Our FCP_ZCS_AD-7.4 study materials are constantly improving themselves. We keep updating them to be the latest and accurate. And we apply the latest technologies to let them applied to the electronic devices. If you have any good ideas, our FCP_ZCS_AD-7.4 Exam Questions are very happy to accept them. FCP_ZCS_AD-7.4 learning braindumps are looking forward to having more partners to join this family. We will progress together and become better ourselves.

A lot of things can't be tried before buying or the product trail will charge a certain fee, but our FCP_ZCS_AD-7.4 exam questions are very different, you can try it free before you buy it. It's like buying clothes, you only know if it is right for you when you try it on. In the same way, in order to really think about our customers, we offer a free trial version of our FCP_ZCS_AD-7.4 study prep for you, so everyone has the opportunity to experience a free trial version of our FCP_ZCS_AD-7.4 learning materials.

Free PDF Fortinet - FCP_ZCS_AD-7.4 - Latest FCP - Azure Cloud Security 7.4 Administrator Valid Exam Topics

The ExamsTorrent offers latest FCP - Azure Cloud Security 7.4 Administrator FCP_ZCS_AD-7.4 exam questions and answers, with Fortinet FCP_ZCS_AD-7.4 exam practice test questions you can ace your Fortinet FCP_ZCS_AD-7.4 exam preparation simply and quickly and pass the final FCP_ZCS_AD-7.4 Exam easily. The Fortinet FCP_ZCS_AD-7.4 exam practice test questions will assist you in Fortinet FCP_ZCS_AD-7.4 exam preparation.

Fortinet FCP_ZCS_AD-7.4 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	VPN Solutions in Azure: This section of the exam measures skills of a Network Security Engineer and addresses secure connectivity between Azure and on-premises environments. Candidates will review the different site-to-site VPN options available in Azure, configure tunnels between FortiGate devices and Azure VPN gateways, and understand how Azure Virtual WAN enhances global connectivity.
Topic 2	Azure Virtual WAN: This section of the exam measures skills of a Cloud Engineer and explains the concept and deployment of Azure Virtual WAN. It focuses on building large-scale, optimized, and automated branch connectivity with Azure regions and services using virtual WAN hubs, improving cloud-based networking efficiency and scalability.
Topic 3	Fortinet Product Deployment: This section of the exam measures skills of a Network Security Engineer and covers the implementation of Fortinet products within Azure environments. The topics include deploying individual FortiWeb and FortiGate instances, integrating FortiGate with Azure's software-defined networking, and applying best practices for secure and efficient deployments of Fortinet solutions in the cloud.
Topic 4	High Availability (HA): This section of the exam measures skills of a Network Security Engineer and focuses on maintaining system resilience within Azure. Candidates are required to demonstrate knowledge of setting up FortiGate-based high availability in Azure, configuring Azure-native load balancing, and implementing autoscaling features to ensure continuous service availability and optimal performance.
Topic 5	Azure Route Server Concepts: This section of the exam measures skills of a Cloud Engineer and covers the basics of Azure Route Server. The focus is on understanding what the Azure Route Server is, how it functions within a virtual network, and how it simplifies the management of dynamic routing by automating route exchange with network virtual appliances.
Topic 6	Azure Public Cloud Concepts: This section of the exam measures skills of a Cloud Engineer and covers foundational knowledge of public cloud computing, with a focus on Azure. Candidates are expected to understand core cloud concepts and how Azure implements them through services such as compute, storage, and networking. It also includes basic elements of Azure networking and built-in security services that support cloud-native operations.

Fortinet FCP - Azure Cloud Security 7.4 Administrator Sample Questions (Q21-Q26):

NEW QUESTION # 21

What is a key advantage of the branch-to-hub to hub-to-branch topology in an Azure virtual WAN?

- A. Load balancing enabled by the simultaneous connection of each branch to multiple hubs
- B. Enhanced scalability enables communication between branch offices
- C. Improved branch-to-branch communication for faster data transfer
- D. Increased security through isolated connections between branches and hubs

Answer: C

Explanation:

The branch-to-hub to hub-to-branch topology in Azure Virtual WAN enables efficient branch-to-branch communication by routing traffic through connected hubs. This improves data transfer speed and reliability between branches without needing direct connections between all sites, simplifying management while maintaining performance.

NEW QUESTION # 22

How does FortiGate enhance network security when integrated with Azure SDN?

Response:

- A. By enforcing security policies across virtual networks
- B. By managing virtual machine backups
- C. By optimizing web traffic

- D. By providing endpoint security to Azure applications

Answer: A

NEW QUESTION # 23

When you deploy a single FortiGate VM using the available template from the Azure Marketplace, several other resources are also created.

Which two resources, among others, are created during the process? (Choose two.)

- A. Two virtual NICs
- B. One VM Scale set
- C. One NSG for each interface
- D. One new route table

Answer: A,C

Explanation:

Two virtual NICs - The FortiGate Azure Marketplace template deploys the VM with at least two network interfaces: one for the external/public interface and one for the internal/private interface.

One NSG for each interface - The deployment creates separate Network Security Groups (NSGs) attached to each NIC to control inbound and outbound traffic as per Fortinet's best practices.

NEW QUESTION # 24

Which Azure feature enables an organization (tenant) to manage and secure users, groups, and permissions within a single domain?

Response:

- A. Azure Active Directory B2C
- B. Azure Microsoft Entra ID
- C. Azure Kubernetes Service (AKS)
- D. Azure Cosmos DB

Answer: B

NEW QUESTION # 25

You deployed a FortiGate active-active with ELB/ILB solution using the template from Azure Marketplace.

What is the purpose of the inbound NAT rules configured in the external load balancer in this deployment?

- A. To load balance the incoming traffic between both FortiGate VMs
- B. To allow administrative access to the FortiGate VMs
- C. To forward the health probes to both FortiGate VMs
- D. To filter inbound traffic before it reaches the FortiGate instances

Answer: B

Explanation:

In an active-active FortiGate ELB/ILB deployment, the inbound NAT rules configured on the external load balancer are used to allow administrative access (e.g., HTTPS, SSH) to the individual FortiGate VMs. Since the public IP is associated with the load balancer, NAT rules are required to map specific ports to backend FortiGate instances for management access.

NEW QUESTION # 26

.....

It is an incredible opportunity among all candidates fighting for the desirable exam outcome to have our FCP_ZCS_AD-7.4 practice materials. With the help of our hardworking experts, our FCP_ZCS_AD-7.4 exam braindumps have been on the front-front of this industry and help exam candidates around the world win in valuable time. With years of experience dealing with exam, they have thorough grasp of knowledge which appears clearly in our FCP_ZCS_AD-7.4 Actual Exam. To choose us is to choose success!
