Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q10-Q15):

NEW QUESTION # 10
Why should you use an NTP server on FortiAnalyzer and all registered devices that log into FortiAnalyzer?

- A. To use real-time forwarding
- B. To properly correlate logs
- C. To resolve host names
- D. To improve DNS response times

Answer: B

NEW QUESTION # 11
Which SQL query is in the correct order to query to database in the FortiAnalyzer?

- A. SELECT FROM $log WHERE devid 'user',, USER1' GROUP BY devid
- B. SELCT devid WHERE 'user'-' USER1' FROM $log GROUP By devid
- C. SELECT devid FROM $log GROUP BY devid WHERE 'user',,' users1'
- D. SELECT devid FROM $log WHERE 'user'=' GROUP BY devid

Answer: D

Explanation:
In FortiAnalyzer's SQL query syntax, the typical order for querying the database follows the standard SQL format, which is:
SELECT <column(s)> FROM <table> WHERE <condition(s)> GROUP BY <column(s)>
* Option D correctly follows this structure:
* SELECT devid FROM $log: This specifies that the query is selecting the devid column from the $log table.
* WHERE 'user' = ': This part of the query is intended to filter results based on a condition involving the user column. Although there appears to be a minor typographical issue (possibly missing the user value after =), it structurally adheres to the correct SQL order.
* GROUP BY devid: This groups the results by devid, which is correctly positioned at the end of the query.
Let's briefly examine why the other options are incorrect:
* Option A: SELECT devid FROM $log GROUP BY devid WHERE 'user', 'users1'
* This is incorrect because the GROUP BY clause appears before the WHERE clause, which is out of order in SQL syntax.
* Option B: SELECT FROM $log WHERE devid 'user', USER1' GROUP BY devid
* This is incorrect because it lacks a column in the SELECT statement and the WHERE clause syntax is malformed.

* Option C: SELCT devid WHERE 'user' - 'USER1' FROM $log GROUP BY devid
* This is incorrect because the SELECT keyword is misspelled as SELCT, and the WHERE condition syntax is invalid.
* FortiAnalyzer documentation for SQL queries indicates that the standard SQL order should be followed when querying logs in FortiAnalyzer. Queries should follow the format SELECT ... FROM ... WHERE ...
GROUP BY ..., as demonstrated in option D.
