id` wouldn't make a good shard key because it isn't something meaningful we could query the database. <https://docs.mongodb.com/manual/core/sharding-shard-key/>

NEW QUESTION # 160

Select all true statements about data modeling in MongoDB.

- A. MongoDB can easily handle both unstructured and structured data sets.
- B. The field set and data type for each field can differ across documents within a collection.
- C. In MongoDB we can enforce document validation rules for a collection during update and insert operations.
- D. Unlike SQL databases, where the table schema must be specified and declared before inserting the data, MongoDB collections don't, by default, require documents to have the same schema.

Answer: A,B,C,D

Explanation:

NEW QUESTION # 161

You have the following replica set configuration: `conf = { "_id": "rep1set", "version": 1, "protocolVersion": 1, "members": [{ "_id": 0, "host": "192.168.120.24:27017", "priority": 2, "votes": 1 }, { "_id": 1, "host": "192.168.120.24:27018", "priority": 1, "votes": 1 }, { "_id": 1, "host": "192.168.120.24:27019", "priority": 1, "votes": 1 }] }` Select all true statements about this configuration.

- A. This configuration is incorrect. Host information must be unique for each member in a replica set.
- B. This configuration is incorrect. `_id` field must be unique for each member in a replica set.
- C. This configuration is incorrect. You can only specify a priority of 0 or 1.
- D. This configuration is correct.

Answer: B
