

FCP_FGT_AD-7.4 Übungstest: FCP - FortiGate 7.4 Administrator & FCP_FGT_AD-7.4 Braindumps Prüfung

Es gibt eine Menge von Websites, die Fortinet FCP_FGT_AD-7.4 Zertifizierungsprüfung und andere Schulungsunterlagen bieten. Aber ExamFragen ist die einzige Website, die Ihnen qualitativ hochwertige Schulungsunterlagen zur Fortinet FCP_FGT_AD-7.4 Zertifizierungsprüfung bietet. Unter der Anleitung und Hilfe von ExamFragen können Sie die Fortinet FCP_FGT_AD-7.4 Prüfung beim ersten Versuch bestehen. Die Fragenpool von ExamFragen werden von den lebendigen IT-Experten nach ihren umfangreichen Wissen und Erfahrungen bearbeitet. Sie werden Sie sicher im IT-Bereich sehr fördern.

Fortinet FCP_FGT_AD-7.4 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• VPN: In this section, the focus is on how to configure SSL VPNs for secure network access and implement meshed or redundant IPsec VPNs.
Thema 2	• Deployment and System Configuration: This section covers how to set up initial configurations, implement Fortinet Security Fabric, and configure an FGCP HA cluster; diagnose resources and connectivity.
Thema 3	• Routing: This section covers how to set up packet routing with static routes and configure SD-WAN for efficient traffic load balancing.
Thema 4	• Content Inspection: This section covers how to inspect encrypted traffic, configure inspection modes, apply web filtering, manage applications, set antivirus modes, and implement IPS for security.
Thema 5	• Firewall Policies and Authentication: This topic covers how to set firewall policies, configure SNAT • DNAT, implement authentication methods, and deploy FSSO.

FCP_FGT_AD-7.4 Online Prüfungen & FCP_FGT_AD-7.4 Zertifizierung

Heutzutage, wo es viele Exzellente gibt, ist es die beste Überlebensmethode, Ihre eigene Position zu festigen. Aber es ist doch nicht so einfach. Während die anderen sich bemühen, ihre Berufsfähigkeiten durch die Fortinet FCP_FGT_AD-7.4 (FCP - FortiGate 7.4

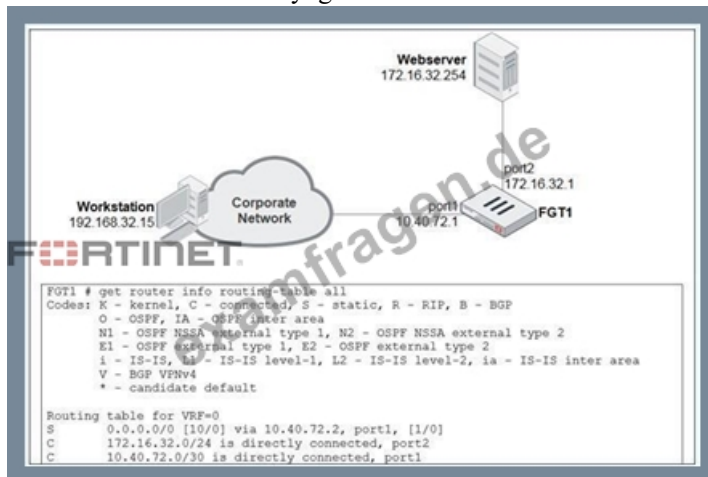

Administrator) Zertifizierungsprüfung zu verbessern, machen Sie keinen Fortschritt und nehmen die Dinge einfach so, wie sie sind. Dann werden Sie eliminiert. Um Ihre Position zu festigen, sollen Sie Ihre Berufsfähigkeiten auch durch die Fortinet FCP_FGT_AD-7.4 (FCP - FortiGate 7.4 Administrator) Zertifizierungsprüfung verbessern und Fortschritt mit den anderen halten. In diesem Fall stehen Sie nicht weit hinter den anderen.

Fortinet FCP - FortiGate 7.4 Administrator FCP_FGT_AD-7.4 Prüfungsfragen mit Lösungen (Q18-Q23):

18. Frage

View the exhibit.

A user at 192.168.32.15 is trying to access the web server at 172.16.32.254.

Which two statements best describe how the FortiGate will perform reverse path forwarding (RPF) checks on this traffic? (Choose two.)

- A. Loose RPF check will deny the traffic.
- B. Loose RPF check will allow the traffic.
- C. Strict RPF check will deny the traffic.
- D. Strict RPF check will allow the traffic.

Antwort: B,D

Begründung:

- B. Loose RPF check will allow the traffic.
- C. Strict RPF check will allow the traffic.

19. Frage

Refer to the exhibits, which show the firewall policy and the security profile for Facebook.

Firewall policy

Name	Facebook SSL Inspection	
Incoming Interface	port3	
Outgoing Interface	port1	
Source	all	X
	+	
Destination	all	X
	+	
Schedule	always	
Service	ALL	X
	+	
Action	☒ ACCEPT ☐ DENY	

Firewall/Network Options

Central NAT is enabled so NAT settings from matching [Central SNAT policies](#) will be applied.

Protocol Options ☒ default

Security Profiles

AntiVirus	☐
Web Filter	☐
DNS Filter	☐
Application Control	☒ APP Facebook Access
IPS	☐
File Filter	☐
SSL Inspection	☒ SSL certificate-inspection

Security profile

The screenshot shows the 'Security profile' configuration for 'Facebook Access'. The 'Name' field is 'Facebook Access' and the 'Comments' field is empty. The 'Categories' section shows a list of categories with their respective counts and icons. The 'Network Protocol Enforcement' section is disabled. The 'Application and Filter Overrides' section shows a table with one entry for 'Facebook'.

Name: Facebook Access

Comments: 0/255

Categories

Mixed ▾ All Categories

- Business (179, 6)
- Collaboration (293, 6)
- Game (124)
- Mobile (3)

- Unknown Applications

Network Protocol Enforcement: ☐

Application and Filter Overrides

+ Create New Edit Delete

Priority	Details	Type	Action
1	Facebook Facebook_Like.Button Facebook_Video.Play	Application	Allow

Users are given access to the Facebook web application. They can play video content hosted on Facebook but they are unable to leave reactions on videos or other types of posts.

Which part of the configuration must you change to resolve the issue?

- A. Get the additional application signatures required to add to the security policy
- B. Make the SSL inspection a deep content inspection
- C. Disable HTTP redirect to HTTPS on the web browser
- D. Add Facebook to the URL category in the security policy

Antwort: A

Begründung:

In the security profile, there are application overrides for specific Facebook-related features, such as "Facebook" and "Facebook_Video.Play." However, the absence of specific signatures for actions like "Facebook_Like.Button" might be preventing reactions. You need to ensure that the necessary application signatures for all desired Facebook features, including reactions (like buttons), are included in the security policy. Therefore, retrieving or adding those signatures would resolve the issue.

20. Frage

Refer to the exhibit to view the firewall policy.

Firewall policy configuration

Edit Policy

Name	Internet_Access		
Incoming Interface	port2	+	✕
Outgoing Interface	port1	+	✕
Source	all	+	✕
Destination	all	+	✕
Schedule	always		
Service	DNS ✕ FTP ✕ HTTP ✕ HTTPS ✕		
Action	☒ ACCEPT ☐ DENY		

Inspection Mode **Flow-based** Proxy-based

Firewall/Network Options

NAT	☐
IP Pool Configuration	Use Outgoing Interface Address Use Dynamic IP Pool
Preserve Source Port	☐
Protocol Options	PROT default

Security Profiles

AntiVirus	☒	AV default
Web Filter	☐	
DNS Filter	☐	
Application Control	☐	
IPS	☐	
File Filter	☐	
SSL Inspection	☒	SSL certificate-inspection

Why would the firewall policy not block a well-known virus, for example eicar?

- A. The firewall policy does not apply deep content inspection.
- B. Web filter is not enabled on the firewall policy to complement the antivirus profile.
- **C. The firewall policy is not configured in proxy-based inspection mode.**
- D. The action on the firewall policy is not set to deny.

Antwort: C

Begründung:

The firewall policy shown in the exhibit is configured in flow-based inspection mode. In flow-based inspection, certain security features, such as deep content inspection, might not be as effective as in proxy-based mode. Proxy-based inspection is necessary for thorough content inspection, which includes identifying and blocking well-known viruses like EICAR.

21. Frage

Which Security rating scorecard helps identify configuration weakness and best practice violations in your network?

- A. Automated Response
- B. Optimization
- C. Fabric Coverage
- **D. Security Posture**

Antwort: D

Begründung:

Security Posture

Description of the three major scorecards is seen in Security fabric > Security rating>Security posture.

Security Posture

Identify configuration weaknesses and best practice violations in your deployment.

Fabric Coverage

Identify in your overall network, where Security Fabric can enhance visibility and control. Optimization Optimize your fabric deployment.

The Security Posture scorecard is designed to identify configuration weaknesses and best practice violations in a network. It assesses the overall security stance of an organization's network infrastructure by evaluating how well it adheres to established security practices and configurations.

When using the Security Posture scorecard, the goal is to identify areas where the network configuration may be vulnerable or where best practices are not being followed. It helps organizations assess and improve their security posture by highlighting potential weaknesses and areas that require attention.

In contrast, the other options:

A: Fabric Coverage: Typically relates to the extent of coverage provided by a security fabric across an organization's network.

B: Automated Response: Focuses on the ability of the security system to automatically respond to security events or incidents.

D: Optimization: Generally refers to the efficiency and effectiveness of security measures in place.

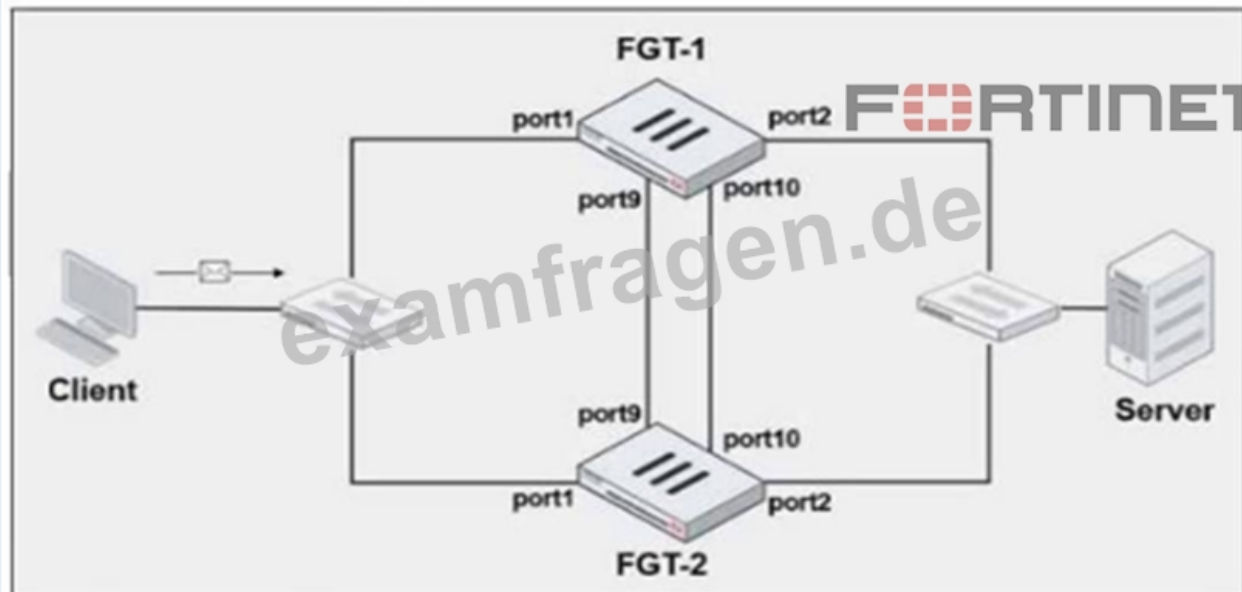

Therefore, for identifying configuration weaknesses and best practice violations, the Security Posture scorecard is the most relevant option.

22. Frage

Refer to the exhibits.

FortiGate HA cluster topology

Current HA status

```
# get system ha status
***
Configuration Status:
  FGVM010000064692(updated 4 seconds ago): in-sync
  FGVM010000064692 chksum dump: 13 8b 52 c7 59 2a 9a 5c 5f
  FGVM010000065036(updated 4 seconds ago): in-sync
  FGVM010000065036 chksum dump: 13 8b 52 c7 59 2a 9a 5c 5f
***
Primary      : FGT-1, FGVM010000064692, HA cluster index = 1
Secondary    : FGT-2, FGVM010000065036, HA cluster index = 0
number of vcluster: 1
vcluster 1: work 169.254.0.2
Primary: FGVM010000064692, HA operating index = 0
Secondary: FGVM010000065036, HA operating index = 1
```

New FortiGate HA configuration

FGT-1

```
#config system ha
  set group-id 3
  set group-name "Fortinet"
  set mode a-p
  set password *
  set hbdev "port9" 50 "port10" 50
  set session-pickup enable
  set override disable
  set priority 90
  set monitor port3
```

FGT-2

```
#config system ha
  set group-id 3
  set group-name "Fortinet"
  set mode a-p
  set password *
  set hbdev "port9" 50 "port10" 50
  set session-pickup enable
  set override enable
  set priority 110
  set monitor port3
```

FGT-1 and FGT-2 are updated with HA configuration commands shown in the exhibit.
What would be the expected outcome in the HA cluster?

- A. FGT-1 will synchronize the override disable setting with FGT-2.
- B. The HA cluster will become out of sync because the override setting must match on all HA members.
- C. FGT-2 will take over as the primary because it has the override enable setting and higher priority than FGT-1.
- D. FGT-1 will remain the primary because FGT-2 has lower priority.

Antwort: C

Begründung:

With the override setting enabled and a higher priority configured on FGT-2, it will preempt FGT-1 and become the primary unit in the HA cluster.

23. Frage

.....

Warum wählen viele Leute die Schulungsunterlagen zur Fortinet FCP_FGT_AD-7.4 Zertifizierungsprüfung von ExamFragen? Es gibt auch andere Websites, die Schulungsressourcen zur FCP_FGT_AD-7.4 Zertifizierungsprüfung bietet. Unser ExamFragen stellt Ihnen die echten Prüfungsmaterialien zur Verfügung. Unser Eliteteam, Zertifizierungsexperten, Techniker und berühmte Linguisten bearbeiten die neueste Fortinet FCP_FGT_AD-7.4 Zertifizierungsprüfung. Deshalb klicken Sie ExamFragen Website, wenn Sie die Fortinet FCP_FGT_AD-7.4 Zertifizierungsprüfung bestehen wollen. Mit ExamFragen können Sie Ihren Traum Schritt für Schritt verwirklichen.
