Fortinet FCSS_SASE_AD-25 Exam Questions in Convenient PDF Format

Many students often start to study as the exam is approaching. Time is very valuable to these students, and for them, one extra hour of study may mean 3 points more on the test score. If you are one of these students, then FCSS_SASE_AD-25 exam tests are your best choice. Because students often purchase materials from the Internet, there is a problem that they need transport time, especially for those students who live in remote areas. When the materials arrive, they may just have a little time to read them before the exam. However, with FCSS_SASE_AD-25 Exam Questions, you will never encounter such problems, because our materials are distributed to customers through emails. After you have successfully paid, you can immediately receive FCSS_SASE_AD-25 test guide from our customer service staff, and then you can start learning immediately.

Fortinet FCSS_SASE_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.

Topic 2	• SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.
Topic 3	• Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.
Topic 4	• SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.

Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q52-Q57):

NEW QUESTION # 52

What are two advantages of using zero-trust tags? (Choose two.)

- A. Zero-trust tags can be used to allow or deny access to network resources.
- B. Zero-trust tags can determine the security posture of an endpoint.
- C. Zero-trust tags can help monitor endpoint system resource usage.
- D. Zero-trust tags can be assigned to endpoint profiles based on user groups.

Answer: A,B

Explanation:

Zero-trust tags assess endpoint compliance based on defined posture rules and are used in access policies to control whether a device is permitted or denied access to specific network resources.

NEW QUESTION # 53

Refer to the exhibits.

The screenshot displays the Fortinet FortiSASE 25 Administrator interface. The top section, titled "Managed Endpoints", shows a table with columns: Endpoint, VPN Username, Management Connection, ZTNA Tags (Simple), FortiClient Version, and Vulnerabilities Detected. Two endpoints are listed: Win10-Pro and Win7-Pro, both with "Online" status and "FortiSASE-Compliant" tags.

The bottom section, titled "Secure Internet Access Policy", shows a table with columns: Name, Profile Groups, Source, User, Destination, and Action. Five policies are listed: Botnet Deny, Non-Compliant, Web Traffic, Allow-All, and Implicit Deny. The Botnet Deny policy is highlighted, showing it is applied to "All VPN Users" and denies access to "Botnet-C&C Server".

A FortiSASE administrator is trying to configure FortiSASE as a spoke to a FortiGate hub. The tunnel is up to the FortiGate hub. However, the administrator is not able to ping the webserver hosted behind the FortiGate hub. Based on the output, what is the reason for the ping failures?

- A. The BGP route is not received.
- B. Quick mode selectors are restricting the subnet.
- C. The Secure Private Access (SPA) policy needs to allow PING service.
- D. Network address translation (NAT) is not enabled on the spoke-to-hub policy.

Answer: A

NEW QUESTION # 54

Your organization is currently using FortiSASE for its cybersecurity.

They have recently hired a contractor who will work from the HQ office and who needs temporary internet access in order to set up a web-based point of sale (POS) system.

What is the recommended way to provide internet access to the contractor?

- A. Use a tunnel policy with a contractors user group as the source on FortiSASE to provide internet access.
- B. Use a proxy auto-configuration (PAC) file and provide secure web gateway (SWG) service as an explicit web proxy.
- C. Use zero trust network access (ZTNA) and tag the client as an unmanaged endpoint.

- D. Use the self-registration portal on FortiSASE to grant internet access.

Answer: D

NEW QUESTION # 55

Refer to the exhibit.

While reviewing the traffic logs, the FortiSASE administrator notices that the usernames are showing random characters. Why are the usernames showing random characters?

- A. FortiSASE uses FortiClient unique identifiers for usernames.
- B. Log anonymization is turned on to hash usernames.
- C. Users are using a shared single sign-on SSO username.
- D. Special characters are used in usernames.

Answer: B

Explanation:

The usernames appear as random character strings because log anonymization is enabled in FortiSASE, which hashes sensitive user information such as usernames to protect privacy while still allowing log analysis.

NEW QUESTION # 56

Refer to the exhibits.

Vulnerability Dashboard

APPLICATIONS VULNERABILITIES				
Patch endpoints View affected endpoints				
	Vulnerability	Category	Severity	CVE
☐	FortiClient CVE-2024-50564 Information Disclosure Vulnerability	Applications	High	CVE-2024-50564
☐	OpenSSL CVE-2023-5678 Denial of Service Vulnerability	Applications	Medium	CVE-2023-5678
☐	Security Vulnerabilities fixed in VMware Workstation Player VMSA-2025-0004	Applications	Critical	CVE-2025-22226,CVE-20...
				Patching status
				Manual patching required
				Manual patching required
				Manual patching required

How will the application vulnerabilities be patched, based on the exhibits provided?

- A. The vulnerability will be patched by installing the patch from the vendor's website.
- B. An administrator will patch the vulnerability remotely using FortiSASE.
- C. The end user will patch the vulnerabilities using the FortiClient software.
- D. The vulnerability will be patched automatically based on the endpoint profile configuration.

Answer: B

Explanation:

The "Automatically patch vulnerabilities" option is disabled in the endpoint profile. Additionally, the Vulnerability Dashboard shows the patching status as "Manual patching required." This means an administrator must manually initiate the patching process remotely using FortiSASE.

NEW QUESTION # 57

.....

PracticeDump has designed PracticeDump which has actual exam Dumps questions, especially for the students who are willing to pass the Fortinet FCSS_SASE_AD-25 exam for the betterment of their future. The study material is available in three different formats. Fortinet FCSS_SASE_AD-25 Practice Exam are also available so the students can test their preparation with unlimited tries and pass FCSS - FortiSASE 25 Administrator (FCSS_SASE_AD-25) certification exam on the first try.
