

FCP_FGT_AD-7.4 Exam Vce | Reliable FCP_FGT_AD-7.4 Dumps Questions

P.S. Free 2025 Fortinet FCP_FGT_AD-7.4 dumps are available on Google Drive shared by RealValidExam:
<https://drive.google.com/open?id=1GIC1HEcKahRHqmjiOy2s2d3JkM38-IRf>

We have dedicated staff to update all the content of FCP_FGT_AD-7.4 exam questions every day. So you don't need to worry about that you buy the materials so early that you can't learn the last updated content. And even if you failed to pass the exam for the first time, as long as you decide to continue to use FCP_FGT_AD-7.4 torrent prep, we will also provide you with the benefits of free updates within one year and a half discount more than one year. FCP_FGT_AD-7.4 Test Guide use a very easy-to-understand language. So even if you are a newcomer, you don't need to worry that you can't understand the contents. Industry experts hired by FCP_FGT_AD-7.4 exam questions also explain all of the difficult professional vocabulary through examples, forms, etc. You can completely study alone without the help of others.

Fortinet FCP_FGT_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• VPN: In this section, the focus is on how to configure SSL VPNs for secure network access and implement meshed or redundant IPsec VPNs.
Topic 2	• Firewall Policies and Authentication: This topic covers how to set firewall policies, configure SNAT • DNAT, implement authentication methods, and deploy FSSO.
Topic 3	• Routing: This section covers how to set up packet routing with static routes and configure SD-WAN for efficient traffic load balancing.
Topic 4	• Content Inspection: This section covers how to inspect encrypted traffic, configure inspection modes, apply web filtering, manage applications, set antivirus modes, and implement IPS for security.
Topic 5	• Deployment and System Configuration: This section covers how to set up initial configurations, implement Fortinet Security Fabric, and configure an FGCP HA cluster; diagnose resources and connectivity.

100% Pass 2025 Fortinet FCP_FGT_AD-7.4: FCP - FortiGate 7.4 Administrator Exam Vce

With these real FCP_FGT_AD-7.4 Questions, you can prepare for the test while sitting on a couch in your lounge. Whether you are at home or traveling anywhere, you can do FCP_FGT_AD-7.4 exam preparation with our Fortinet FCP_FGT_AD-7.4 dumps. FCP_FGT_AD-7.4 test candidates with different learning needs can use our three formats to meet their needs and prepare for the Fortinet FCP_FGT_AD-7.4 test successfully in one go. Read on to check out the features of these three formats.

Fortinet FCP - FortiGate 7.4 Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12

FortiGate is configured for firewall authentication. When attempting to access an external website, the user is not presented with a login prompt.

What is the most likely reason for this situation?

- A. No matching user account exists for this user.
- B. The user is using a guest account profile.
- C. The user is using a super admin account.
- **D. The user was authenticated using passive authentication.**

Answer: D

Explanation:

The most likely reason for a user not being presented with a login prompt when attempting to access an external website in a FortiGate firewall authentication scenario is:

C. The user was authenticated using passive authentication.

Passive authentication allows the FortiGate to authenticate users transparently without presenting them with a login prompt. This often involves the use of authentication methods such as Captive Portal or single sign-on (SSO) techniques where users are authenticated based on their network activity without actively entering credentials.

Options A, B, and D are less likely to cause the absence of a login prompt in this context: A is less likely because if there was no matching user account, it would typically result in an authentication prompt.

B is less likely unless the guest account profile specifically has a passive authentication mechanism.

D is less likely because super admin accounts are typically not subject to transparent or passive authentication mechanisms. So, the most likely reason is C.

NEW QUESTION # 13

Which two statements are true about collector agent advanced mode? (Choose two.)

- A. Advanced mode uses Windows convention-NetBios: Domain\Username.
- **B. Advanced mode supports nested or inherited groups.**
- C. Security profiles can be applied only to user groups, not individual users.
- **D. FortiGate can be configured as an LDAP client and group filters can be configured on FortiGate.**

Answer: B,D

Explanation:

In FortiGate's FSSO (Fortinet Single Sign-On) feature, the collector agent operates in either standard mode or advanced mode. Here's an explanation of the statements:

B. FortiGate can be configured as an LDAP client, and group filters can be configured on FortiGate:

In advanced mode, FortiGate can act as an LDAP client, allowing it to directly query Active Directory for user and group information. Group filters can be configured on FortiGate to selectively include or exclude specific groups in the FSSO process. This provides more flexibility and control over which groups are considered for FSSO integration.

C. Advanced mode supports nested or inherited groups:

In advanced mode, FortiGate can recognize and utilize nested group structures in Active Directory.

Nested groups refer to groups that contain other groups as members. With advanced mode, FortiGate can accurately reflect the group memberships and apply policies accordingly.

These features enhance the capabilities of FSSO in advanced mode, making it suitable for environments with complex group structures and the need for more granular control over user and group policies.

- In advanced mode, you can configure FortiGate as an LDAP client and configure the group filters on FortiGate.

- Also, advanced mode supports nested or inherited groups.

D. Incorrect, Netbios is Standard mode.

A. Incorrect, in Advanced mode, FortiGate can apply security profiles to individual users, user groups, and OUs.

NEW QUESTION # 14

Which two statements are true about the FGCP protocol? (Choose two.)

- A. Not used when FortiGate is in Transparent mode
- **B. Runs only over the heartbeat links**
- C. Is used to discover FortiGate devices in different HA groups
- **D. Elects the primary FortiGate device**

Answer: B,D

Explanation:

C: Runs only over the heartbeat links: FGCP utilizes heartbeat links for exchanging heartbeat packets to monitor the health of the cluster. While heartbeat links play a crucial role, other interfaces can also be used for synchronization and communication within the cluster.

D: Elects the primary FortiGate device: FGCP is responsible for the election of the primary FortiGate device in a high availability (HA) cluster. The primary FortiGate manages the traffic while the secondary FortiGate stays in standby mode.

NEW QUESTION # 15

Refer to the exhibit.

```
FGT1 # get router info routing-table database
Codes: K - kernel, C - connected, S - static, R - RIP, B - BGP
       O - OSPF, IA - OSPF inter area
       N1 - OSPF NSSA external type 1, N2 - OSPF NSSA external type 2
       E1 - OSPF external type 1, E2 - OSPF external type 2
       i - IS-IS, L1 - IS-IS level-1, L2 - IS-IS level-2, ia - IS-IS inter area
       V - BGP VPNv4
       > - selected route, * - FIB route, p - stale info

Routing table for VRF=0
S    *> 0.0.0.0/0 [10/0] via 172.20.121.2, port1, [20/0]
S    *>          [10/0] via 10.0.0.2, port2, [30/0]
S    0.0.0.0/0 [20/0] via 192.168.15.2, port3, [10/0]
C    *> 10.0.0.0/24 is directly connected, port2
S    172.13.24.0/24 [10/0] is directly connected, port4, [1/0]
C    *> 172.20.121.0/24 is directly connected, port1
S    *> 192.168.1.0/24 [10/0] via 10.0.0.2, port2, [1/0]
C    *> 192.168.15.0/24 is directly connected, port3
```

Based on the routing database shown in the exhibit which two conclusions can you make about the routes? (Choose two.)

- A. The port3 default route has the lowest metric
- **B. The port1 and port2 default routes are active in the routing table**
- **C. The port3 default route has the highest distance**
- D. There will be eight routes active in the routing table

Answer: B,C

Explanation:

The port1 and port2 default routes are active in the routing table

The routes with 0.0.0.0/0 for both port1 and port2 are marked with an asterisk * and > symbol, which indicates that these routes

are active and selected in the routing table.

The port3 default route has the highest distance

The route via port3 has a distance of [20/0], which is higher than the distances for the routes via port1 [10/0] and port2 [30/0]. This indicates that the port3 default route has the highest distance.

NEW QUESTION # 16

An administrator configured a FortiGate to act as a collector for agentless polling mode.

What must the administrator add to the FortiGate device to retrieve AD user group information?

- A. Windows server
- B. LDAP server
- C. DHCP server
- D. RADIUS server

Answer: A

NEW QUESTION # 17

.....

The clients at home and abroad can both purchase our FCP_FGT_AD-7.4 study materials online. Our brand enjoys world-wide fame and influences so many clients at home and abroad choose to buy our FCP_FGT_AD-7.4 study materials. Our company provides convenient service to the clients all around the world so that the clients all around the world can use our FCP_FGT_AD-7.4 Study Materials efficiently. Our company boosts an entire sale system which provides the links to the clients all around the world so that the clients can receive our products timely.
