

FCP_FMG_AD-7.6 Testing Center & Exam

FCP_FMG_AD-7.6 Questions Answers

Our FCP_FMG_AD-7.6 real exam is written by hundreds of experts, and you can rest assured that the contents of the FCP_FMG_AD-7.6 study materials are contained. After obtaining a large amount of first-hand information, our experts will continue to analyze and summarize and write the most comprehensive FCP_FMG_AD-7.6 learning questions possible. And at the same time, we always keep our questions and answers to the most accurate and the latest.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	• Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
Topic 2	• Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 3	• This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 4	• Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 6	• Troubleshooting

Three formats of Fortinet FCP_FMG_AD-7.6 practice exams meet the diverse needs

Adapt to the network society, otherwise, we will take the risk of being obsoleted. Our FCP_FMG_AD-7.6 qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working

environment. Our professional experts devote plenty of time and energy to developing the FCP_FMG_AD-7.6 Study Tool. You can trust us and let us be your honest cooperater in your future development. Here are several advantages about our FCP_FMG_AD-7.6 exam for your reference.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12

Refer to the exhibits. FortiGate HQ-NGFW-1 downloads and validates FortiGuard databases from FortiManager which acts as a local FortiGuard Distribution Server (FDS) in a closed network. An administrator pushes a new firewall policy with an intrusion prevention system (IPS) profile from FortiManager to FortiGate HQ- NGFW-1 However, FortiGate does not recognize the new IPS signature from FortiManager.

FortiGate GUI—FortiGuard

FortiGuard Distribution Network

Entitlement	Status
Advanced Malware Protection	Licensed (Expiration Date: 2027/10/10)
Attack Surface Security Rating	Licensed (Expiration Date: 2027/10/10)

FortiGate CLI—Central management

```

HQ-NGFW-1 (central-management) # sh
config system central-management
    set type fortimanager
    set allow-push-firmware disable
    set allow-remote-firmware-upgrade disable
    set serial-number "FMG-VMTM24012945"
    set fmg "::ffff:10.0.13.120"
    config server-list
        edit 1
            set server-type update
            set server-address 192.168.1.120
        next
    end
    set include-default-servers disable
end
  
```

What is the most likely reason why FortiGate HQ-NGFW-1 does not recognize the new IPS signature?

- A. The administrator must enable IPv6 connections for FortiGuard services on FortiManager.

- B. FortiGate must enable rating for the FortiManager IP address, 192.168.1.120, in server list 1.
- C. The administrator must enable the fortiguard-anycast option to correctly download all signatures from the local FDS.
- D. FortiManager and FortiGate have different IPS database versions.

Answer: D

Explanation:

The most likely reason FortiGate HQ-NGFW-1 does not recognize the new IPS signature is that FortiManager and FortiGate have different IPS database versions. The FortiManager may have pushed a signature update that FortiGate has not yet synchronized or validated locally, causing the signature to be unrecognized.

NEW QUESTION # 13

Refer to the exhibit. A junior administrator is troubleshooting a FortiManager connectivity issue that is occurring with a managed FortiGate device.

Given the FortiManager device manager settings shown in the exhibit, what can you conclude from this scenario?

Device Name	Config Status	Host Name	Policy Package Status	IP Address	Platform
ISFW	Unknown	ISFW	Never Installed	10.0.1.200	FortiGate

- A. The administrator recently restored a FortiManager configuration file.
- B. The administrator must refresh the device to restore connectivity.
- C. The administrator can reclaim the FortiGate to FortiManager protocol (FGFM) tunnel to get the device online.
- D. FortiManager lost internet connectivity, therefore, the device appears to be down.

Answer: A

Explanation:

FMG is in offline mode, which is activated after restoring a configuration file.

NEW QUESTION # 14

What is the purpose of ADOM revisions?

- A. ADOM revisions find unused, duplicate, and unnecessary firewall policies and objects.
- B. ADOM revisions compare previous snapshots of the Policy Package and ADOM-level objects with the device-level database.
- C. ADOM revisions show specific changes in a policy package when it is installed.
- D. ADOM revisions save the current state of all policy packages and objects for an ADOM.

Answer: D

Explanation:

ADOM revisions save the current state of all policy packages and objects within an ADOM, allowing administrators to track changes over time and revert to previous configurations if needed.

NEW QUESTION # 15

Which two items does an FGFM keepalive message include? (Choose two.)

- A. FortiGate configuration checksum
- B. FortiGate uptime
- C. FortiGate IPS version
- D. FortiGate license information

Answer: A,C

Explanation:

Keepalive messages, including the configuration checksums, are sent from FortiGate at configured intervals.

The messages also show the intrusion prevention system (IPS) version of the FortiGate device.

NEW QUESTION # 16

Refer to the exhibit. FortiManager is operating behind a network address translation (NAT) device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

What is the expected result during discovery?

- A. FortiManager sets both the 100.65.0.120 IP address and 100.65.0.101 IP address on FortiGate.
- B. FortiManager sets the 100.65.0.120 IP address on FortiGate.
- C. FortiManager sets both the 100.65.0.120 IP address and 10.0.13.120 IP address on FortiGate.
- D. FortiManager sets the 100.65.0.101 IP address on FortiGate.

Answer: B

Explanation:

When FortiManager is behind a NAT device, setting the NATed IP address (100.65.0.120) in the system admin settings causes FortiManager to use that NATed IP address for communication and configuration with FortiGate during discovery and management operations.
