Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which configuration setting for FortiGate is part of an ADOM-level database on FortiManager?

- A. SNMP
- B. Routing
- C. Security profiles
- D. NSX-T Service Template

Answer: C

Explanation:

Security profiles (such as antivirus, web filtering, application control, etc.) are stored in the ADOM-level database because they can be shared across multiple devices within the same ADOM.

NEW QUESTION # 41

An administrator created a new global policy package that includes header and footer policies and then assigned it to an ADOM. What are two outcomes of this action? (Choose two.)

- A. You can edit or delete all the global objects in the global ADOM.
- B. To assign another global policy package later to the same ADOM, you must unassign this policy first.
- C. After you assign the global policy package to an ADOM, the impacted policy packages become hidden in that ADOM.
- D. You must manually move the header and footer policies after the policy assignment.

Answer: A,B

Explanation:

* Option A: To assign another global policy package later to the same ADOM, you must unassign this policy first. This is correct. FortiManager does not allow multiple global policy packages to be assigned to a single ADOM simultaneously. If you want to assign a different global policy package, the existing one must be unassigned first.

* Option C: You can edit or delete all the global objects in the global ADOM. This is correct. Once a global policy package is assigned, you have the flexibility to edit or delete global objects in the global ADOM, affecting all ADOMs to which this package is assigned.

Explanation of Incorrect Options:

* Option B: After you assign the global policy package to an ADOM, the impacted policy packages become hidden in that ADOM is incorrect because the policy packages do not become hidden; they are modified according to the global policies.

* Option D: You must manually move the header and footer policies after the policy assignment is incorrect because header and footer policies are automatically applied when assigned.

* See the "Global Policy and ADOM Management" section in the FortiManager Administration Guide.

NEW QUESTION # 42

Refer to the exhibit. Given the configuration shown in the exhibit, what are two results from this configuration? (Choose two.)

```
FortiManager # config system global
(global)# set workspace-mode normal
(global)# end
FortiManager #
```

- A. Ungraceful closed sessions will keep the ADOM in a locked state until the administrator session times out.
- B. Unlocking an ADOM will submit configuration changes automatically to the approval administrator.
- C. Unlocking an ADOM will install configuration changes automatically on managed devices.
- D. The same administrator can lock more than one ADOM at the same time.

Answer: A,D
