FCP_FMGMG_AD-7.6 Online

P.S. Free 2025 Fortinet FCP_FMGMG_AD-7.6 dumps are available on Google Drive shared by PassTestking:
https://drive.google.com/open?id=1mtBhdG6dEi0cXtKHdw1CmrTdDG_nQcr

Experts at PassTestking have also prepared Fortinet FCP_FMGMG_AD-7.6 practice exam software for your self-assessment. This is especially handy for preparation and revision. You will be provided with an examination environment and you will be presented with actual exam Fortinet FCP_FMGMG_AD-7.6 Exam Questions. This sort of preparation method enhances your knowledge which is crucial to excelling in the actual certification exam.

Fortinet FCP_FMGMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 2	<ul style="list-style-type: none">Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 3	<ul style="list-style-type: none">Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.
Topic 4	<ul style="list-style-type: none">Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 5	<ul style="list-style-type: none">Troubleshooting
Topic 6	<ul style="list-style-type: none">This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 7	<ul style="list-style-type: none">Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.

Exam FCP_FMGMG_AD-7.6 Online, FCP_FMGMG_AD-7.6 Study Reference

It is acknowledged that there are numerous FCP_FMGMG_AD-7.6 learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many FCP_FMGMG_AD-7.6 study materials by yourself. But since you have clicked into this website for FCP_FMGMG_AD-7.6 Practice Guide you need not to worry about that at all because our company is especially here for you to solve this problem. Trust us and you will get what you want!

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q14-Q19):

NEW QUESTION # 14

Refer to the exhibit. How will FortiManager try to get updates for antivirus and IPS?

FortiManager # diagnose fmupdate view-serverlist fds					
Fortiguard Server Comm : Enabled					
Server Override Mode : Strict					
FDS server list :					
Index	Address	Port	Timezone	Distance	Source
*0	10.0.1.50	8890	-5	0	CLI
1	96.45.33.89	443	-5	0	FDNI
2	96.45.32.81	443	-5	0	FDNI
...					
9	fds1.fortinet.com	443	-5	0	DEFAULT

- A. From public FDNI server IP address with the fourth highest octet only
- B. From the configured override server IP address 10.0.1.50 only
- C. From the default server fds1.fortinet.com
- D. From the list of configured override servers or public FDN servers

Answer: B

Explanation:

As the server override mode is strict, there is no fallback. FMG will communicate only with server configured in override server list.

NEW QUESTION # 15

A service provider administrator has assigned a global policy package to a managed customer ADOM named My_ADOM. The customer administrator has access only to My_ADOM.

How can the customer administrator edit the global header policy of the global policy package?

- A. The customer administrator can edit the header policy by using workflow mode on the global ADOM and My_ADOM.
- B. The customer administrator cannot edit the global header policy; only the service provider administrator can make changes from the global ADOM.
- C. The service provider administrator can unlock the global policy from the global ADOM to authorize changes to the customer administrator.
- D. The customer administrator can edit the header policy by using workspace mode on the global ADOM.

Answer: B

Explanation:

The global policy package is managed only from the global ADOM by the service provider administrator.

Customer administrators with access solely to their ADOM (My_ADOM) cannot edit the global header policy; such changes must be made by the service provider administrator in the global ADOM.

NEW QUESTION # 16

Refer to the exhibit. An administrator has created a firewall address object that is used in multiple policy packages for multiple FortiGate devices in an ADOM.

FortiManager address object

The screenshot shows the 'Edit Address - LAN' dialog and a 'Per-Device Mapping' table.

Edit Address - LAN Dialog:

- Category:** Address
- Name:** LAN
- Color:** Change
- Type:** Subnet
- IP/Netmask:** 172.16.5.0/255.255.255.0
- Interface:** any
- Static Route Configuration:** (checkbox)
- Comments:** (text area, 0/255)
- Add To Groups:** Click to select

Per-Device Mapping Table:

Mapped Device	Details
BR1-FGT-1 [root]	IP/Netmask: 10.10.10.5/255.255.255.255
HQ-NGFW-1 [root]	IP/Netmask: 172.16.5.20/255.255.255.255
Remote-Firewall [root]	IP/Netmask: 21.21.2.5/255.255.255.255

After the installation operation is performed, which IP/netmask will be installed on Remote- Firewall [VDOM1] for the LAN firewall address object?

- A. 10.10.10.5/255.255.255.255
- B. 172.16.5.20/255.255.255.255
- C. 21.21.2.5/255.255.255.255**
- D. 172.16.5.0/255.255.255.0

Answer: C

Explanation:

The per-device mapping overrides the global IP/netmask setting for the firewall address object.

For the device "Remote-Firewall," the mapped IP/netmask is 21.21.2.5/255.255.255.255, so this value will be installed on Remote-Firewall [VDOM1].

NEW QUESTION # 17

A service provider administrator has assigned a global policy package to a managed customer ADOM named My_ADOM. The customer administrator has access only to My_ADOM. How can the customer administrator edit the global header policy of the global policy package?

- A. The customer administrator can edit the header policy by using workflow mode on the global ADOM and My_ADOM.
- B. The customer administrator cannot edit the global header policy; only the service provider administrator can make changes from the global ADOM.**
- C. The service provider administrator can unlock the global policy from the global ADOM to authorize changes to the customer administrator.
- D. The customer administrator can edit the header policy by using workspace mode on the global ADOM.

Answer: B

Explanation:

The global policy package is managed only from the global ADOM by the service provider administrator. Customer administrators with access solely to their ADOM (My_ADOM) cannot edit the global header policy; such changes must be made by the service provider administrator in the global ADOM.

NEW QUESTION # 18

Refer to the exhibits.

Device Revision Diff wizard

Device Revision Diff

Revision ID: 11		Revision ID: 9	
Total	12696	Total	12704
Deleted	0	Added	8
Modified	0	Modified	0

8500 end

8501 config user local

8502 edit "Support"

8503 set type password

8504 set two-factor email

8505 set_email-to "support@mail.com"

8506 next

8507 end

8508 config user group

12154 set service "ALL"

12155 set comments "test"

12156 set users "Support"

12157 set comments "test"

Save Diff as Script Show Full Diff Cancel

FORTINET

CLI output

```
FortiManager # diagnose dvm device list
--- There are currently 6 devices/vdoms managed ---
--- There are currently 6 devices/vdoms count for license ---
TYPE          OID      SN      HA      IP      NAME      ADOM      IPS      FIRMWARE      HW_GenX
fmgfaz-managed 188      FGVM02TM24013504 - 100.65.1.111  BR1-FGT-1  My_ADOM  7.0 MR6 (3401)  N/A
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: installed; conn: up; template:[installed]default
|- vdom:[3]root flags:0 adom:My_ADOM pkgs:[unknown]BR1-FGT-1
```

FORTINET

An administrator needed to recover all the configurations related to the user, Support. The configurations were saved in configuration revision ID 9.

The administrator reverted the configuration using the Configuration Revision History window and received the CLI output shown in

the exhibit.

What can you conclude from the CLI output?

- A. The administrator needs to retrieve the device to correctly detect the FortiGate firmware version.
- B. The administrator set the flag to 0 to prevent configuration overrides.
- C. The administrator installed only the device-level configuration.
- D. The administrator reinstalled the policy package.

Answer: A

Explanation:

The CLI output shows the status "dev-db: not modified; conf in sync; cond: OK; dm installed," but the firmware version for the device is listed as "[unknown]." This indicates that FortiManager has not properly detected the FortiGate firmware version, likely because the device needs to be retrieved to update its information.

NEW QUESTION # 19

.....

As for Fortinet FCP_FMGMG_AD-7.6 Certification Training, PassTestking is the leader of candidates to provide FCP_FMGMG_AD-7.6 exam prep and FCP_FMGMG_AD-7.6 certification. PassTestking IT senior experts collate the braindumps, guarantee the quality! Any place can be easy to learn with pdf real questions and answers! After you purchase our products, we provide free update service for a year.
