## Brilliant FCP\_FMG\_AD-7.4 Guide Materials: FCP - FortiManager 7.4 Administrator Display First-class Exam Braindumps - TestInsides

Now on the Internet, a lot of online learning platform management is not standard, some web information may include some viruses, cause far-reaching influence to pay end users and adverse effect. Choose the FCP\_FMG\_AD-7.4 Study Tool, can help users quickly analysis in the difficult point, high efficiency of review, and high quality through the FCP - FortiManager 7.4 Administrator exam, work for our future employment and increase the weight of the promotion, to better meet the needs of their own development.

## Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q25-Q30):

### NEW QUESTION # 25

Refer to the exhibit.

| FortiManager # diagnose fmupdate view-serverlist fds |                   |      |          |          |         |  |
|------------------------------------------------------|-------------------|------|----------|----------|---------|--|
| FortiGuard Server Comm : Enabled                     |                   |      |          |          |         |  |
| Server Override Mode : Strict                        |                   |      |          |          |         |  |
| FDS server list :                                    |                   |      |          |          |         |  |
| Index                                                | Address           | Port | TimeZone | Distance | Source  |  |
| *0                                                   | 10.0.1.50         | 8890 | -5       | 0        | CLI     |  |
| 1                                                    | 96.45.33.89       | 443  | -5       | 0        | FDNI    |  |
| 2                                                    | 96.45.32.81       | 443  | -5       | 0        | FDNI    |  |
| ...                                                  |                   |      |          |          |         |  |
| 9                                                    | fdsl.fortinet.com | 443  | -5       | 0        | DEFAULT |  |

How will FortiManager try to get updates for antivirus and IPS?

- A. From the default server fdsl.fortinet.com
- B. From the list of configured override servers or public FDN servers
- C. From the configured override server IP address 10.0.1.50 only
- D. From public FDNI server IP address with the fourth highest octet only

**Answer: C**

Explanation:

The exhibit shows that Server Override Mode is set to Strict, which means FortiManager will use only the override server specified at index 0 (in this case, the server with IP address 10.0.1.50 on port 8890) for updates. It will not attempt to use any other servers unless this server is unreachable.

### NEW QUESTION # 26

Push updates are failing on a FortiGate device that is located behind a NAT device. Which two settings should the administrator check? (Choose two.)

- A. That the virtual IP address and correct ports are set on the NAT device

- B. That the override server IP address is set on FortiManager and the NAT device
- C. That the NAT device IP address and correct ports are configured on FortiManager
- D. That the external IP address on the NAT device is set to DHCP and configured with the virtual IP

**Answer: A,B**

Explanation:

When push updates are failing on a FortiGate device behind a NAT device, the administrator should check:

- \* A. That the override server IP address is set on FortiManager and the NAT device.
- \* The override server IP should be configured to ensure that FortiManager uses the correct IP address that can traverse the NAT to reach the FortiGate device.
- \* D. That the virtual IP address and correct ports are set on the NAT device.
- \* The NAT device must have the correct virtual IP (VIP) configured to map the FortiGate's internal IP to an external address, along with the correct ports needed for communication.

Options B and C are incorrect because:

- \* B suggests setting the external IP on the NAT device to DHCP, which is not relevant to solving the push update issue.
- \* C implies configuring NAT device IP and ports on FortiManager, which is less likely needed compared to configuring the correct VIP and ports.

FortiManager References:

- \* Refer to FortiManager 7.4 Administrator Guide: Device Management and NAT Configuration.

### NEW QUESTION # 27

Refer to the exhibit. An administrator has created a firewall address object that is used in multiple policy packages for multiple FortiGate devices in an ADOM.

After the installation operation is performed, which IP/netmask will be installed on Local-FortiGate for the LOCAL\_SUBNET firewall address object?

**FortiManager address object**

The screenshot shows the 'Edit Address' configuration in FortiManager. The object is named 'LOCAL\_SUBNET' and is of type 'Subnet'. The IP/Netmask is '10.0.5.0/255.255.255.0'. The 'Interface' is set to 'any'. The 'Static Route Configuration' is disabled. The 'Per-Device Mapping' table shows a mapping for 'Local-FortiGate [root]' with IP/Netmask '192.168.1.0/255.255.255.0'.

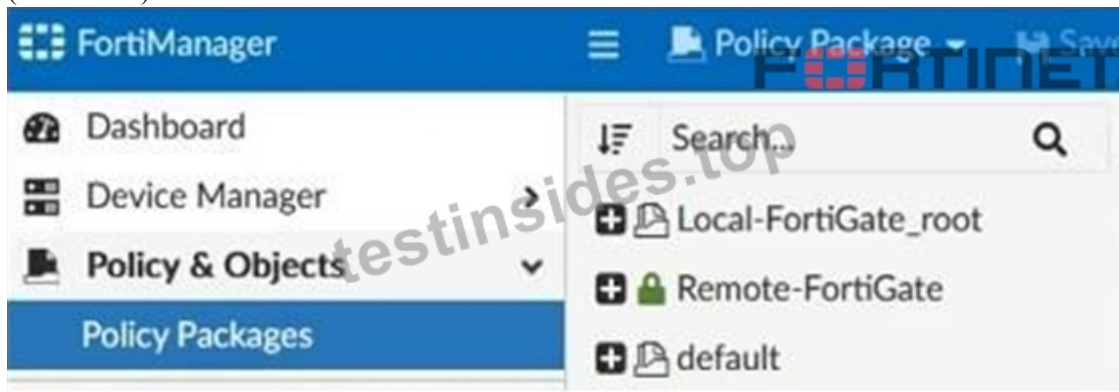

| Mapped Device                                   | Details                               |
|-------------------------------------------------|---------------------------------------|
| <input type="checkbox"/> Local-FortiGate [root] | IP/Netmask: 192.168.1.0/255.255.255.0 |

- A. 10.0.5.0/24
- B. It will create two firewall address objects on Local-FortiGate with 192.168.1.0/24 and 10.0.5.0/24 values.
- C. Local-FortiGate automatically chooses an IP/netmask based on its network interface settings.
- D. 192.168.1.0/24

**Answer: D**

### NEW QUESTION # 28

Refer to the exhibit. Given the configuration shown in the exhibit, which two statements are true?  
(Choose two.)

- A. FortiManager is in workflow mode.
- **B. The FortiManager ADOM workspace mode is set to Normal.**
- C. The FortiManager ADOM is locked by the administrator.
- **D. An administrator can also lock the Local-FortiGate\_root policy package.**

Answer: B,D

#### NEW QUESTION # 29

An administrator would like to review, approve, or reject all the firewall policy changes made by the junior administrators. How should the workspace mode settings be configured on FortiManager?

- **A. Set to workflow and using the ADOM locking feature**
- B. Set to workspace and using the policy locking feature
- C. Set to read/write and using the policy locking feature
- D. Set to normal and using the approval group feature

Answer: A

#### NEW QUESTION # 30

.....

Now Fortinet FCP\_FMG\_AD-7.4 certification test is very popular. Not having got FCP\_FMG\_AD-7.4 certificate, you must want to take the exam. Indeed, Fortinet FCP\_FMG\_AD-7.4 test is very difficult exam, but this is not suggested that you cannot get high marks and pass your exam with ease. Without knowing the shortcut of Fortinet FCP\_FMG\_AD-7.4 Exam, do you want to know the testing technique? As for the point, I can tell you that TestInsides Fortinet FCP\_FMG\_AD-7.4 study guide is your unique choice.
