

Pass Guaranteed Quiz Oracle - 1Z0-182 - New Oracle Database 23ai Administration Associate Exam Experience

2025 Latest PremiumVCEDump 1Z0-182 PDF Dumps and 1Z0-182 Exam Engine Free Share: https://drive.google.com/open?id=1cNFtJ7U581-GBZJP_L0kMfdgyEHXgZ5

PremiumVCEDump deeply believe that our latest 1Z0-182 exam torrent will be very useful for you to strength your ability, pass your 1Z0-182 exam and get your certification. Our 1Z0-182 study materials with high quality and high pass rate in order to help you get out of your harassment. If you do not have access to internet most of the time, if you need to go somewhere is in an offline state but you want to learn for your 1Z0-182 Exam. Our website will help you solve your problem with the help of our excellent 1Z0-182 exam questions.

PremiumVCEDump is a website to achieve dreams of many IT people. PremiumVCEDump provide candidates participating in the IT certification exams the information they want to help them pass the exam. Do you still worry about passing Oracle certification 1Z0-182 exam? Have you thought about purchasing an Oracle certification 1Z0-182 exam counseling sessions to assist you? PremiumVCEDump can provide you with this convenience. PremiumVCEDump's training materials can help you pass the certification exam. PremiumVCEDump's exercises are almost similar to real exams. With PremiumVCEDump's accurate Oracle Certification 1Z0-182 Exam practice questions and answers, you can pass Oracle certification 1Z0-182 exam with a high score.

Excellent New 1Z0-182 Exam Experience | Latest Updated Valid 1Z0-182 Test Dumps and Trustworthy Positive Oracle Database 23ai Administration Associate Feedback

In this knowledge-dominated world, the combination of the knowledge and the practical working competences has been paid high attention to is extremely important. If you want to improve your practical abilities you can attend the 1Z0-182 certificate examination. Passing the 1Z0-182 Certification can prove that you boost both the practical abilities and the knowledge and if you buy our 1Z0-182 latest question you will pass the 1Z0-182 exam smoothly.

Oracle Database 23ai Administration Associate Sample Questions (Q86-

Q91):

NEW QUESTION # 86

You execute this command: [oracle@host01 ~]\$ expdp system/oracle FULL=Y DUMPFILE=exp_db_full.dmp PARALLEL=4 LOGFILE=exp_db_full.log JOB_NAME=exp_db_full. During the export operation, you detach from the job by using CTRL+C and then execute this command: Export> STOP_JOB=IMMEDIATE. Are you sure you wish to stop the job ([yes]/no): yes. Which two statements are true about the job?

- A. It terminates.
- B. You can reattach to it and monitor it.
- C. You cannot monitor it.
- D. It continues to run in the background.

Answer: A,B

Explanation:

- A.False. STOP_JOB=IMMEDIATE halts the job, not backgrounds it.
- B.False. You can monitor before stopping or after restarting.
- C.True. Before stopping, you can reattach with expdp attach=exp_db_full.
- D.True. STOP_JOB=IMMEDIATE terminates the job instantly.

NEW QUESTION # 87

Which of the following statements is true about external tables?

- A. They are read/write tables.
- B. They describe how the external table layer presents data to the server.
- C. They describe data stored in the database.
- D. They describe how data is stored in the external source.

Answer: B

Explanation:

- A.False. External tables are read-only.
- B.True. Defines how external data (e.g, CSV) is mapped to SQL.
- C.False. Data is external, not in the DB.
- D.False. Storage is external; Oracle doesn't define it.

NEW QUESTION # 88

Which two methods can be used to purge audit records of the Unified Audits?

- A. Use DBMS_AUDIT_MGMT.DELETE_AUDIT_RECORDS('POLICY_NAME') as a privileged user to manually purge audit records of a specified Unified Policy.
- B. Only the owner of a Unified Audit Policy can purge audit records by resetting the policy.
- C. Use DBMS_AUDIT_MGMT.CLEAN_AUDIT_TRAIL as a privileged user to manually purge audit records.
- D. Use DBMS_AUDIT_MGMT.CREATE_PURGE_JOB as a privileged user to schedule an automatic purge job.
- E. Only viewed audit records can be purged from Unified Audits.
- F. Use DBMS_AUDIT_MGMT.DELETE_AUDIT_RECORDS('POLICY_NAME') as a privileged user to manually purge audit records of a specified Unified Policy.

Answer: C,D

Explanation:

False. No such procedure exists in DBMS_AUDIT_MGMT. The package offers CLEAN_AUDIT_TRAIL and CREATE_PURGE_JOB, but nothing targets a specific policy's records by name in this format. You can filter records in UNIFIED_AUDIT_TRAIL by policy (e.g., SELECT * WHERE UNIFIED_AUDIT_POLICIES = 'POLICY_NAME'), but purging is all-or-nothing or time-based, not policy-specific via a single command.

Why Incorrect:This appears to be a fabricated or misinterpreted option, possibly confusing audit policy management with trail purging.

Explanation:

Unified Auditing in Oracle 23ai consolidates audit records into a single trail, managed via the DBMS_AUDIT_MGMT package. Let's evaluate each option with extensive detail:

A : Only viewed audit records can be purged from Unified Audits.

False. There's no concept of "viewed" audit records restricting purging. Unified Audit records (stored in UNIFIED_AUDIT_TRAIL) can be purged based on time, policy, or manual intervention, regardless of whether they've been viewed. This option misrepresents audit management capabilities.

Mechanics:Purging is controlled by retention policies or explicit commands, not view status. For example, records older than a set retention period (e.g., 90 days via DBMS_AUDIT_MGMT.SET_AUDIT_TRAIL_PROPERTY) are eligible for purging.

Why Incorrect:No Oracle documentation ties purging to viewing, making this a fabricated limitation.

B : Use DBMS_AUDIT_MGMT.CREATE_PURGE_JOB as a privileged user to schedule an automatic purge job.

True. This procedure creates a scheduled job to automatically purge audit records based on a retention policy or custom criteria. It's a standard method for ongoing audit trail maintenance, requiring privileges like AUDIT_ADMIN.

Mechanics:Example: BEGIN DBMS_AUDIT_MGMT.CREATE_PURGE_JOB(AUDIT_TRAIL_TYPE => DBMS_AUDIT_MGMT.AUDIT_TRAIL_UNIFIED, JOB_FREQUENCY => 'DAILY', JOB_STATUS => DBMS_AUDIT_MGMT.JOB_ENABLED); END;. This schedules daily purges of old records, using the retention period set by SET_AUDIT_TRAIL_PROPERTY.

Practical Use:Ideal for production environments to prevent the audit trail from growing indefinitely (e.g., avoiding tablespace exhaustion in SYSAUX).

Edge Case:If no retention period is set, the job purges nothing until configured, highlighting the need for prior setup.

C : Only the owner of a Unified Audit Policy can purge audit records by resetting the policy.

False. Audit policies don't have "owners" in the traditional sense; they're created by users with AUDIT_ADMIN and managed globally. Resetting or disabling a policy (e.g., NOAUDIT POLICY my_policy) stops auditing but doesn't purge existing records. Purging is a separate operation via DBMS_AUDIT_MGMT.

Why Incorrect:This conflates policy management with audit trail cleanup, which are distinct in Oracle.

D : Use DBMS_AUDIT_MGMT.CLEAN_AUDIT_TRAIL as a privileged user to manually purge audit records.

True. This procedure manually purges all Unified Audit records up to the current timestamp (or a specified time), requiring AUDIT_ADMIN privileges. It's a one-time cleanup tool.

Mechanics:Example: BEGIN DBMS_AUDIT_MGMT.CLEAN_AUDIT_TRAIL(AUDIT_TRAIL_TYPE => DBMS_AUDIT_MGMT.AUDIT_TRAIL_UNIFIED, USE_LAST_ARCH_TIMESTAMP => FALSE); END;. This clears the entire trail unless restricted by a timestamp.

Practical Use:Useful for immediate space reclamation or post-incident cleanup, unlike scheduled jobs.

Edge Case:If the audit trail is large, this may require significant undo space and time, potentially impacting performance.

NEW QUESTION # 89

Which two statements are true about views used for viewing tablespace and datafile information?

- A. A datafile can be renamed when the database is in MOUNT state and the new file name is displayed when querying DBA_DATA_FILES after the database is opened.
- B. V\$TABLESPACE displays information about tablespaces contained in the data dictionary.
- C. V\$TABLESPACE displays information that is contained in the control file about tablespaces.
- D. Tablespace free space can be viewed in DBA_TABLESPACES.
- E. Tablespace free space can be viewed in V\$TABLESPACE.

Answer: A,C

Explanation:

A .False. V\$TABLESPACE doesn't show free space directly.

B .False. It's from the control file, not the data dictionary.

C .True. Renaming in MOUNT state updates DBA_DATA_FILES post-open.

D .False. DBA_TABLESPACES shows attributes, not free space directly (use DBA_FREE_SPACE).

E .True. V\$TABLESPACE reflects control file data.

NEW QUESTION # 90

Which of the following ALTER SYSTEM statements can be run from within a pluggable database (PDB)?

- A. ALTER SYSTEM SWITCH LOGFILE
- B. ALTER SYSTEM CHECKPOINT
- C. ALTER SYSTEM ENABLE / DISABLE RESTRICTED SESSION

- D. ALTER SYSTEM FLUSH BUFFER_CACHE

Answer: B,C

Explanation:

- A .True. Local checkpoints are allowed in PDBs.
- B .False. Buffer cache is CDB-level.
- C .False. Log switching is CDB-level.
- D .True. Restricted session can be toggled per PDB.

NEW QUESTION # 91

.....

Studying with us will help you build the future you actually want to see. By giving you both the skills and exposure of your area of work, our 1Z0-182 study guides, 1Z0-182 dump and practice questions and answers will help you pass 1Z0-182 Certification without any problem. Our very special 1Z0-182 products which include 1Z0-182 practice test questions and answers encourage you to think higher and build a flourishing career in the every growing industry.
