Exam Fortinet FCSS_ADA_AR-6.7 Reviews, Printable FCSS_ADA_AR-6.7 PDF

The modern world is becoming more and more competitive and if you are not ready for it then you will be not more valuable for job providers. Be smart in your career decision and enroll in FCSS—Advanced Analytics 6.7 Architect FCSS_ADA_AR-6.7 Certification Exam and learn new and in demands skills. Dumpexams with FCSS—Advanced Analytics 6.7 Architect FCSS_ADA_AR-6.7 exam questions and answers.

Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q54-Q59):

NEW QUESTION # 54
Refer to the exhibit.
	Hour Of Day	Host IP	Host Name	Min CPU Util	AVG CPU Util	Max CPU Util	Std Dev CPU Util	numPoints
Daily DB ···▼	9	1.1.1.1	ServerA	33.50	33.50	33.50	0	1
	10	1.1.1.1	ServerA	37.06	37.06	37.06	0	1
	11	1.1.1.1	ServerA	40.12	40.12	40.12	0	1
	12	1.1.1.1	ServerA	45.96	45.96	45.96	0	1

	Hour Of Day	Host IP	Host Name	Min CPU Util	AVG CPU Util	Max CPU Util	Std Dev CPU Util	numPoints
Profile DB	9	1.1.1.1	ServerA	32.31	32.31	32.31	0	1

The profile database contains CPU utilization values from day one. At midnight on the second day, the CPU utilization values from the daily database will be merged with the profile database.

In the profile database, in the Hour of Day column where 9 is the value, what will be the updated minimum, maximum, and average CPU utilization values?

- A. Min CPU Util=32.31, Max CPU Util=33.50 and AVG CPU Util=32.67
- B. Min CPU Util=32.31, Max CPU Util=33.50 and AVG CPU Util=33.50
- C. Min CPU Util=32.31, Max CPU Util=32.31 and AVG CPU Util=32.31
- D. Min CPU Util=33.50, Max CPU Util=33.50 and AVG CPU Util=33.50

Answer: A

NEW QUESTION # 55

Why can collectors not be defined before the worker upload address is set on the supervisor?

- A. Collectors receive the worker upload address during the registration process
- B. To ensure that the service provider has deployed a NFS server
- C. Collectors can only upload data to a worker, and the supervisor is not a worker
- D. To ensure that the service provider has deployed at least one worker along with a supervisor

Answer: A

Explanation:
In FortiSIEM, collectors must know where to upload event data. During registration, the supervisor provides the collector with the worker upload address.
The worker upload address tells the collector where to send logs after collection. If no worker upload address is set, the collector has no destination for its data, preventing proper registration.

NEW QUESTION # 56

What happens to UEBA events when a user is off-net?

- A. The agent will upload the events to the Worker if it cannot upload them to a FortiSIEM collector
- B. The agent will drop the events if it cannot upload them to a FortiSIEM collector
- C. The agent will upload the events the events to the Supervisor if it cannot upload them to a FortiSIEM collector
- D. The agent will cache events locally if it cannot upload them to a FortiSIEM collector

Answer: D

Explanation:
When a User and Entity Behavior Analytics (UEBA) agent is off-net, meaning it is disconnected from the network and cannot reach the FortiSIEM collector, it temporarily stores (caches) events locally until it can re- establish a connection.
This caching mechanism prevents data loss by ensuring events are retained even when the agent is offline.
Once the connection to the FortiSIEM collector is restored, the agent uploads the cached events.
This ensures continuity in user behavior monitoring, even when users are disconnected.

NEW QUESTION # 57
Refer to the exhibit.

Name	IP	Device Type	Status	Discovered	Method	Agent Policy	Agent Status	Monitor Status	Event Status
FortiBank_Collector	10.10.2.64	Generic Unix	Pending	Oct 28, 2021, 12:52:54 PM	LOG				Warning
fortibanked.fortibankmet	10.10.2.63	Windows	Pending	Oct 28, 2021, 02:48:42 PM	AGENT		Running inactive		

What are three possible reasons why the Agent Status displays Running Inactive? (Choose three.)

- A. The template was removed
- B. The collector was not assigned to the agent
- C. The template was not assigned
- D. The agent is temporarily down
- E. The agent was registered incorrectly

Answer: C,D,E

Explanation:
In FortiSIEM, an agent's status of "Running Inactive" indicates that the agent is installed and running but not actively sending data or has encountered a misconfiguration. The following reasons can cause this status:
1. The agent was registered incorrectly
If an agent was not registered properly, it might not establish a proper connection with the FortiSIEM system, resulting in an inactive status.
2. The agent is temporarily down
If the agent goes offline (e.g., due to system shutdown, network issues, or agent crash), it will show as inactive.
3. The template was not assigned
Agents require a template to function correctly. If no template is assigned, the agent cannot collect or process events, leading to an inactive state.

NEW QUESTION # 58
What task does phRuleWorker perform on the worker?

- A. Feed summarized data to the supervisor node based on Group by and filters condition
- B. Generate incidents if aggregate conditions calculation matches the value defined in the rule
- C. Evaluate aggregate condition on a per-rule basis and feed that data to the supervisor node
- D. Clear incidents if clear conditions are met

Answer: A

NEW QUESTION # 59
......

With the development of the electronic equipment, there are a lot of changes in the designs of our FCSS_ADA_AR-6.7 pass-sure torrent. The most impressive version is the APP online version. Normally, it can be used on all kinds of digital devices. But it also has the special advantage that the online version can be used when you are not online, As long as you use it for the first time in a networked environment, you can use the online version of our FCSS_ADA_AR-6.7 learning guide from anywhere without network connection. I believe the online version of our FCSS_ADA_AR-6.7 exam questions will be a good choice for you
