

FCSS_EFW_AD-7.4 perp training & FCSS_EFW_AD-7.4 testking vce & FCSS_EFW_AD-7.4 valid torrent

Why do most people choose Exams4sures? Because Exams4sures could bring great convenience and applicable. It is well known that Exams4sures provide excellent Fortinet FCSS_EFW_AD-7.4 exam certification materials. Many candidates do not have the confidence to win Fortinet FCSS_EFW_AD-7.4 Certification Exam, so you have to have Exams4sures Fortinet FCSS_EFW_AD-7.4 exam training materials. With it, you will be brimming with confidence, fully to do the exam preparation.

Fortinet FCSS_EFW_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	VPN: This section of the exam measures the skills of Network Security Engineers and covers the implementation of secure communication tunnels for enterprise environments. Candidates will learn to configure IPsec VPN with IKE version 2 to establish encrypted connections. The section also includes the implementation of ADVPN to enable on-demand VPN tunnels between different sites, ensuring secure and dynamic connectivity.
Topic 2	System Configuration: This section of the exam measures the skills of Network Security Engineers and covers the implementation of the Fortinet Security Fabric, ensuring seamless integration across security solutions. It also includes configuring hardware acceleration on FortiGate devices to optimize performance. Candidates will learn to set up different operation modes for high-availability clusters and implement enterprise networks using VLANs and VDOMs. Additionally, it covers various use case scenarios that demonstrate how Fortinet solutions contribute to secure network environments.
Topic 3	Security Profiles: This section of the exam measures the skills of Network Security Engineers and focuses on managing security inspection profiles, including SSL and SSH inspections. Candidates will learn to apply a combination of web filtering, application control, and Internet Service Database (ISDB) to enhance network security. The section also covers integrating Intrusion Prevention Systems (IPS) to monitor and mitigate threats within enterprise networks.
Topic 4	Central Management: This section of the exam measures the skills of Security Administrators and focuses on implementing central management for Fortinet security solutions. It includes configuring and managing devices centrally to streamline network security operations. Candidates will understand how to maintain consistency in security policies and automate deployments for efficient management of large-scale enterprise environments.
Topic 5	Routing: This section of the exam measures the skills of Security Administrators and covers the implementation of advanced routing protocols to manage enterprise traffic effectively. Candidates will gain expertise in configuring Open Shortest Path First (OSPF) for dynamic routing and Border Gateway Protocol (BGP) to facilitate communication between different networks, ensuring efficient traffic flow across enterprise environments.

100% Pass 2025 Latest Fortinet Exam FCSS EFW AD-7.4 Certification Cost

The first goal of our company is to help all people to pass the FCSS_EFW_AD-7.4 exam and get the related certification in the shortest time. Through years of concentrated efforts of our excellent experts and professors, our company has compiled the best helpful and useful FCSS_EFW_AD-7.4 test training materials, and in addition, we can assure to everyone that our FCSS_EFW_AD-7.4 Study Materials have a higher quality than other study materials in the global market. The FCSS_EFW_AD-7.4 learn prep from our company has helped thousands of people to pass the exam and get the related certification.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which two tasks are automated using the Install Wizard on FortiManager? (Choose two.)

- A. Installing configuration changes to managed devices.
- B. Importing interface mappings from managed devices.
- C. Previewing pending configuration changes for managed devices.
- D. Adding devices to FortiManager.

Answer: A,C

NEW QUESTION # 46

Refer to the exhibit, which contains partial output from an IKE real-time debug.

```

Based on the debug output, which phase 1 setting is enabled in the configuration of this VPN?

- A. auto-discovery-receiver
- B. auto-discovery-shortcut
- C. auto-discovery-forwarder
- **D. auto-discovery-sender**

Answer: D

NEW QUESTION # 47

Examine the following traffic log; then answer the question below.

date=20xx-02-01 time=19:52:01 devname=masterdevice_id="xxxxxxx" log_id=0100020007 type=event subtype=system pri critical vd=root service=kemel status=failure msg="NAT port is exhausted." What does the log mean?

- A. FortiGate does not have any available NAT port for a new connection.
- B. There is not enough available memory in the system to create a new entry in the NAT port table.
- C. The limit for the maximum number of simultaneous sessions sharing the same NAT port has been reached.
- D. The limit for the maximum number of entries in the NAT port table has been reached.

Answer: C

NEW QUESTION # 48

Which two statements about bulk configuration changes using FortiManager CLI scripts are correct? (Choose two.)

- A. When executed on the Remote FortiGate directly, administrators do not have the option to review the changes prior to installation.
- B. When executed on the Device Database, you must use the installation wizard to apply the changes to the managed FortiGate
- C. When executed on the Policy Package, ADOM database, changes are applied directly to the managed FortiGate.
- D. When executed on the All FortiGate in ADOM, changes are automatically installed without creating a new revision history.

Answer: A,B

NEW QUESTION # 49

Refer to the exhibits. The exhibits show a network topology, a firewall policy, and an SSL/SSH inspection profile configuration.

Network Topology

Firewall policy on FortiGate

```

DCFW # sh firewall policy 3
config firewall policy
edit 3
set name "To Linux Servers"
set uuid bf77d59e-5513-51ef-147d-e35066e267e9
set srcintf "port1"
set dstintf "port3"
set action accept
set srcaddr "all"
set dstaddr "10.1.4."
set schedule "always"
set service "ALL"
set utm-status enable
set inspection-mode proxy
set ssl-ssh-profile "deep-inspection"
set ips-sensor "IPS Monitor"
set logtraffic all
next
end

```

Why is FortiGate unable to detect HTTPS attacks on firewall policy ID 3 targeting the Linux server?

- A. The administrator must enable SSL inspection of the SSL server and upload the certificate of the Linux server website to the SSL/SSH inspection profile.
- B. The administrator must enable HTTPS in the protocol port mapping of the deep- inspection SSL/SSH inspection profile.
- C. The administrator must enable cipher suites in the SSL/SSH inspection profile to decrypt the message.
- D. The administrator must set the policy to inspection mode to analyze the HTTPS packets as expected.

Answer: A

Explanation:

The FortiGate SSL/SSH inspection profile is configured for Full SSL Inspection, which is necessary to analyze encrypted HTTPS traffic. However, the firewall policy is protecting an SSL server (the Linux server hosting the website), and currently, the SSL/SSH profile only applies to client-side SSL inspection.

To detect HTTPS-based attacks targeting the Linux server:

FortiGate must act as an SSL intermediary to inspect encrypted traffic destined for the web server. The administrator must upload the SSL certificate of the Linux web server to FortiGate so that the server-side SSL inspection can decrypt incoming HTTPS traffic before analyzing it.

NEW QUESTION # 50
