Of course, we also need to realize that it is very difficult for a lot of people to pass the exam without valid FCSS_SDW_AR-7.4 study materials in a short time, especially these people who have not enough time to prepare for the exam, that is why many people need to choose the best and most suitable FCSS_SDW_AR-7.4 Study Materials as their study tool. We believe that if you have the good FCSS_SDW_AR-7.4 study materials when you are preparing for the exam, it will be very useful and helpful for you to pass exam and gain the related certification successfully.

Fortinet FCSS_SDW_AR-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• SD-WAN Configuration: This section of the exam measures the skills of network engineers and covers configuring a basic SD-WAN setup. Candidates are expected to demonstrate their ability to define SD-WAN members and zones effectively, ensuring foundational network segmentation and management.
Topic 2	• Advanced IPsec: Intended for security engineers, this section covers the deployment of advanced IPsec topologies for SD-WAN, including hub-and-spoke models, ADVPN configurations, and complex multi-hub or multi-region deployments. Candidates need to demonstrate expertise in securing wide-area networks using IPsec technologies.
Topic 3	• SD-WAN Troubleshooting: This part assesses the troubleshooting skills of network support specialists. Candidates should be able to diagnose and resolve issues related to SD-WAN rules, session behaviors, routing inconsistencies, and ADVPN connectivity problems to maintain seamless network operations.

As the authoritative provider of FCSS_SDW_AR-7.4 learning materials, we can guarantee a high pass rate compared with peers, which is also proved by practice. Our good reputation is your motivation to choose our learning materials. We guarantee that if you under the guidance of our FCSS_SDW_AR-7.4 learning materials step by step you will pass the exam without a doubt and get a certificate. Our learning materials are carefully compiled over many years of practical effort and are adaptable to the needs of the exam. We firmly believe that you cannot be an exception. Choosing our FCSS_SDW_AR-7.4 Study Material actually means that you will have more opportunities to be promoted in the near future.

Fortinet FCSS - SD-WAN 7.4 Architect Sample Questions (Q41-Q46):

NEW QUESTION # 41
When a customer delegate the installation and management of its SD-WAN infrastructure to an MSSP, the MSSP usually keeps the hub within its infrastructure for ease of management and to share costly resources.
In which two situations will the MSSP install the hub in customer premises? (Choose two.)

- A. The customer requires SIA with centralized breakout.
- B. The majority of the branch traffic is directed to a corporate data center.
- C. The administrator expects a large volume of traffic between the branches.
- D. The customer expects a large amount of VoIP traffic.

Answer: B,C

Explanation:
A large volume of inter-branch traffic benefits from a local hub to avoid backhauling and reduce latency.
If most traffic is destined for a corporate data center, placing the hub on-premises ensures efficient routing and improved performance.

NEW QUESTION # 42
Refer to the exhibit.Two hub-and-spoke groups are connected through redundant site-to-site IPsec VPNs between Hub 1 and Hub 2.
Which two configuration settings are required for the spoke A1 to establish an ADVPN shortcut with the spoke B2? (Choose two.)
- A. On hubs, auto-discovery-forwarder must be enabled on the IPsec VPNs to spokes.
- B. On hubs, auto-discovery-forwarder must be enabled on the IPsec VPNs to hubs.
- C. On hubs, auto-discovery-receiver must be enabled on the IPsec VPNs to spokes.
- D. On hubs, auto-diacovery-sender must be enabled on the IPsec VPNs to spokes

Answer: B,D

NEW QUESTION # 43
An SD-WAN member is no longer used to steer SD-WAN traffic. The administrator updated the SD-WAN configuration and deleted the unused member. After the configuration update, users report that some destinations are unreachable. You confirm that the affected flow does not match an SD-WAN rule.
What could be a possible cause of the traffic interruption?

- A. FortiGate can remove some static routes associated with an interface when the member is removed from SD-WAN.
- B. FortiGate, with SD-WAN enabled, cannot route traffic through interfaces that are not SD-WAN members.
- C. FortiGate administratively brings down interfaces when they are removed from the SD-WAN configuration.
- D. FortiGate removes the layer 3 settings for interfaces that are removed from the SD-WAN configuration.

Answer: A

Explanation:
When an SD-WAN member is deleted, FortiGate can also remove static routes that were tied to that interface. If those routes are needed for destinations not covered by SD-WAN rules, traffic to those networks becomes unreachable. This explains why flows not matching SD-WAN rules are interrupted after the member was removed.

NEW QUESTION # 44

Refer to the exhibit. An administrator is troubleshooting SD-WAN on FortiGate. A device behind branch1_fgt generates traffic to the 10.0.0.0/8 network.

The administrator expects the traffic to match SD-WAN rule ID 1 and be routed over HUB1- VPN1.

However, the traffic is routed over HUB1-VPN3.

Based on the output shown in the exhibit, which two reasons, individually or together, could explain the observed behavior? (Choose two.)

- A. HUB1-VPN3 has a lower route priority value (higher priority) than HUB1-VPN1.
- B. The traffic matches a regular policy route configured with HUB1-VPN3 as the outgoing device
- C. HUB1-VPN3 has a higher member configuration priority than HUB1-VPN1.
- D. HUB1-VPN1 does not have a valid route to the destination

Answer: A,C

NEW QUESTION # 45

Which two statements are correct when traffic matches the implicit SD-WAN rule? (Choose two.)

- A. Traffic does not match any of the entries in the policy route table.
- B. All SD-WAN rules have the default and gateway setting enabled.
- C. The session information output displays no SD-WAN-specific details.
- D. Traffic is load balanced using the algorithm set for the v4-ecmp-mode setting.
