It is known to us that the knowledge workers have been playing an increasingly important role all over the world, since we have to admit the fact that the FCP_FMG_AD-7.6 certification means a great deal to a lot of the people, especially these who want to change the present situation and get a better opportunity for development. Our FCP_FMG_AD-7.6 Exam Questions will help you make it to pass the FCP_FMG_AD-7.6 exam and get the certification for sure.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

| Topic	Details
Topic 1	• Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 2	• Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 3	• Troubleshooting
Topic 5	• Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.

Fortinet FCP_FMG_AD-7.6 Valid Test Cram | Free Download Exam FCP_FMG_AD-7.6 Blueprint: FCP - FortiManager 7.6 Administrator

More and more people choose Fortinet FCP_FMG_AD-7.6 exam. Because of its popularity, you can use the PDF4Test Fortinet FCP_FMG_AD-7.6 exam questions and answers to pass the exam. This will bring you great convenience and comfort. This is a practice test website. It is available on the Internet with the exam questions and answers, as we all know, PDF4Test is the professional website which provide Fortinet FCP_FMG_AD-7.6 Exam Questions And Answers.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q44-Q49):

NEW QUESTION # 44
Refer to the exhibits.

An administrator has been asked to install the same policies from a central policy package onto the BR1-FGT-1 firewall.
The administrator added BR1-FGT-1 as a target in the central policy package installation.
What should the administrator do when reinstalling the central policy package on the BR1-FGT-1 firewall?

- A. Import the policy package to change the unknown status and synchronize the policy package.
- B. First resolve the modified status in the configuration and provisioning templates to allow a smooth installation.
- C. Use the install wizard to install the central policy package on the BR1-FGT-1 firewall.
- D. Assign only one policy package to the firewall because FortiManager does not allow more than one policy package assigned per device at the same time.

Answer: C

Explanation:
Using the Install Wizard is the recommended method to reinstall the central policy package on the BR1-FGT-1 firewall, ensuring all settings, installation targets, and dependencies are correctly processed during installation.

NEW QUESTION # 45

An administrator configures a new BGP peer in the FortiManager device-level database of FortiGate. They reinstall the policy package to the managed FortiGate device without any errors. However, when the administrator logs in to FortiGate, they do not see the BGP configuration changes.

What is the most likely reason why FortiManager did not push the BGP peer changes to FortiGate?

- A. The administrator must use the Install Wizard and select Install device settings only to push BGP settings
- B. The FortiGate firmware version is different from the FortiManager ADOM version.
- C. The administrator must run a sanity check on FortiManager to make sure the database is not corrupted.
- D. Fortigate has a BGP template assigned on the FortiManager database.

Answer: D

Explanation:

If a BGP template is assigned to the FortiGate device on FortiManager, device-level BGP configurations made directly in the device-level database are overridden by the template settings, so the changes do not get pushed to the device.

NEW QUESTION # 46

An administrator has a FortiGate-HQ device with VDOMs-root, HR and Facilities, currently managed under the FortiManager ADOM-Site1. They try to move VDOM HR to the FortiManager ADOM-Site2, but it does not work.

Why is the administrator not able to move FortiGate-HQ VDOM HR to FortiManager ADOM-Site2?

- A. The administrator must have full access in the device layer of FortiGate-HQ VDOM-root before they can VDOMs to different ADOMs.
- B. The administrator must delete the FortiGate-HQ device from FortiManager and add it again using the Add Device wizard before moving the VDOM.
- C. FortiManager must be in ADOM normal mode, which does not allow VDOMs to be managed separately.
- D. The FortiGate-HQ must be managed under the FortiManager ADOM-root to allow moving its VDOMs to different ADOMs.

Answer: D

Explanation:

FortiGate devices must be managed under the FortiManager ADOM corresponding to the root VDOM to allow their individual VDOMs to be moved and managed in different ADOMs. Managing the root VDOM in a different ADOM prevents moving subordinate VDOMs across ADOMs.

NEW QUESTION # 47

An administrator wants to configure and manage multiple objects in the FortiManager database and give access to other users who work in the same database.

To stay in control of the changes made to firewall policies by other team members, the administrator needs a setup where all modifications go through a central check before they can be installed.

How can the administrator create this setup?

- A. Enable device lock and the advanced mode feature in the ADOM.
- B. Enable the prompt asking the administrator to accept firewall policies changes before saving.
- C. Enable workflow mode and the ADOM lock feature.
- D. Enable the workspace (for all ADOMs) to control all changes made by any administrator.

Answer: C

Explanation:

Enabling workflow mode along with the ADOM lock feature ensures that all configuration changes go through a centralized review and approval process before installation, allowing controlled and coordinated management of firewall policies by multiple administrators.

NEW QUESTION # 48

Refer to the exhibit. A junior administrator is troubleshooting a FortiManager connectivity issue that is occurring with a managed FortiGate device.

Given the FortiManager device manager settings shown in the exhibit, what can you conclude from this scenario?

- A. FortiManager lost internet connectivity, therefore, the device appears to be down.
- B. The administrator can reclaim the FortiGate to FortiManager protocol (FGFM) tunnel to get the device online.
- C. The administrator recently restored a FortiManager configuration file.
- D. The administrator must refresh the device to restore connectivity.

Answer: C

Explanation:
FMG is in offline mode, which is activated after restoring a configuration file.

NEW QUESTION # 49

......

As the rapid development of the world economy and intense competition in the international, the leading status of knowledge-based economy is established progressively. A lot of people are in pursuit of a good job, a FCP_FMG_AD-7.6 certification, and a higher standard of life. You just need little time to download and install it after you purchase, then you just need spend about 20~30 hours to learn it. We are glad that you are going to spare your precious time to have a look to our FCP_FMG_AD-7.6 Exam Guide.
