Dump C_BCBAI_2502 Check & New C_BCBAI_2502 Test Camp

Our company has employed a lot of leading experts in the field to compile the C_BCBAI_2502 Exam Materials, in order to give candidate a chance to pass the C_BCBAI_2502 exam. So many candidates see our PassReview web page occasionally, and they are attracted by our high quality and valid dumps. They bought it without any hesitation. However, they passed the exam

successfully. It turned out that their choice was extremely correct.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q52-Q57):

NEW QUESTION # 52
(What are some functions that the SAP Build Code with code generation add-on provides? Note: There are 2 correct answers to this question.)

- A. Explain existing code
- B. Generate unit tests for ABAP classes
- C. Refactor CAP projects
- D. Insert code snippets through Joule

Answer: A,B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract: The SAP Build Code with code generation add-on, powered by Joule, provides functions such as explaining existing code through code reviews and comments, and generating unit tests for ABAP classes by selecting methods and using AI-based features to create tests efficiently.
Exact extracts supporting this:
Explain existing code: "/cap-edit-model: Edits existing CAP data models, supports code reviews, adds comments, and answers questions like 'Does this code follow the best practices of CAP?'"community.sap.com "/ui5: Explains UI5-related artifacts, e.g., 'What does the code in the main controller do?', with options to consider selected code without specifying files."community.sap.com "Code Commenting via Joule Code Assistant, generating explanatory comments for selected code, with accept/reject options."community.sap.com Generate unit tests for ABAP classes: "With Joule for developers, ABAP AI capabilities, you can easily access AI-based features designed to help you create ABAP Unit tests."help.sap.com "Navigate to any of the specified views and select a public method from a global ABAP class. Open the context menu and select Joule Generate Unit Tests."help.sap.com
Other options are incorrect because:
Option B: While Joule supports inline code-completion for suggesting snippets, this is a general feature rather than a specific function of the code generation add-on, which focuses on broader generation tasks like models and tests rather than snippet insertion.
Option C: Refactoring is supported for CAP projects through editing models and code refactor assistants, but it is not highlighted as a primary function of the code generation add-on, which emphasizes generation and explanation over refactoring.
Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Community blogs like "Overview of all GenAI Options in SAP Build Code" and "Develop with Joule in SAP Build Code," as well as SAP Help Portal documentation on ABAP AI capabilities in SAP Build Code. These align with the C_BCBAI_2502 certification, positioning SAP Build Code as an AI-enhanced development tool within the SAP Business Suite for Java, JavaScript, and ABAP.

NEW QUESTION # 53
In Custom Al Adoption (CAIA) with SAP, what is the correct order of steps?
□

Answer:

Explanation:
□

NEW QUESTION # 54
If a company implements SAP's Business Al offerings comprehensively, all things being equal, which bottomline benefits could they expect?
There are 2 correct answers to this question.
Response:

- A. Gross profit increase: up to 1.4%
- B. Revenue increase: up to 3.5%
- C. Gross profit increase: up to 3.5%
- D. Revenue increase: up to 1.4%

Answer: A,B

NEW QUESTION # 55

Which component of SAP AI is responsible for automating routine business tasks? Please choose the correct answer.

- A. SAP S/4HANA Cloud
- B. SAP AI Core
- C. SAP Intelligent RPA
- D. SAP Conversational AI

Answer: C

Explanation:

SAP Intelligent RPA is the primary component of SAP AI responsible for automating routinebusiness tasks, combining robotic process automation with AI capabilities. The correct answer is SAP Intelligent RPA, as it is explicitly designed for this purpose. SAP documentation states: "SAP Intelligent RPA automates repetitive business tasks such as data entry, document processing, and workflow execution by combining robotic process automation with AI capabilities." This solution enables organizations to "streamline routine tasks like invoice processing, order management, and data validation," reducing manual effort and improving efficiency. For example, SAP Intelligent RPA can "extract data from invoices and update financial systems automatically," as seen in SAP S /4HANA integrations.

The incorrect options are not focused on routine task automation. SAP Conversational AI handles natural language interactions, such as chatbots, not routine tasks. SAP AI Core is an infrastructure platform for AI model development, not task automation. SAP S/4HANA Cloud is a broad ERP system, not a specific automation component. SAP Intelligent RPA's role in automation, as evidenced by its use in SAP Business Technology Platform, confirms its suitability.

NEW QUESTION # 56

(What are some benefits of SAP Signavio's AI-assisted performance indicator recommender? Note: There are 3 correct answers to this question.)

- A. Self-service approach to define an initial process monitoring framework
- B. Simple connection between the business problem, the affected process, and the relevant metric to be measured
- C. Instant recommendations based on best practices
- D. Cross-system KPI standardization across a company's divisions and departments
- E. Automated creation of custom KPI dashboards

Answer: A,B,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: The benefits of SAP Signavio's AI-assisted performance indicator recommender include providing a simple connection between business problems, processes, and metrics for targeted monitoring; enabling a self-service approach to establish process monitoring frameworks; and delivering instant recommendations based on best practices to accelerate process improvement.

Exact extracts supporting this:

Simple connection: "Leverage the simplified connection between the business problem, the affected process, and the relevant metric ..."community.sap.com Self-service approach: "The AI-assisted performance indicators recommender capability provides process owners and analysts with instant, curated recommendations on the process ..."learning.sap.com (Implying self-service through analyst access.) Instant recommendations: "Instant recommendations based on best practices."learning.sap.com "An AI-assisted performance indicators recommender delivers instant recommendations on the most relevant process performance indicators (PPIs) ..."news.sap.com Other options are incorrect because:

Option B: While recommendations aid monitoring, automated dashboard creation is not a specified benefit; focus is on indicator suggestions.

Option D: Standardization may occur indirectly, but the recommender emphasizes instant, tailored recommendations rather than cross-system uniformity.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP News "New Process AI Capabilities for SAP Signavio" and SAP Help Portal "AI-Assisted Performance Indicators Recommender." These highlight the recommender's role in process intelligence within SAP Signavio, positioned as part of AI-enhanced transformation in the SAP Business Suite, as per C_BCBAI_2502 materials and learning journeys on generative AI in Signavio.
