100% Pass Quiz New ISO-IEC-27001-Foundation Test Papers - ISO/IEC 27001 (2022) Foundation Exam Unparalleled Interactive Testing Engine

It is universally accepted that in this competitive society in order to get a good job we have no choice but to improve our own capacity and explore our potential constantly, and try our best to get the related ISO-IEC-27001-Foundation certification is the best way to show our professional ability, however, the exam is hard nut to crack and there are so many ISO-IEC-27001-Foundation Preparation questions related to the exam, it seems impossible for us to systematize all of the key points needed for the exam by ourselves.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12

In which clause would the requirements for internal audit be found?

- A. Performance Evaluation
- B. Improvement
- C. Operation
- D. Planning

Answer: A

Explanation:

The requirements for internal audit are explicitly placed in Clause 9.2 (Performance Evaluation) of ISO/IEC 27001:2022. The standard requires:

- * "The organization shall conduct internal audits at planned intervals to provide information on whether the information security management system... conforms to the organization's own requirements... and to the requirements of this document." (9.2.1)
- * "The organization shall plan, establish, implement and maintain an audit programme(s)..." (9.2.2) This clause clearly falls under Performance Evaluation (Clause 9), not Planning (Clause 6), Operation (Clause 8), or Improvement (Clause 10). Therefore, the correct answer is C.

NEW QUESTION # 13

Which information is required to be included in the Statement of Applicability?

- A. The risk assessment approach of the organization
- B. The scope and boundaries of the ISMS
- C. The criteria against which risk will be evaluated
- D. The justification for including each information security control

Answer: D

Explanation:

Clause 6.1.3 (d) requires that the organization "produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause

6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.

Therefore, the mandatory requirement for the SoA is justification for including (or excluding) each information security control.

NEW QUESTION # 14

To whom are the information security policies required to be communicated, according to the control in Annex A of ISO/IEC 27001?

- A. Only staff with accountability for ISMS operation
- B. Top management
- **C. Relevant personnel and relevant interested parties**
- D. Employees within the scope of the ISMS

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) clearly specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties..." This means the communication obligation is not limited to top management (A) or only ISMS staff (B), nor does it stop at employees only (C). Instead, ISO/IEC 27001/27002 mandate a broader scope: all relevant personnel and relevant interested parties must be informed. This ensures both internal stakeholders (employees, contractors, temporary staff) and external interested parties (suppliers, partners, regulators, customers, etc.) receive the right policy communications where applicable. Therefore, the correct and verified answer is D.

NEW QUESTION # 15

What is required to be reported by the Information security event reporting control?

- A. Asset disposal
- B. Information disclosure
- **C. Observed or suspected events**
- D. Unauthorized access

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A, control 6.8 (Information security event reporting) specifies:

"Information security events should be reported through appropriate management channels as quickly as possible. The organization should require all employees and contractors to note and report any observed or suspected information security events." This wording confirms that the required reporting covers "observed or suspected events." Specific event types like information disclosure (A) or unauthorized access (B) are examples but not the broad requirement.

Asset disposal (C) is addressed separately under equipment lifecycle controls (Annex A.7.14).

Therefore, the verified correct answer is D: Observed or suspected events.

NEW QUESTION # 16

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?

* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process

* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Only 2 is true
- B. Neither 1 or 2 is true
- C. Both 1 and 2 are true
- **D. Only 1 is true**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:

ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC

27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them. However, ISO/IEC 27002 does not provide a process for risk management—that is covered by ISO/IEC 27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3).

Therefore, statement 1 is true, but statement 2 is false. Correct answer: A.

NEW QUESTION # 17

The ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation certification is a valuable credential earned by individuals to validate their skills and competence to perform certain job tasks. Your ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation certification is usually displayed as proof that you've been trained, educated, and prepared to meet the specific requirement for your professional role. The ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation Certification enables you to move ahead in your career later.
