

New Snowflake GES-C01 Study Materials, Examcollection GES-C01 Free Dumps

DOWNLOAD the newest RealVCE GES-C01 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1cf__WBUVWSpPCzOYUoobqYRyjWvifSdG

The GES-C01 latest exam torrents have different classifications for different qualification examinations, which can enable students to choose their own learning mode for themselves according to the actual needs of users. The GES-C01 exam questions offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. Our reasonable price and GES-C01 Latest Exam torrents supporting practice perfectly, you will only love our GES-C01 exam questions.

The former exam candidates get the passing rate over 98 percent in recent years by choosing our GES-C01 practice materials. You must be curious about the advantages of them. These traits briefly sum up our GES-C01 study questions. So we take liberty of introducing our GES-C01 learning guide for you, hoping you can find the best way to pass the exam. With our GES-C01 exam prep, you will pass the exam with ease.

Examcollection GES-C01 Free Dumps, GES-C01 Valid Dumps Demo

When people take the subway staring blankly, you can use Pad or cell phone to see the PDF version of the GES-C01 study materials. While others are playing games online, you can do online GES-C01 exam questions. We are sure that as you hard as you are, you can Pass GES-C01 Exam easily in a very short time. While others are surprised at your achievement, you might have found a better job.

Snowflake SnowPro® Specialty: Gen AI Certification Exam Sample Questions (Q269-Q274):

NEW QUESTION # 269

A data application developer is building a Streamlit chat application within Snowflake. This application uses a RAG pattern to answer user questions about a knowledge base, leveraging a Cortex Search Service for retrieval and an LLM for generating responses. The developer wants to ensure responses are relevant, concise, and structured. Which of the following practices are crucial when integrating Cortex Search with Snowflake Cortex LLM functions like AI_COMPLETE for this RAG chatbot?

- A. The
 -
- B. Using the
 -
- C. The retrieved context from Cortex Search should be directly concatenated with the user's prompt as input to the
- D. For performance and cost optimization, it is always recommended to query Cortex Search and the LLM function within a single
- E. To maintain conversational context in a multi-turn chat, the developer should pass all previous user prompts and model responses in the

□
Answer: B,E

Explanation:
□

NEW QUESTION # 270

A financial institution is deploying a sentiment analysis application that uses Snowflake Cortex 'SENTIMENT' and 'COMPLETE' functions, with different LLMs, for processing customer feedback. They are using AI Observability (Public Preview) to compare the cost- efficiency of using 'mistral-7b' versus 'claude-3-5-sonnet' as LLM judges for evaluation metrics, and also tracking the overall cost of their AI Observability usage. Which statements accurately reflect the cost implications and monitoring tools for this scenario?

- A. Option D
- B. Option A
- C. Option B
- D. Option E
- E. Option C

Answer: A,B,D

Explanation:

Option A is correct because AI Observability utilizes LLM judges (such as 'mistral-7b' or 'claude-3-5-sonnet') through 'COMPLETE (SNOWFLAKE.CORTEX)' function calls to compute evaluation metrics, and these calls incur charges based on the 'tokens processed'. Option D is correct as, beyond LLM judge costs, AI Observability also incurs warehouse charges for managing evaluation runs and for queries that compute evaluation metrics. Option E is correct because the view, with a filter for 'SERVICE _ TYPE ILIKE', provides a comprehensive daily credit usage report for all AI services, which would include AI Observability's components. Option B is incorrect; the view is specifically for Document AI processing functions like '!PREDICT and 'AI_EXTRACT', not for general LLM judge usage in AI Observability. The view is more appropriate for tracking individual Cortex function calls. Option C is incorrect because while prompt sizes might be similar, the pricing for different LLMs (e.g., 'mistral-7b' at 0.12 credits per million tokens vs. 'claude-3-5-sonnet' at 2.55 credits per million tokens for AI Complete) will still result in different billed amounts due to varying per-token costs, even if the number of tokens is the same.

NEW QUESTION # 271

A developer has successfully created a Cortex Search Service named transcript_search within cortex_search_db. services based on customer support transcripts. They now need to query this service to find support tickets related to 'internet issues' specifically from the 'North America' region, and they only want the single most relevant result. Which of the following SQL commands correctly performs this query?

- A. Option E
- B. Option A
- C. Option D
- D. Option B
- E. Option C

Answer: B

Explanation:

Option A is the correct syntax for querying a Cortex Search Service using the SEARCH PREVIEW function, as demonstrated in the sources. It correctly specifies the service name, query, columns to retrieve, filter condition using the operator, and the limit, all within a JSON @eq string. Options B, C, D, and E use incorrect function names, parameter formats, or JSON structures for the SEARCH PREVIEW function as defined in the provided documentation.

NEW QUESTION # 272

A data science team is developing an internal LLM to classify legal documents. They previously used a general-purpose LLM, but found its performance for their specific legal domain to be inconsistent, leading to high error rates and increased manual review. They decide to fine-tune a model using Snowflake Cortex Fine-tuning to improve accuracy and reduce latency for real-time document classification. Which base model, among those available for fine-tuning via SNOWFLAKE.CORTEX.FINETUNE

, is explicitly noted for its low latency and high throughput processing, making it a strong candidate for this use case, especially for multi-page text classification?

- A. Option D
- B. Option E
- C. Option A
- D. Option B
- E. Option C

Answer: A

Explanation:

Option D is correct. The sources explicitly state that `mistral-7b`

is 'ideal for your simplest summarization, structuration, and question answering tasks that need to be done quickly. It offers low latency and high throughput processing for multiple pages of text with its 32K context window'. This description directly aligns with the scenario's requirement for improved accuracy and reduced latency for real-time document classification, particularly for multi-page legal documents. Option A is incorrect because while

`mistral-7b` is available for fine-tuning and suitable for content creation and chat applications, it is not specifically noted for low latency and high throughput processing for multi-page text classification in the same way as

`mistral-7b` is Snowflake's top-tier enterprise LLM excelling at SQL generation, coding, and instruction following, but it is not listed as a base model available for fine-tuning with `SNOWFLAKE.CORTEX.FINETUNE`.

NEW QUESTION # 273

A data engineering team is tasked with creating vector embeddings for a collection of diverse, multilingual research papers for a semantic search application. They need to use `SNOWFLAKE.CORTEX.EMBED TEXT 1024` and are considering two models: `'snowflake-arctic-embed-l-v2.0'` and `'voyage-multilingual-2'`. They also need to ensure the resulting embeddings are stored correctly and understand potential text truncation. Which of the following statements correctly describes the application of the `'EMBED TEXT 1024'` function for these models and the characteristics of the generated embeddings?

- A. The `'snowflake-arctic-embed-l-v2.0'` model has a larger context window than `'voyage-multilingual-2'`, making it more suitable for longer research papers without truncation.
- B. The query
- C. Both `'snowflake-arctic-embed-l-v2.0'` and `'nv-embed-qa-4'` are multilingual models with a 1024-dimension output, making them interchangeable for this use case.
- D. The function call
- E. Using either `'snowflake-arctic-embed-l-v2.0'` or `'voyage-multilingual-2'` will result in a `'VECTOR(FLOAT, 1024)'` data type, which is compatible with `'VARIANT'` columns.

Answer: B

Explanation:

Option C is correct. The `'EMBED_TEXT_1024'` function's syntax is `'SNOWFLAKE.CORTEX.EMBED_TEXT 1024(, y.` The `'voyage-multilingual-2'` model has a context window of 32000 tokens, and text exceeding the model's context window is truncated before embedding. Option A is incorrect because `'snowflake-arctic-embed-l-v2.0'` has a 512-token context window, while `'voyage-multilingual-2'` has a 32000-token context window, meaning `'voyage-multilingual-2'` has a larger context window. Option B is incorrect because while `'EMBED TEXT 1024'` returns a `1024)` data type, the `'VECTOR'` data type is explicitly not supported in `'VARIANT'` columns. Option D is incorrect because `'nv-embed-qa-v'` is an English-only model, whereas `'snowflake-arctic-embed-l-v2.0'` is multilingual. Option E is incorrect because the model name should be the first argument and the text the second argument in the function call, i.e., `'text_input`.

NEW QUESTION # 274

.....

With the aid of our GES-C01 exam preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our GES-C01 learning questions. Our GES-C01 training questions are the

accumulation of professional knowledge worthy practicing and remembering. There are so many specialists who join together and contribute to the success of our GES-C01 Guide quiz just for your needs.

Examcollection GES-C01 Free Dumps: https://www.realvce.com/GES-C01_free-dumps.html

Snowflake New GES-C01 Study Materials Interactive Testing Engine that simulates exam environment, GES-C01 testking PDF is a way to success, and our dumps materials is no doubt a helpful hand, Here you do not need to struggle with excessive worries anymore, because our Snowflake GES-C01 sure-pass learning materials will be your property of knowledge, an bountiful investment to make with irresistible identities, You can safely buy a full set of GES-C01 exam software in our official website.

Web browsers that are popular off the ability to cover the GES-C01 tracks of the users the log files of the user are created but when the browser is closed they are deleted.

Thanks Gaddi and Exam Collection, Interactive Testing Engine that simulates exam environment, GES-C01 Testking PDF is a way to success, and our dumps materials is no doubt a helpful hand.

Types of Real Snowflake GES-C01 Exam Questions

Here you do not need to struggle with excessive worries anymore, because our Snowflake GES-C01 sure-pass learning materials will be your property of knowledge, an bountiful investment to make with irresistible identities.

You can safely buy a full set of GES-C01 exam software in our official website, As a long-established company, we have spared no efforts to make sure that our GES-C01 exam prep files have kept in step with the times.
