FCP_FAZ_AN-7.4 Test Review, Reliable FCP_FAZ_AN-7.4 Learning Materials

The best news is that during the whole year after purchasing, you will get the latest version of our FCP_FAZ_AN-7.4 exam prep for free, since as soon as we have compiled a new version of the study materials, our company will send the latest one of our FCP_FAZ_AN-7.4 study materials to your email immediately. And you will be satisfied by our service for we will auto send it to you as long as we update them. If you have to get our FCP_FAZ_AN-7.4 learning guide after one year, you can still enjoy 50% discounts off on the price.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q25-Q30):

NEW QUESTION # 25

Refer to the exhibit.

Laptop1 is used by several administrators to manage FortiAnalyzer. You want to configure a generic text filter that matches all login attempts to the web interface generated by any user other than "admin" and coming from Laptop1. Which filter will achieve the desired result?

- A. operation-login & performed_on="GUI(10.1.1.210)" & user!=admin
- B. operation-login & performed_on="GUI(10.1.1.100)" & user!=admin
- C. operation-login & dstip=10.1.1.210 & user!=admin
- D. operation-login & srcip=10.1.1.100 & dstip=10.1.1.210 & user==admin

Answer: B

NEW QUESTION # 26

Exhibit.

Laptop1 is used by several administrators to manage FortiAnalyzer. You want to configure a generic text filter that matches all login attempts to the web interface generated by any user other than admin", and coming from Laptop1. Which filter will achieve the desired result?

- A. Operation-login and srcip= 10.1.1.100 and dstip=10.1.1.210 and user==admin
- B. Operation-login and performed_on="GU(10.1.1.120)" and user!=admin
- C. Operation-login and performed_on="GUI(10.1.1.100)" and user!=admin
- D. Operation-login and dstip=10.1.1.210 and user!=admin

Answer: C

Explanation:

The objective is to create a filter that identifies all login attempts to the FortiAnalyzer web interface (GUI) coming from Laptop1 (IP 10.1.1.100) and excludes the admin user. This filter should match any user other than admin.

* Filter Components Analysis:

* Operation-login: This portion of the filter will target login actions specifically, which is correct for filtering login attempts.

* performed_on="GUI(10.1.1.100)': This indicates that the login attempt must occur on the GUI interface and originate from the specified IP, which matches Laptop1's IP address (10.1.1.100). This ensures that the filter only matches GUI logins from this specific device.

* user!=admin: This part excludes logins by the admin user, meeting the requirement to capture only non-admin users.

* Option Analysis:

* Option A: Correctly specifies the Operation-login, performed_on="GUI(10.1.1.100)', and user!=admin. This setup effectively filters login attempts to the GUI from Laptop1, excluding the admin user.

* Option B: Uses the incorrect IP 10.1.1.120 in the performed_on filter, which does not match Laptop1's IP (10.1.1.100).

* Option C: This option includes srcip=10.1.1.100 and dstip=10.1.1.210 but incorrectly specifies user=admin instead of user!=admin, which does not match the requirement to exclude admin users.

* Option D: This option does not specify the performed_on field to restrict it to the GUI and only includes dstip (destination IP) without srcip. It also incorrectly uses user!-admin instead of the correct syntax user!=admin.

Conclusion:

* Correct Answer: A. Operation-login and performed_on="GUI(10.1.1.100)' and user!=admin

* This filter precisely captures the required conditions: login attempts from Laptop1 to the GUI interface by any user except admin.

NEW QUESTION # 27

Which statement is true when you are upgrading the firmware on an HA cluster made up of two FortiAnalyzer devices?

- A. You can perform the firmware upgrade using only a console connection.
- **B. First, upgrade the secondary device, and then upgrade the primary device.**
- C. You can enable uninterruptible-upgrade so that the normal FortiAnalyzer operations are not interrupted while the cluster firmware upgrades.
- D. Both FortiAnalyzer devices will be upgraded at the same time.

Answer: B

NEW QUESTION # 28

An administrator on your team has configured multiple reports to run periodically. Management has an additional request that all new generated reports be sent to a company email inbox for accessibility. The mail server has already been configured on FortiAnalyzer. Which item must configure on FortiAnalyzer so that emails are sent when the reports are generated?

- A. Enable email notification under the report calendar.
- B. Add a mailto:<email address> option within the report layouts.
- C. Enable the option to email all reports under the mail server.
- **D. Enable an output profile on the reports.**

Answer: D

Explanation:

To ensure that reports generated by FortiAnalyzer are automatically sent to an email inbox, you need to set up an output profile for the reports. Output profiles specify where and how reports should be delivered, including the option to send them via email.

Option A - Enable the Option to Email All Reports Under the Mail Server:

The mail server configuration allows FortiAnalyzer to send emails but does not automatically enable email distribution for reports. This setting alone does not specify which reports to send or to whom.

Conclusion: Incorrect.

Option B - Add a mailto:<email address> Option Within the Report Layouts:

Adding an email address within the report layout is not a standard configuration option for report distribution. Report layouts define the format and content of the report but not its distribution method.

Conclusion: Incorrect.

Option C - Enable Email Notification Under the Report Calendar:

The report calendar is used to schedule when reports are generated. While it triggers report generation at specific times, it does not handle email distribution. Emailing reports requires a configured output profile.

Conclusion: Incorrect.

Option D - Enable an Output Profile on the Reports:

An output profile can be configured on FortiAnalyzer to define delivery options, including emailing the report to specified recipients. This setup ensures that every time a report is generated according to the schedule, it is automatically emailed to the configured

address.

Conclusion: Correct.

Conclusion:

Correct Answer : D. Enable an output profile on the reports.

Configuring an output profile is the correct way to set up automatic email distribution of generated reports in FortiAnalyzer.

Reference:

FortiAnalyzer 7.4.1 documentation on configuring output profiles and report distribution settings.

NEW QUESTION # 29

What database language does FortiAnalyzer use for logging and reporting?

- A. Java
- B. XML
- C. SQL
- D. XQuery

Answer: C

NEW QUESTION # 30

.....

Individuals who pass the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) certification exam demonstrate to their employers and clients that they have the knowledge and skills necessary to succeed in the industry. ActualtestPDF is aware that preparing with outdated FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) study material results in a loss of time and money.

FCP_FAZ_AN-7.4 Test Review: https://www.actualtestpdf.com/Fortinet/FCP_FAZ_AN-7.4-practice-exam-dumps.html

Maybe you can get help from ActualtestPDF FCP_FAZ_AN-7.4 Test Review, So we suggest that you learn our FCP_FAZ_AN-7.4 latest training material, which can help broaden your knowledge, With ActualtestPDF FCP_FAZ_AN-7.4 preparation tests you can pass the FCP - FortiAnalyzer 7.4 Analyst easily, get the Fortinet and go further on Fortinet career path, At first, no matter you are a common visitor or a person who desire the reliable FCP_FAZ_AN-7.4 exam prep pdf, just try our Fortinet FCP_FAZ_AN-7.4 free study demo.

Seems like a smart decision to us, If you clicked somewhere else without FCP_FAZ_AN-7.4 hitting Return, click back in that box at the end of the title and hit the Return key, Maybe you can get help from ActualtestPDF.

Pass Guaranteed Fortinet - FCP_FAZ_AN-7.4 - High Hit-Rate FCP - FortiAnalyzer 7.4 Analyst Reliable Exam Labs
