## FCP\_FMG\_AD-7.4 Certification Exam Infor - Latest FCP\_FMG\_AD-7.4 Test Format

For candidates who are going to attend the exam, passing the exam is a good wish. FCP\_FMG\_AD-7.4 exam torrent will help you to pass the exam just one time, and we are pass guaranteed and money back guaranteed if you fail the exam. We promise to refund all of your money if you fail the exam by using the FCP\_FMG\_AD-7.4 Exam Torrent, or if you have other exam to attend, we can also replace other 2 valid exam dumps for you, at the same time you can get the update version for FCP\_FMG\_AD-7.4 exam torrent. In addition, you can consult us if you have any questions.

## Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q10-Q15):

### NEW QUESTION # 10

What is the purpose of ADOM revisions?

- A. To save the current state of all policy packages and objects for an ADOM
- B. To save the FortiManager configuration in the System Checkpoints
- C. To save the current state of the whole ADOM
- D. To revert individual policy packages and device-level settings for a managed FortiGate

**Answer: A**

### NEW QUESTION # 11

Refer to the exhibit.

FortiManager script
FORTINET

Create New Script

Script Name

Routing

Comments

Type

CLI Script

Run script on

Device Database

Script details

Search...

1 config router prefix-list

2 edit public

3 config rule

4 edit 1

5 set prefix 0.0.0.0/0

6 set action permit

7 next

8 edit 2

9 set prefix 8.8.8.8/32

10 set action deny

11 end

Revert All Changes

Advanced Device Filters >

Which two results occur if the script is run using the Device Database option? (Choose two.)

- A. You must install these changes on a managed device using the Install Wizard.
- B. The script history shows successful installation of the script on the remote FortiGate device.
- C. The device Config Status is tagged as Modified.
- D. The successful execution of a script on the Device Database creates a new revision history.

**Answer: A,C**

Explanation:

If the script is run using the "Device Database" option on FortiManager, the following occurs:

- \* A. You must install these changes on a managed device using the Install Wizard.
- \* Running the script on the Device Database updates only the configuration in the FortiManager's database, not on the actual FortiGate device. To apply the changes, you need to use the Install Wizard to push these configurations to the managed device.
- \* D. The device Config Status is tagged as Modified.
- \* After running the script on the Device Database, FortiManager tags the device's configuration status as "Modified," indicating that there are pending changes that have not yet been installed on the device.

Options B and C are incorrect because:

- \* B suggests a new revision history is created, but this only happens when changes are actually installed on the managed device.
- \* C implies the script is directly executed on the FortiGate, which is not the case when using the Device Database option.

FortiManager References:

\* Refer to FortiManager 7.4 Administrator Guide: Scripting and Configuration Management.

## NEW QUESTION # 12

Which output is displayed right after moving the ISFW device from one ADOM to another?

- A.

```
FortiManager # diagnose dvm device list ISFW
--- There are currently 4 devices/vdoms managed ---
--- There are currently 4 devices/vdoms count for license ---

TYPE          OID    SN          HA      IP      NAME      ADOM      IPS      FIRMWARE
fmgfaz-managed 325    FGVM010000077646 -    10.0.1.200    ISFW      ADOM74    6.00741 (regular) 7.0 MR4 (2463)
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: installed; conn: up
|- vdom:[3]root flags:0 adom:ADOM74 pkg:[imported]ISFW
```

- B.

```
FortiManager # diagnose dvm device list ISFW
--- There are currently 4 devices/vdoms managed ---
--- There are currently 4 devices/vdoms count for license ---

TYPE          OID    SN          HA      IP      NAME      ADOM      IPS      FIRMWARE
fmgfaz-managed 325    FGVM010000077646 -    10.0.1.200    ISFW      ADOM74    6.00741 (regular) 7.0 MR4 (2463)
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: retrieved; conn: up
|- vdom:[3]root flags:0 adom:ADOM74 pkg:[unknown]ISFW
```

- C.

```
FortiManager # FortiManager # diagnose dvm device list ISFW
--- There are currently 4 devices/vdoms managed ---
--- There are currently 4 devices/vdoms count for license ---

TYPE          OID    SN          HA      IP      NAME      ADOM      IPS      FIRMWARE
fmgfaz-managed 325    FGVM010000077646 -    10.0.1.200    ISFW      ADOM74    6.00741 (regular) 7.0 MR4 (2463)
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: installed; conn: up
|- vdom:[3]root flags:0 adom:ADOM74 pkg:[never-installed]
```

- D.

```
FortiManager # diagnose dvm device list ISFW
--- There are currently 4 devices/vdoms managed ---
--- There are currently 4 devices/vdoms count for license ---

TYPE          OID    SN          HA      IP      NAME      ADOM      IPS      FIRMWARE
fmgfaz-managed 325    FGVM010000077646 -    10.0.1.200    ISFW      ADOM74    6.00741 (regular) 7.0 MR4 (2463)
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: autoupdated; conn: up
|- vdom:[3]root flags:1 adom:ADOM74 pkg:[out-of-sync]ISFW
```

**Answer: B**

Explanation:

When a FortiGate device, like the ISFW (Internal Segmentation Firewall), is moved from one ADOM to another in FortiManager, the status of the device in the new ADOM will temporarily show some level of inconsistency or unknown state until the ADOM fully syncs and integrates the device.

In the provided options, we are analyzing the FortiManager diagnose dvm device list output for the ISFW device.

Explanation of the Outputs:

\* Option A:

\* The output shows that the device has the following status:

\* dev-db: not modified

\* conf: in sync

\* cond: OK

\* dm: retrieved

\* The key part here is the pkg: [unknown]. This suggests that the configuration package for the ADOM in the new environment is still in an unknown state, which happens right after moving the device to a new ADOM. FortiManager needs time to process the device's configuration before syncing it properly.

\* Option B:

\* This output shows the pkg: [out-of-sync]. This occurs after some configuration mismatch is identified, but it is not the immediate output after moving a device to a new ADOM.

\* Option C:

\* This output shows pkg: [never-installed], which indicates that no package was ever installed on the device. This status typically appears when a device is newly added to FortiManager but not immediately after moving it between ADOMs.

\* Option D:

\* This output shows pkg: [imported], which indicates that the device configuration has been successfully imported into the new ADOM. This would occur after the device is fully synced, but not immediately after moving the device to a new ADOM.

Conclusion:

The output that is displayed immediately after moving the ISFW device from one ADOM to another is Option A, where the package status is still unknown (pkg: [unknown]) because FortiManager has not yet fully synchronized the device's configuration in the new ADOM.

### NEW QUESTION # 13

An administrator, Trainer, who is assigned the Super\_User profile, is trying to approve a workflow session that was submitted by another administrator, Student. However, Trainer is unable to approve the workflow session.

What can prevent an admin account that has Super\_User rights over the device from approving a workflow session?

- A. Trainer is not a part of workflow approval group.
- B. Trainer must close Student's workflow session before approving the request.
- C. Trainer must first create their own workflow session to approve student session.
- D. Trainer does not have full rights over this ADOM.

**Answer: A**

Explanation:

Even with Super\_User rights, the ability to approve workflow sessions typically requires membership in a specific workflow approval group. If Trainer is not part of this group, they will not be able to approve the workflow session.

### NEW QUESTION # 14

Which statement about the upgrade of ADOMs on FortiManager is true?

- A. You cannot import policies from a device until its FortiOS version matches the ADOM version.
- B. ADOMs using global objects can be upgraded before or after upgrading the global database ADOM.
- C. To ensure database consistency, you must upgrade an ADOM before you upgrade the devices in it.
- D. Upgrading the FortiManager version upgrades all existing ADOMs automatically.

**Answer: C**

Explanation:

\* Option A: To ensure database consistency, you must upgrade an ADOM before you upgrade the devices in it. This is the correct answer. When upgrading ADOMs on FortiManager, the ADOM must be upgraded first to match the FortiOS version of the devices it manages. This is necessary to ensure compatibility and consistency between the ADOM's database schema and the FortiGate's configuration.

Explanation of Incorrect Options:

\* Option B: Upgrading the FortiManager version upgrades all existing ADOMs automatically is incorrect because the ADOMs must be upgraded manually or individually after upgrading the FortiManager.

\* Option C: You cannot import policies from a device until its FortiOS version matches the ADOM version is incorrect because while version matching is important, it is not strictly necessary for policy import.

\* Option D: ADOMs using global objects can be upgraded before or after upgrading the global database ADOM is incorrect as the order of upgrade matters to maintain compatibility.

FortiManager References:

\* Refer to "FortiManager Upgrade Guide" for detailed procedures on upgrading ADOMs and devices.

### NEW QUESTION # 15

.....

Do you want to obtain the latest information for your exam timely? Then you can choose us, since we can do that for you. FCP\_FMG\_AD-7.4 study guide of us offers you free update for 365 days, so that you can get the latest information for the exam timely. And the latest version for FCP\_FMG\_AD-7.4 exam materials will be sent to your email automatically. In addition, FCP\_FMG\_AD-7.4 Exam Materials are compiled by experienced experts who are quite familiar with the exam center, therefore the quality can be guaranteed. We have online and offline service, and if you have any questions for FCP\_FMG\_AD-7.4 exam dumps, you can consult us.
