

# FCP\_FWB\_AD-7.4 Valid Test Duration & FCP\_FWB\_AD-7.4 PDF Dumps Files

BONUS!!! Download part of SureTorrent FCP\_FWB\_AD-7.4 dumps for free: <https://drive.google.com/open?id=1dCVB1Lb8Yny3IWinCVpQbk2vC6nPeRV>

Dear, hurry up to get the 100% pass FCP\_FWB\_AD-7.4 exam study dumps for your preparation. You will get original questions and verified answers for the Fortinet certification. After purchase of the FCP\_FWB\_AD-7.4 exam dumps, you can instant download the FCP\_FWB\_AD-7.4 practice torrent and start your study with no time wasted. The validity and useful FCP\_FWB\_AD-7.4 will clear your doubts which will be in the actual test. When you prepare well with our FCP\_FWB\_AD-7.4 pdf cram, the 100% pass will be easy thing.

## Fortinet FCP\_FWB\_AD-7.4 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"> <li>Encryption, Authentication, and Compliance: This section of the exam assesses the expertise of Security Analysts in mitigating web application vulnerabilities through encryption and authentication mechanisms. Candidates must configure various access control methods, track user authentication, and prevent attacks targeting authentication systems. They must also implement SSL inspection and offloading techniques to enhance security and troubleshoot encryption or authentication-related issues effectively.</li> </ul> |
| Topic 2 | <ul style="list-style-type: none"> <li>Deployment and Configuration: This section of the exam measures the skills of Network Security Engineers and covers the ability to identify FortiWeb deployment requirements and configure essential system settings. Candidates are expected to set up server pools, security policies, and protected hostnames to ensure seamless deployment. To maintain operational efficiency, they must also configure FortiWeb high availability (HA) for fault tolerance and troubleshoot deployment or system-related issues.</li> </ul>      |
| Topic 3 | <ul style="list-style-type: none"> <li>Machine Learning (ML): This section tests the skills of Application Security Engineers in leveraging machine learning to enhance web application security. Candidates will configure machine learning algorithms to detect anomalies, mitigate bot-based threats, and secure APIs through AI-driven analysis. Understanding how to fine-tune these ML-based security measures is crucial for ensuring robust application protection against evolving cyber threats.</li> </ul>                                                         |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 4 | <ul style="list-style-type: none"> <li>• <b>Web Application Security:</b> This domain evaluates the ability of Cybersecurity Specialists to implement advanced threat mitigation strategies using FortiWeb. Candidates must configure the system to block known attacks, ensure comprehensive web application protection, and troubleshoot threat detection or mitigation-related issues. Additionally, they are expected to set up API protection mechanisms to secure web-based interactions from potential threats.</li> </ul> |

## Three Easy and User-Friendly SureTorrent Fortinet FCP\_FWB\_AD-7.4 Exam Question Formats

We have designed a chat window below the web page. Once you want to ask some questions about the FCP\_FWB\_AD-7.4 training engine, you can click the little window. Then you just need to click the buttons after writing your email address and your questions about the FCP\_FWB\_AD-7.4 Exam Questions. Our back operation system will soon receive your email; then you will get a quick feedback on the FCP\_FWB\_AD-7.4 practice braindumps from our online workers.

## Fortinet FCP - FortiWeb 7.4 Administrator Sample Questions (Q112-Q117):

### NEW QUESTION # 112

Review the following FortiWeb CLI command: diagnose network sniffer port3 none 6 When you use this command, what is the result?

- **A. It shows the interface name in the output.**
- B. It displays six packets before ending.
- C. It displays the MACaddress of packets.
- D. It shows only TCP packets.

**Answer: A**

### NEW QUESTION # 113

Review the following configuration:

```
config waf machine-learning-policy
edit 1
set sample-limit-by-ip 0
next
end
```

What is the expected result of this configuration setting?

- A. When machine learning (ML) is in its collecting phase, FortiWeb will not accept any samples from any source IP addresses.
- **B. When machine learning (ML) is in its collecting phase, FortiWeb will accept an unlimited number of samples from the same source IP address.**
- C. When machine learning (ML) is in its running phase, FortiWeb will accept a set number of samples from the same source IP address.
- D. When machine learning (ML) is in its running phase, FortiWeb will accept an unlimited number of samples from the same source IP address.

**Answer: B**

### NEW QUESTION # 114

When configuring HTTP content routing, which factors should be considered for routing decisions?

(Select all that apply)

- **A. HTTP request method**
- B. Destination port number

- C. User-agent header
- D. Source IP address

Answer: A,C

#### NEW QUESTION # 115

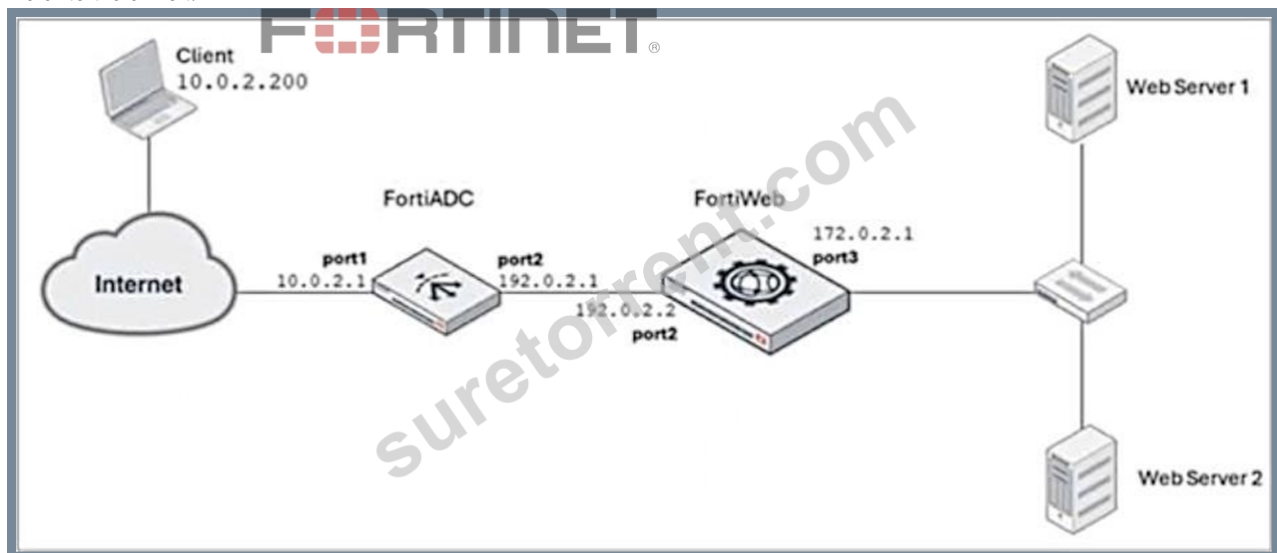

What must you do with your FortiWeb logs to ensure PCI DSS compliance?

- A. Store in an off-site location
- B. Enable masking of sensitive data
- C. Erase them every two weeks
- D. Compress them into a .zip file format

Answer: B

#### NEW QUESTION # 116

Refer to the exhibit.

FortiADC is applying SNAT to all inbound traffic going to the servers.

When an attack occurs, FortiWeb blocks traffic based on the 192.0.2.1 source IP address, which belongs to FortiADC. This setup is breaking all connectivity and genuine clients are not able to access the servers.

What can the administrator do to avoid this problem? (Choose two.)

- A. No special configuration is required; connectivity will be re-established for all clients after the set timeout.
- B. Enable and configure the Use X-Forwarded-For setting on FortiWeb.
- C. Enable and configure the Preserve Client IP setting on the client.
- D. Place FortiWeb in front of FortiADC.

Answer: B,D

Explanation:

Place FortiWeb in front of FortiADC: This configuration change places FortiWeb between the client and FortiADC, so that FortiWeb can directly inspect and protect the incoming traffic before FortiADC applies SNAT (Source Network Address Translation). By placing FortiWeb in front, it will have access to the real client IP addresses, and it will be able to properly identify and handle attack traffic without blocking legitimate client traffic.

Enable and configure the Use X-Forwarded-For setting on FortiWeb: This setting allows FortiWeb to extract the original client IP address from the X-Forwarded-For header in the HTTP request, which is inserted by FortiADC when performing SNAT. With this setting enabled, FortiWeb will be able to block traffic based on the original client IP address rather than the SNATed IP address (192.0.2.1), preserving the accuracy of the security measures.

#### NEW QUESTION # 117

In fact, in real life, we often use performance of high and low to measure a person's level of high or low, when we choose to find a good job, there is important to get the FCP\_FWB\_AD-7.4 certification as you can. Our product is elaborately composed with major questions and answers. We are choosing the key from past materials to finish our FCP\_FWB\_AD-7.4 Guide question. It only takes you 20 hours to 30 hours to do the practice. After your effective practice, you can master the examination point from the FCP FWB AD-7.4 test question. Then, you will have enough confidence to pass it.
