Fortinet FCP_FGT_AD-7.6 Latest Training | FCP_FGT_AD-7.6 Exam Discount Voucher

Do you want to pass the exam just for one time? If you do want choose our FCP_FGT_AD-7.6 exam dumps. The pass rate is 98%, and pass guarantee and money back guarantee if you fail to pass the exam. Besides we also have the free demo for you to try, before buying, it will help you to have a general idea of the FCP_FGT_AD-7.6 Exam Dumps. If you have any questions, please contact us directly, we will try our best to help you the problem, so don't hesitate to contact us.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q32-Q37):

NEW QUESTION # 32

You are analyzing connectivity problems caused by intermediate devices blocking traffic in SSL VPN environment. In which two ways can you effectively resolve the problem? (Choose two.)

- A. You should use IPsec to solve issues with fragment drops and large certificate exchanges.
- B. You can use SSL VPN tunnel mode to prevent problems with blocked ESP and UDP ports (500 or 4500).
- C. You can configure a hub-and-spoke topology with SSL VPN tunnels to bypass blocked UDP ports.
- D. You can turn off IKE fragmentation to fix large certificate negotiation problems.

Answer: B,D

Explanation:

Disabling IKE fragmentation helps resolve issues caused by intermediate devices blocking large fragmented packets during certificate negotiation.

Using SSL VPN tunnel mode encapsulates traffic over HTTPS, bypassing blocks on ESP and UDP ports commonly used by IPsec.

NEW QUESTION # 33

Which two statements about equal-cost multi-path (ECMP) configuration on FortiGate are true? (Choose two.)

- A. If SD-WAN is enabled, you control the load balancing algorithm with the parameter load-balance-mode.
- B. If SD-WAN is disabled, you can configure the parameter v4-ecmp-mode to volume-based.
- C. If SD-WAN is enabled, you can configure routes with unequal distance and priority values to be part of ECMP.
- D. If SD-WAN is disabled, you configure the load balancing algorithm in config system settings.

Answer: A,B

Explanation:

When SD-WAN is disabled, FortiGate supports volume-based ECMP mode via the v4-ecmp-mode parameter.

When SD-WAN is enabled, the load balancing algorithm is controlled by the load-balance-mode parameter within the SD-WAN configuration.

NEW QUESTION # 34

Refer to the exhibit.

As an administrator you have created an IPS profile, but it is not performing as expected. While testing you got the output as shown in the exhibit.

What could be the possible reason of the diagnose output shown in the exhibit?

- A. FortiGate entered into IPS fail open state.
- B. Administrator entered the command diagnose test application ipsmonitor 5.
- C. Administrator entered the command diagnose test application ipsmonitor 99.
- D. There is a no firewall policy configured with an IPS security profile.

Answer: D

Explanation:

The output shows the IPS engine count as 0, indicating no active IPS engines are running. This typically means no firewall policy is referencing the IPS security profile, so the IPS profile is not being applied or triggered.

NEW QUESTION # 35

Refer to the exhibits.

Network diagram

NAT IP pool configuration

Name	External IP Range	Type	ARP Reply
SNAT-Pool	100.65.0.49 - 100.65.0.49	Overload	Enabled
SNAT-Remote	100.65.0.149 - 100.65.0.149	Overload	Enabled
SNAT-Remote1	100.65.0.99 - 100.65.0.99	Overload	Enabled

Firewall policies

Policy	Source	Destination	Schedule	Service	Action	IP Pool	NAT
LAN (port4) → WAN (port2) 3							
TCP traffic (2)	all	BR1-FGT	always	ALL_TCP	ACCEPT	SNAT-Pool	NAT
PING traffic (3)	all	all	always	PING	ACCEPT	SNAT-Remote1	NAT
IGMP traffic (4)	all	all	always	IGMP	ACCEPT	SNAT-Remote	NAT

The exhibits show a diagram of a FortiGate device connected to the network, as well as the IP pool configuration and firewall policy objects.

The WAN (port2) interface has the IP address 100.65.0.101/24.

The LAN (port4) interface has the IP address 10.0.11.254/24.

Which IP address will be used to source NAT (SNAT) the traffic, if the user on HQ-PC-1 (10.0.11.50) pings the IP address of BR-FGT (100.65.1.111)

- A. 100.65.0.49
- B. 100.65.0.101
- C. 100.65.0.149
- D. 100.65.0.99

Answer: D

Explanation:

The ping traffic policy uses the IP pool named SNAT-Remote1, which has the external IP range 100.65.0.99.

Therefore, traffic matching this policy (ping from HQ-PC-1 to BR1-FGT) will use 100.65.0.99 for source NAT.

NEW QUESTION # 36

Refer to the exhibit, which shows a partial configuration from the remote authentication server.

Attribute	Value	Vendor	Actions
Fortinet-Group-Name	Training	Fortinet	

Why does the FortiGate administrator need this configuration?

- A. To authenticate only the Training user group.
- B. To set up a RADIUS server Secret.
- C. To authenticate and match the Training OU on the RADIUS server.
- D. To authenticate Any FortiGate user groups.

Answer: A

Explanation:

The Fortinet-Group-Name attribute is used to restrict authentication to users who belong specifically to the "Training" user group on the RADIUS server.

NEW QUESTION # 37

.....

With precious time passing away, many exam candidates are making progress with high speed and efficiency. You cannot lag behind and with our FCP_FGT_AD-7.6 practice materials, and your goals will be easier to fix. So stop idling away your precious time and begin your review with the help of our FCP_FGT_AD-7.6 practice materials as soon as possible. By using them, it will be your habitual act to learn something with efficiency. With the cumulative effort over the past years, our FCP_FGT_AD-7.6 practice materials have made great progress with passing rate up to 98 to 100 percent among the market.
