

FCP_FWB_AD-7.4 Latest Exam Pass4sure - Pass Guaranteed 2025 Fortinet FCP_FWB_AD-7.4 First-grade Latest Demo

BONUS!!! Download part of GuideTorrent FCP_FWB_AD-7.4 dumps for free: <https://drive.google.com/open?id=1igTIEN8kqMXwJGqS93XmaovNH8e7HJ2>

You must be attracted by the APP online version of our FCP_FWB_AD-7.4 exam questions, which is unlike other exam materials that are available on the market, study torrent specially proposed different version to allow you to learn not on paper, but to use on all kinds of electronic devices such as IPAD, mobile phones or laptop to learn. This greatly improves the students' availability of fragmented time. You can also have a quite enjoyable experience with APP online version of our FCP_FWB_AD-7.4 Study Materials. Just have a try on this version of our FCP_FWB_AD-7.4 learning guide!

Fortinet FCP_FWB_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	Machine Learning (ML): This section tests the skills of Application Security Engineers in leveraging machine learning to enhance web application security. Candidates will configure machine learning algorithms to detect anomalies, mitigate bot-based threats, and secure APIs through AI-driven analysis. Understanding how to fine-tune these ML-based security measures is crucial for ensuring robust application protection against evolving cyber threats.
Topic 2	Encryption, Authentication, and Compliance: This section of the exam assesses the expertise of Security Analysts in mitigating web application vulnerabilities through encryption and authentication mechanisms. Candidates must configure various access control methods, track user authentication, and prevent attacks targeting authentication systems. They must also implement SSL inspection and offloading techniques to enhance security and troubleshoot encryption or authentication-related issues effectively.
Topic 3	Deployment and Configuration: This section of the exam measures the skills of Network Security Engineers and covers the ability to identify FortiWeb deployment requirements and configure essential system settings. Candidates are expected to set up server pools, security policies, and protected hostnames to ensure seamless deployment. To maintain operational efficiency, they must also configure FortiWeb high availability (HA) for fault tolerance and troubleshoot deployment or system-related issues.
Topic 4	Web Application Security: This domain evaluates the ability of Cybersecurity Specialists to implement advanced threat mitigation strategies using FortiWeb. Candidates must configure the system to block known attacks, ensure comprehensive web application protection, and troubleshoot threat detection or mitigation-related issues. Additionally, they are expected to set up API protection mechanisms to secure web-based interactions from potential threats.

Pass Guaranteed Quiz 2025 Pass-Sure Fortinet FCP_FWB_AD-7.4 Latest Exam Pass4sure

With the rapid development of the world economy and frequent contacts between different countries, looking for a good job has become more and more difficult for all the people. So it is very necessary for you to get the FCP_FWB_AD-7.4 certification, in order to look for a good job, you have to increase your competitive advantage in the labor market and make yourself distinguished from other job-seekers. And our FCP_FWB_AD-7.4 Exam Questions are specially designed for you as we can help you pass the FCP_FWB_AD-7.4 exam successfully with the least time and effort. Just come and buy our FCP_FWB_AD-7.4 practice guide!

Fortinet FCP - FortiWeb 7.4 Administrator Sample Questions (Q54-Q59):

NEW QUESTION # 54

What is a common technique to mitigate Cross-Site Scripting (XSS) attacks in web applications?

- A. Input validation and escaping
- B. Captcha verification for login forms
- C. SSL/TLS encryption
- D. Encryption of user passwords

Answer: A

NEW QUESTION # 55

What must you configure on FortiWeb to prevent cross-origin resource sharing (CORS) attacks?

- A. Configure a CORS parameter in DNS.
- B. Disable CORS in the web protection profile.
- C. Configure an allowed origin domain.
- D. Blocklist client IP addresses.

Answer: C

NEW QUESTION # 56

When configuring protected hostnames in FortiWeb, what is their primary purpose?

- A. Defining NAT policies
- B. Redirecting traffic to a specific URL
- C. Identifying internal network resources
- D. Blocking outgoing traffic

Answer: C

NEW QUESTION # 57

Which three security features must you configure on FortiWeb to protect API connections? (Choose three.)

- A. Single sign-on (SSO) authentication with Active Directory (AD)
- B. API user key enforcement
- C. Machine learning (ML)-based API protection
- D. API schema validation
- E. API user authentication with SAML

Answer: B,C,D

Explanation:

Machine learning (ML)-based API protection: ML-based API protection helps detect and mitigate abnormal behavior in API traffic,

such as bot attacks or abuse, by learning and adapting to normal traffic patterns.

API schema validation: API schema validation ensures that the API requests conform to the defined schema (e.g., checking the structure, fields, and types in the API calls). This helps prevent attacks like XML or JSON injection by ensuring only valid requests are processed.

API user key enforcement: Enforcing API user key authentication requires clients to provide valid API keys, ensuring only authorized users can access the API. This is crucial for controlling access to the API.

NEW QUESTION # 58

Refer to the exhibit.

Model Settings | Model Status

Edit Model Settings

Sampling Settings

- Client Identification Method: IP and User-Agent
- Sampling Time per Vector: 5 Minutes (1 – 10)
- Sample Count per Client per Hour: 3 (1 – 60)
- Sample Count: 1000 (10 – 10000)

Model Building Settings

- Model Type: Moderate

Anomaly Detection Settings

- Anomaly Count: 3 (1 – 65535)
- Bot Confirmation: ☐
- Dynamically Update Model: ☒

Action Settings

- Action: Deny (no log)
- Block Period: 60 Seconds (1 – 3600)
- Severity: High
- Trigger Policy: Please Select

Many legitimate users are being identified as bots. FortiWeb bot detection has been configured with the settings shown in the exhibit. The FortiWeb administrator has already verified that the current model is accurate.

What can the administrator do to fix this problem, making sure that real bots are not allowed through FortiWeb?

- A. Enable Bot Confirmation
- B. Change Model Type to Strict
- C. Change Action under Action Settings to Alert
- D. Disable Dynamically Update Model

Answer: A

NEW QUESTION # 59
