PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q38-Q43):

NEW QUESTION # 38

Scenario 5:Based in Altenberg, Germany, Astral Nexus Power is an innovative company founded by visionary engineers and scientists focused on pioneering technologies in the electric power sector. It focuses on the development of next-generation energy storage solutions powered by cutting-edge quantum materials. Recognizing the critical importance of securing its energy infrastructure, the company has adopted the NIS 2 Directive requirements. In addition, it continually cooperates with cybersecurity experts to fortify its digital systems, protect against cyber threats, and ensure the integrity of the power grid. By incorporating advanced security protocols, the company contributes to the overall resilience and stability of the European energy landscape. Dedicated to ensuring compliance with NIS 2 Directive requirements, the company initiated a comprehensive journey toward transformation, beginning with an in-depth comprehension of its structure and context, which paved the way for the clear designation of roles and responsibilities related to security, among others. The company has appointed a Chief Information Security Officer (CISO) who is responsible to set the strategic direction for cybersecurity and ensure the protection of information assets. The CISO reports directly to the Chief Executive Officer (CEO) of Astral Nexus Power which helps in making more informed decisions concerning risks, resources, and investments. To effectively carry the roles and responsibilities related to information security, the company established a cybersecurity team which includes the company's employees and an external cybersecurity consultant to guide them.

Astral Nexus Power is also focused on managing assets effectively. It consistently identifies and categorizes all of its digital assets, develops an inventory of all assets, and assesses the risks associated with each asset. Moreover, it monitors and maintains the assets and has a process for continual improvement in place. The company has also assigned its computer security incident response team (CSIRT) with the responsibility to monitor its on and off premises internet-facing assets, which help in managing organizational risks. Furthermore, the company initiates a thorough process of risk identification, analysis, evaluation, and treatment. By identifying operational scenarios, which are then detailed in terms of assets, threats, and vulnerabilities, the company ensures a comprehensive identification and understanding of potential risks. This understanding informs the selection and development of risk treatment strategies, which are then communicated and consulted upon with stakeholders. Astral Nexus Power's commitment is further underscored by a meticulous recording and reporting of these measures, fostering transparency and accountability.

Has Astral Nexus Power followed all the necessary steps to manage assets in cyberspace in accordance with best practices? Refer to scenario 5.

- A. No, the company must also involve external third parties to review and validate its asset management processes
- B. Yes, the company has followed all the steps required to manage assets in cyberspace in accordance with best practices
- **C. No, the company should also implement appropriate security controls after assessing the risks associated with each asset**

Answer: C

NEW QUESTION # 39

Which reporting method is best suited for presenting raw data in an easy-to-read format, including features like nested grouping, rolling summaries, and dynamic drill-through or linking?

- **A. Reports**
- B. Scorecards or strategic dashboards
- C. Tactical and operational dashboards

Answer: A

NEW QUESTION # 40

Scenario 5:Based in Altenberg, Germany, Astral Nexus Power is an innovative company founded by visionary engineers and scientists focused on pioneering technologies in the electric power sector. It focuses on the development of next-generation energy storage solutions powered by cutting-edge quantum materials. Recognizing the critical importance of securing its energy infrastructure, the company has adopted the NIS 2 Directive requirements. In addition, it continually cooperates with cybersecurity experts to fortify its digital systems, protect against cyber threats, and ensure the integrity of the power grid. By incorporating advanced security protocols, the company contributes to the overall resilience and stability of the European energy landscape. Dedicated to ensuring compliance with NIS 2 Directive requirements, the company initiated a comprehensive journey toward transformation, beginning with an in-depth comprehension of its structure and context, which paved the way for the clear designation of roles and responsibilities related to security, among others. The company has appointed a Chief Information Security Officer (CISO) who is responsible to set the strategic direction for cybersecurity and ensure the protection of information assets. The CISO reports directly to the Chief Executive Officer (CEO) of Astral Nexus Power which helps in making more informed decisions concerning risks, resources, and investments. To effectively carry the roles and responsibilities related to information security, the company established a cybersecurity team which includes the company's employees and an external cybersecurity consultant to guide them.

Astral Nexus Power is also focused on managing assets effectively. It consistently identifies and categorizes all of its digital assets, develops an inventory of all assets, and assesses the risks associated with each asset. Moreover, it monitors and maintains the assets and has a process for continual improvement in place. The company has also assigned its computer security incident response team (CSIRT) with the responsibility to monitor its on and off premises internet-facing assets, which help in managing organizational risks. Furthermore, the company initiates a thorough process of risk identification, analysis, evaluation, and treatment. By identifying operational scenarios, which are then detailed in terms of assets, threats, and vulnerabilities, the company ensures a comprehensive identification and understanding of potential risks. This understanding informs the selection and development of risk treatment strategies, which are then communicated and consulted upon with stakeholders. Astral Nexus Power's commitment is further underscored by a meticulous recording and reporting of these measures, fostering transparency and accountability.

Based on scenario 5, the CISO reports directly to the CEO of Astral Nexus Power. Is this in alignment with best practices?

- A. No, the current organizational structure impedes inter-departmental collaboration which would enable balanced distribution of tasks
- B. No, this type of structure does not allow the CISO to properly exercise the mandate with regards to cybersecurity
- **C. Yes, it is advisable for the CISO to report directly to the top management to facilitate the process of decision-making with respect to cybersecurity**

Answer: C

NEW QUESTION # 41

Which of the following statements regarding critical entities is correct?

- A. Critical entities are obligated to report only their names and relevant (sub)sectors to competent authorities
- **B. Critical entities must provide one or more essential services and must have their critical infrastructure within the territory of the respective Member State**
- C. Member States can exclusively rely on self-registration mechanisms for the identification and reporting of all critical entities, with no direct oversight from the competent authorities

Answer: B

NEW QUESTION # 42

According to Article 31, what is the recommended approach for competent authorities to supervise public administration entities?

- A. They should have operational independence
- B. They should consultant legal experts for guidance on supervision
- C. They should rely solely on national frameworks for guidance on supervision

Answer: A

NEW QUESTION # 43

.....
