

FCP_FAZ_AD-7.4 New Learning Materials - FCP_FAZ_AD-7.4 Test Questions Answers

With our FCP_FAZ_AD-7.4 test engine, you can practice until you get right. With the options to highlight missed questions, you can analysis your mistakes and know your weakness in the FCP_FAZ_AD-7.4 exam test. The intelligence of the FCP_FAZ_AD-7.4 test engine has inspired the enthusiastic for the study. In order to save your time and energy, you can install FCP_FAZ_AD-7.4 Test Engine on your phone or i-pad, so that you can study in your spare time. You will get a good score with high efficiency with the help of FCP_FAZ_AD-7.4 practice training tools.

Fortinet FCP_FAZ_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	Administration: This section evaluates the ability of network and security analysts to configure administrative access and manage Administrative Domains (ADOMs). It covers tasks such as setting user permissions, managing backups, and disk quotas, and ensuring secure and efficient management of administrative privileges within FortiAnalyzer systems.
Topic 2	Device Management: Here, Fortinet network and security analysts are evaluated on their ability to handle devices linked to FortiAnalyzer. This includes adding new devices, managing them efficiently, and troubleshooting communication issues.
Topic 3	Logs and Reports Management: This part of the exam measures the candidate's ability to handle log data and generate reports using FortiAnalyzer. Network and security analysts must show proficiency in managing, analyzing, and reviewing logs to ensure effective system monitoring and auditing processes are in place.

Topic 4	• System Configuration: This section assesses the capabilities of network and security analysts in managing FortiAnalyzer systems. It includes tasks like performing initial configurations, setting up high-availability systems, and configuring RAID for storage.

100% Pass Quiz Fortinet - Trustable FCP_FAZ_AD-7.4 New Learning Materials

With their authentic and real FCP_FAZ_AD-7.4 exam questions, you can be confident of passing the Fortinet FCP_FAZ_AD-7.4 certification exam on the first try. In conclusion, if you want to ace the FCP - FortiAnalyzer 7.4 Administrator (FCP_FAZ_AD-7.4) certification exam and make a successful career in the Fortinet sector, ActualTestsIT is the right choice for you. Their FCP - FortiAnalyzer 7.4 Administrator (FCP_FAZ_AD-7.4) practice tests and preparation materials are designed to provide you with the best possible chance of passing the Fortinet FCP_FAZ_AD-7.4 exam with flying colors. So, don't wait any longer, start your preparation now with ActualTestsIT!

Fortinet FCP - FortiAnalyzer 7.4 Administrator Sample Questions (Q164-Q169):

NEW QUESTION # 164

In the FortiAnalyzer FortiView, source and destination IP addresses from FortiGate devices are not resolving to a hostname. How can you resolve the source and destination IP addresses, without introducing any additional performance impact to FortiAnalyzer?

- **A. Resolve IP addresses on FortiGate**
- B. Resolve IP addresses on a per-ADOM basis to reduce delay on FortiView while IPs resolve
- C. Configure local DNS servers on FortiAnalyzer
- D. Configure # set resolve-ip enable in the system FortiView settings

Answer: A

Explanation:

<https://packetplant.com/fortigate-and-fortianalyzer-resolve-source-and-destination-ip/>

"As a best practice, it is recommended to resolve IPs on the FortiGate end. This is because you get both source and destination, and it offloads the work from FortiAnalyzer. On FortiAnalyzer, this IP resolution does destination IPs only"

NEW QUESTION # 165

You are trying to initiate an authorization request from FortiGate to FortiAnalyzer, but the Security Fabric window does not open when you click Authorize.

Which two reasons can cause this to happen? (Choose two.)

- **A. The management computer does not have connectivity to the authorization IP address and port combination.**
- **B. The fabric authorization settings on FortiAnalyzer are misconfigured.**
- C. A pre-shared key needs to be established on both sides.
- D. The Security Fabric root is unauthorized and needs to be added as a trusted host.

Answer: A,B

Explanation:

The management computer does not have connectivity to the authorization IP address and port combination.

If there is no network connectivity between the management computer and the FortiAnalyzer on the specific IP address and port used for authorization, the Security Fabric window will not open.

The fabric authorization settings on FortiAnalyzer are misconfigured.

If the fabric authorization settings on FortiAnalyzer are not properly configured, FortiGate will not be able to initiate the authorization request, preventing the Security Fabric window from opening.

The other options are not applicable because:

Pre-shared keys are not required for initial authorization between FortiGate and FortiAnalyzer; they are typically used for establishing VPN tunnels.

The Security Fabric root does not need to be added as a trusted host to open the authorization window. Trusted hosts are more relevant to FortiGate's access control for management interfaces.

NEW QUESTION # 166

Which statement correctly describes RAID 10 (1+0) on FortiAnalyzer?

- A. A configuration with four disks, each with 2 TB of capacity, provides a total space of 4 TB.
B It combines mirroring striping and distributed parity to provide performance and fault tolerance
- B. It uses striping to provide performance and fault tolerance.
- C. A configuration with four disks, each with 2 TB of capacity, provides a total space of 2 TB.

Answer: A

Explanation:

RAID 10 combines mirroring (RAID 1) and striping (RAID 0). In a RAID 10 setup with four disks, data is mirrored across two pairs of disks, and those pairs are striped for performance. This results in improved performance and fault tolerance, but the total usable storage is 50% of the total raw storage, meaning four 2 TB disks provide 4 TB of usable space.

NEW QUESTION # 167

Which two statements regarding ADOM modes are true? (Choose two.)

- A. You can change ADOM modes only through the CLI.
- B. In an advanced mode ADOM, you can assign FortiGate VDOMs from a single FortiGate device to multiple FortiAnalyzer ADOMs.
- C. Normal mode is the default ADOM mode.
- D. In normal mode, the disk quota of the ADOM is fixed and cannot be modified, but in advanced mode, the disk quota of the ADOM is flexible.

Answer: B,C

NEW QUESTION # 168

An administrator has configured the following settings:

What is the purpose of executing these commands?

- A. To verify the integrity of the log files received.
- B. To create the secure channel used by the OFTP process.
- C. To encrypt log transfer between FortiAnalyzer and other devices.
- D. To record the hash value and authentication code of log files.

Answer: A

Explanation:

The purpose of executing the provided CLI commands, which include setting the log-checksum to md5- auth, is to ensure the integrity of the log files. This setting is used to record the MD5 hash value of log files, which is a widely used cryptographic hash function that produces a 128-bit (16-byte) hash value. By using MD5 authentication, FortiAnalyzer ensures that the log files have not been altered or tampered with during transit, thereby verifying their integrity upon receipt. This is not related to encrypting log transfers, scheduling reports, or creating secure channels for OFTP (Over-the-FortiGate Protocol) processes.

NEW QUESTION # 169

.....

Why we are so popular in the market and trusted by tens of thousands of our clients all over the world? The answer lies in the fact

that every worker of our company is dedicated to perfecting our FCP_FAZ_AD-7.4 exam guide. The professional experts of our company are responsible for designing every FCP_FAZ_AD-7.4 question and answer. No one can know the FCP_FAZ_AD-7.4 study materials more than them. In such a way, they offer the perfect FCP_FAZ_AD-7.4 exam materials not only on the content but also on the displays.
