FCSS_EFW_AD-7.4 Real Questions & FCSS_EFW_AD-7.4 Exam Cram & FCSS_EFW_AD-7.4 Latest Dumps

Free update for one year for FCSS_EFW_AD-7.4 study guide is available, namely, you don't need to spend extra money on update version, and the update version for FCSS_EFW_AD-7.4 exam materials will be sent to your email automatically. In addition, we are pass guarantee and money back guarantee, and if you fail to pass the exam by using FCSS_EFW_AD-7.4 Exam

Dump of us, we will give you full refund. We have online and offline chat service for FCSS_EFW_AD-7.4 exam materials, and the staffs possess the professional knowledge, if you have any questions, you can consult us, and we will give you reply as quickly as we can.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q74-Q79):

NEW QUESTION # 74
An administrator configured FGSP cluster members to encrypt the session synchronization. When the administrator takes a sniffer trace on the dedicated interface for the synchronization, the sniffer trace shows UDP packets only.
Which two reasons could cause the sniffer to capture only UDP packets? (Choose two.)

- A. encryption is not set to enable on both members.
- B. The encryption is encapsulated in UDP packets.
- C. The administration has not configured the SESSYNC_1 tunnel.
- D. The psksecret value does not match.

Answer: A,D

NEW QUESTION # 75
Which two statements about OCVPN are true? (Choose two.)

- A. Only root vdom supports OCVPN.
- B. OCVPN offers only Hub-Spoke VPNs.
- C. FortiGate devices under different FortiCare accounts can be used to form OCVPN.
- D. OCVPN supports static and dynamic IPs in WAN interface.

Answer: A,D

NEW QUESTION # 76
A company that acquired multiple branches across different countries needs to install new FortiGate devices on each of those branches. However, the IT staff lacks sufficient knowledge to implement the initial configuration on the FortiGate devices.
Which three approaches can the company take to successfully deploy advanced initial configurations on remote branches? (Choose three.)

- A. Apply Jinja in the FortiManager scripts for large-scale and advanced deployments.
- B. Use provisioning templates and install configuration settings at the device layer.
- C. Use the Global ADOM to deploy global object configurations to each FortiGate device.
- D. Add FortiGate devices on FortiManager as model devices, and use ZTP or LTP to connect to FortiGate devices.
- E. Use metadata variables to dynamically assign values according to each FortiGate device.

Answer: B,D,E

Explanation:
Use metadata variables to dynamically assign values according to each FortiGate device:
Metadata variables in FortiManager allow device-specific configurations to be dynamically assigned without manually configuring each FortiGate. This is especially useful when deploying multiple devices with similar base configurations.
Use provisioning templates and install configuration settings at the device layer:
Provisioning templates in FortiManager provide a structured way to configure FortiGate devices.
These templates can define interfaces, policies, and settings, ensuring that each device is correctly configured upon deployment.
Add FortiGate devices on FortiManager as model devices, and use ZTP or LTP to connect to FortiGate devices:
Zero-Touch Provisioning (ZTP) and Local Touch Provisioning (LTP) help automate the deployment of FortiGate devices. By adding devices as model devices in FortiManager, configurations can be pushed automatically when devices connect for the first time, reducing manual effort.

NEW QUESTION # 77
Refer to the exhibits.

Network topology
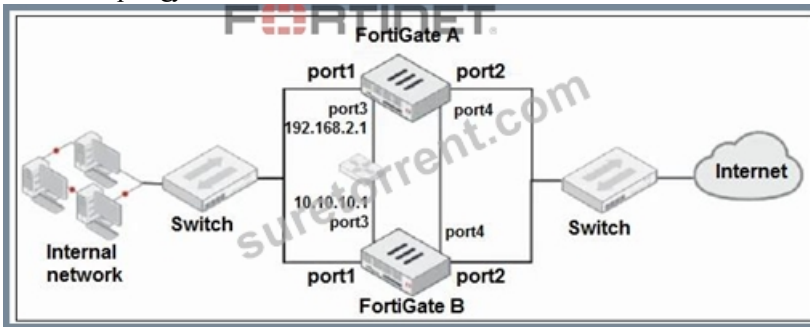

Output from the command config system ha

```
FortiGate_A # config system ha
FortiGate_A # show
config system ha
        set group-name "Fortinet"
        set mode a-p
        set password ENC ltj/cXx5WiX6
        set hbdev "port3" 0
        set session-pickup enable
        set override disable
        set priority 200
        set pingserver-monitor-interface "port4"
end
```

A network diagram and the output from the command config system ha are shown.
The administrator has configured the cluster with the commands shown in the exhibit.
Why is the HA cluster not forming?

- A. The administrator must reconfigure the cluster in FGSP mode.
- B. The administrator must reconfigure the heartbeat interface.
- C. The administrator must reconfigure the monitor interface.
- D. The administrator must reconfigure the cluster in active-active mode.

Answer: B

NEW QUESTION # 78
Refer to the exhibit, which shows a network diagram.
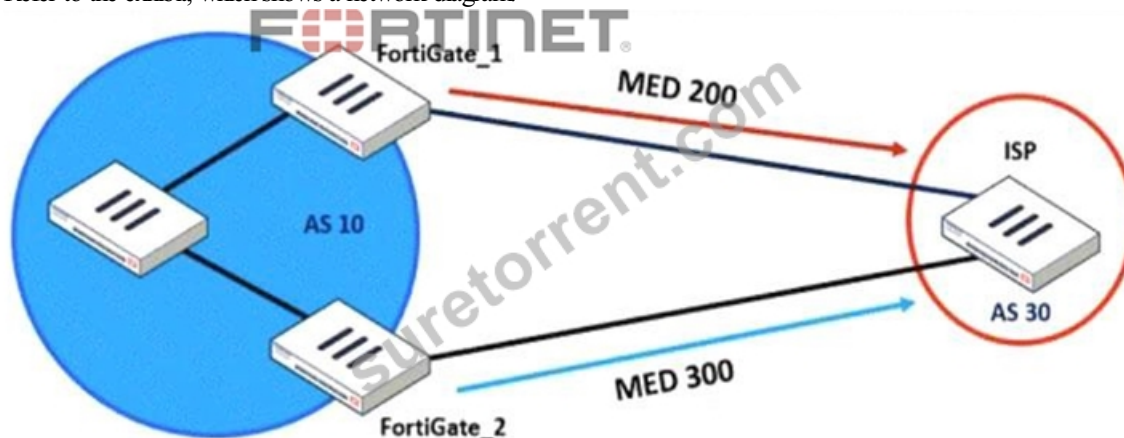

An administrator would like to modify the MED value advertised from FortiGate_1 to a BGP neighbor in the autonomous system 30.
What must the administrator configure on FortiGate_1 to implement this?

- A. prefix-list-out

- B. network-import-check
- C. route-map-out
- D. distribute-list-out

Answer: C

Explanation:
TheMulti-Exit Discriminator (MED)is aBGP attributeused to influence the preferred path for incoming traffic from an external autonomous system (AS). The diagram shows that FortiGate_1 advertisesMED 200, while FortiGate_2 advertisesMED 300, meaningthe ISP will prefer the route through FortiGate_1because alower MED is preferredin BGP.
To modify theMED valueon FortiGate_1 for routes advertised to AS 30, the administrator must configure a route-map-out. A route map canmatch specific routesandset the MED valuebefore sending them to the BGP neighbor.

NEW QUESTION # 79

......

Users do not need to spend too much time on FCSS_EFW_AD-7.4 questions torrent, only need to use their time pieces for efficient learning, the cost is about 20 to 30 hours, users can easily master the test key and difficulties of questions and answers of FCSS_EFW_AD-7.4 Prep Guide, and in such a short time acquisition of accurate examination skills, better answer out of step, so as to realize high pass the qualification test, has obtained the corresponding qualification certificate.

Test FCSS_EFW_AD-7.4 Dumps: https://www.suretorrent.com/FCSS_EFW_AD-7.4-exam-guide-torrent.html
