Pass4cram offers affordable FCP - FortiManager 7.6 Administrator exam preparation material. You don't have to go beyond your budget to buy Updated FCP_FMG_AD-7.6 Dumps. To make your FCP_FMG_AD-7.6 exam preparation material smooth, a bundle pack is also available that includes all the 3 formats of dumps questions. Pass4cram offers 365 days updates.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 2	Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 3	Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.

Topic 4	Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
Topic 5	Troubleshooting

Exam FCP_FMG_AD-7.6 Tests | FCP_FMG_AD-7.6 Latest Study Plan

In a rapidly growing world, it is immensely necessary to tag your potential with the best certifications, such as the FCP_FMG_AD-7.6 certification. But as you may be busy with your work or other matters, it is not easy for you to collect all the exam information and pick up the points for the FCP_FMG_AD-7.6 Exam. Our professional experts have done all the work for you with our FCP_FMG_AD-7.6 learning guide. You will pass the exam in the least time and with the least efforts.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q29-Q34):

NEW QUESTION # 29

Refer to the exhibits.

Device Revision Diff wizard

Device Revision Diff

Revision ID: 11		Revision ID: 9	
Total	12696	Total	12704
Deleted	0	Added	8
Modified	0	Modified	0

8500 end

8501 config user group
(...)

12154 set service "ALL"

12155 set comments "test"
(...)

8500 end
8501 config user local
8502 edit "Support"
8503 set type password
8504 set two-factor email
8505 set email-to "support@mail.com"
8506 next
8507 end
8508 config user group
(...)

12161 set service "ALL"
12162 set users "Support"
12163 set comments "test"
(...)

Save Diff as Script Show Full Diff Cancel

CLI output

```
FortiManager # diagnose dvm device list
--- There are currently 6 devices/vdoms managed ---
--- There are currently 6 devices/vdoms count for license ---

TYPE      OID  SN              HA  IP      NAME      ADOM  IPS      FIRMWARE  HW_GenX
fmgfaz-managed 188  FGVH02TM24013504 - 100.65.1.11 BR1-FGT-1 My_ADOM 7.0 MR6 (3401) N/A
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: installed; conn: up; template:[installed]default
|- vdom:[3]root flags:0 adom:My_ADOM pkg:[unknown]BR1-FGT-1
```

An administrator needed to recover all the configurations related to the user, Support. The configurations were saved in configuration revision ID 9.

The administrator reverted the configuration using the Configuration Revision History window and received the CLI output shown in the exhibit.

What can you conclude from the CLI output?

- A. The administrator needs to retrieve the device to correctly detect the FortiGate firmware version.

- B. The administrator installed only the device-level configuration.
- C. The administrator set the flag to 0 to prevent configuration overrides.
- D. The administrator reinstalled the policy package.

Answer: A

Explanation:

The CLI output shows the status "dev-db: not modified; conf: in sync; cond: OK; dnr installed," but the firmware version for the device is listed as "[unknown]." This indicates that FortiManager has not properly detected the FortiGate firmware version, likely because the device needs to be retrieved to update its information.

NEW QUESTION # 30

Refer to the exhibit. How will FortiManager try to get updates for antivirus and IPS?

```
FortiManager # diagnose fupdate view-serverlist fds
FortiGuard Server Comm : Enabled
Server Override Mode   : Strict
FDS server list       :
```

Index	Address	Port	TimeZone	Distance	Source
*0	10.0.1.50	8890	-5	0	CLI
1	96.45.33.89	443	-5	0	FDNI
2	96.45.32.81	443	-5	0	FDNI
...					
9	fds1.fortinet.com	443	-5	0	DEFAULT

- A. From the list of configured override servers or public FDN servers
- B. From the default server fds1.fortinet.com
- C. From public FDNI server IP address with the fourth highest octet only
- D. From the configured override server IP address 10.0.1.50 only

Answer: D

Explanation:

As the server override mode is strict, there is no fallback. FMG will communicate only with server configure in override server list.

NEW QUESTION # 31

Refer to the exhibit. An administrator is about to add the FortiGate device to FortiManager using the discovery process. FortiManager is operating behind a NAT device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

What is the expected result?

- A. During discovery, FortiManager uses only the FortiGate serial number to establish the connection.
- B. During discovery, FortiManager sets the FortiManager NATed IP address on FortiGate.
- C. During discovery, FortiManager sets both the FortiManager NATed IP address and NAT device IP address on FortiGate.
- D. During discovery, FortiManager sets the NATed device IP address on FortiGate.

Answer: B

Explanation:

You can configure the FortiManager NATed IP address on FortiGate under the central management configuration. This allows FortiGate to announce itself to FortiManager and try to re-establish the FGFM tunnel, if it is torn down. Configuring the FortiManager NATed IP address on FortiGate allows both FortiManager and FortiGate to re-establish the FGFM tunnel. Also, if you configure the FortiManager NATed IP address under the FortiManager system administrator settings, FortiManager sets this address on FortiGate during the discovery process.

NEW QUESTION # 32

What is the best explanation of how FortiManager helps with mass provisioning?

- A. It sends email alerts when new devices connect.
- B. It provides local FortiGuard Distribution Server (FDS) services to the network.
- C. It upgrades the OS of each FortiGate device.
- **D. It uses templates to configure the same settings on many devices simultaneously.**

Answer: D

Explanation:

FortiManager helps with mass provisioning by using templates that allow administrators to configure the same settings on multiple FortiGate devices simultaneously, streamlining deployment and management.

NEW QUESTION # 33

Refer to the exhibit. A junior administrator is troubleshooting a FortiManager connectivity issue that is occurring with a managed FortiGate device.

Given the FortiManager device manager settings shown in the exhibit, what can you conclude from this scenario?

Device Name	Config Status	Host Name	Policy Package Status	IP Address	Platform
ISFW	Unknown	ISFW	Never Installed	10.0.1.200	FortiGate-

- A. The administrator can reclaim the FortiGate to FortiManager protocol (FGFM) tunnel to get the device online.
- B. FortiManager lost internet connectivity, therefore, the device appears to be down.
- **C. The administrator recently restored a FortiManager configuration file.**
- D. The administrator must refresh the device to restore connectivity.

Answer: C

Explanation:

FMG is in offline mode, which is activated after restoring a configuration file.

NEW QUESTION # 34

.....

Our products are global, and you can purchase FCP_FMG_AD-7.6 training guide is wherever you are. Believe us, our FCP_FMG_AD-7.6 exam questions will not disappoint you. Our global users can prove our strength in this career. Just look at the hot hit on the website and you can see how popular our FCP_FMG_AD-7.6 Study Materials are.
