最受推薦的的ISO-14001-Lead-Auditor題庫，覆蓋大量的PECB認證ISO-14001-Lead-Auditor考試知識點

雖然有其他的線上PECB的ISO-14001-Lead-Auditor考試培訓資源在市場上，但我們VCESoft PECB的ISO-14001-Lead-Auditor考試培訓資料是最好的。因為我們會定期更新，始終提供準確的PECB的ISO-14001-Lead-Auditor考試認證資料，我們VCESoft PECB的ISO-14001-Lead-Auditor考試培訓資料提供一年的免費更新，你會得到最新的更新了的VCESoft PECB的ISO-14001-Lead-Auditor考試培訓資料。

最新的 ISO 14001 ISO-14001-Lead-Auditor 免費考試真題 (Q68-Q73):

問題 #68

The Pressed Standard is a national dry cleaning and laundry organisation with 50 shops. You are conducting an EMS surveillance audit of the Head Office and are sampling environmental performance measurement.

You find that 80 per cent of failures to meet performance criteria originate from five shops in the same region.

Most of these failures relate to the release of volatile organic compounds (VOCs) that exceeded regulations.

The Environmental Manager tells you that these are the oldest shops in the organisation. The cleaning equipment needs replacing, but the organisation cannot afford it at the moment.

On raising the matter with senior management, you are told that there are plans to replace the equipment in these shops over the next five years.

When reviewing the nonconformity report files, you find that the organisation is facing a legal dispute with the environmental authority over multiple breaches of environmental legislation.

Select the three best options for how this should be handled by the organisation through its EMS.

- A. Advise the authority that the faulty equipment will be maintained more often.
- B. Advise the authority that timely corrective action will be taken.
- C. Conduct an internal enquiry to establish who is to blame.
- D. Monitor VOC emissions to ensure compliance with legal requirements.
- E. Ask to settle the court case by negotiation with the authority.
- F. Offer to compensate employees for possible health implications.
- G. Investigate changing the cleaning process to use chemicals with lower VOC content.
- H. Give an explanation to the authority of what went wrong.

答案: B,D,G

解題說明:

In accordance with ISO 14001:2015, an organization must take proactive corrective action and maintain rigorous monitoring protocols when nonconformities or breaches of legal compliance obligations occur.

* Option B (Clause 9.1.1 Monitoring & Clause 9.1.2 Compliance Evaluation): Continual measurement and monitoring of VOC emissions are mandatory to evaluate performance and verify compliance with statutory regulatory limits, providing the necessary data for environmental management.

* Option C (Clause 10.2 Nonconformity and Corrective Action & Clause 7.4.3 External Communication): Demonstrating structured management commitment by communicating with environmental regulatory authorities and promising transparent, timely corrective actions aligns directly with ISO 14001 principles governing external communication and legal compliance management.

* Option D (Clause 8.1 Operational Control & Clause 6.1.2 Environmental Aspects): Exploring alternative operational controls, such as material substitution with lower VOC chemical solvents, directly mitigates the root cause of the environmental aspect and reduces environmental impacts without relying solely on expensive capital equipment replacements.

Irrelevant options such as offering health compensation, negotiating court settlements, or conducting fault-finding enquiries focus on legal liability or blame culture rather than standard EMS corrective action processes. Simply increasing maintenance on fundamentally obsolete equipment (Option H) fails to systematically address root-cause emissions or ensure legal compliance.

問題 #69

You are conducting a Stage 2 certification audit of VitalSpark, a pharmaceutical organisation manufacturing vitamins and other healthcare medicines.

In a separate area in the centre of their large site, a supplier produces oxygen supplies piped directly into the manufacturing processes of VitalSpark. They also deliver oxygen in bulk tankers to other customers. When you review the environmental aspects register, you find that the only environmental aspect recorded for this arrangement relates to the heavy goods vehicles of the supplier transiting the site.

You ask the EMS Manager about the environmental consequences to VitalSpark of this arrangement and are told that they are not significant since the supplier has its own services for water, sewage, waste and energy.

The EMS Manager tried unsuccessfully to communicate with the supplier who is located inside the VitalSpark site and outside the scope of the EMS.

After gathering more evidence, you note down findings against several clauses of ISO 14001. Determine which three of the findings stated are non-conformities.

- A. Evidence was found to indicate that the needs of some interested parties had not been considered by the organisation. A neighbour's interests had not been identified. (Clause 4.2.b)
- B. Documentation of environmental impacts was missing for the supplier of oxygen. (Clause 6.1.2)
- C. The EMS Manager had some problems communicating with the supplier by mobile phone as an interested party. No other methods of communication were employed. (Clause 7.4.3)
- D. The internal audit programme does not include processes for control of subcontractor transport movements. The audit programme does not cover the full environmental management system. (Clause 9.2.2)
- E. The aspects related to the use of heavy goods trucks was not identified. (Clause 6.1.2)
- F. The organisation has failed to include in the EMS scope the activities, products and services associated with suppliers and contractors performing their activities in its own site. (Clause 4.3)
- G. The Environmental Manager did not visit the oxygen supplier. (Clause 7.4.3)
- H. The contractor's environmental policy is not consistent with the organisation's policy (Clause 5.2)

答案: B,D,F

問題 #70

Mobile Shine Co. is an organisation that provides mobile car cleaning services at customers' premises. It has been certified to ISO 14001 for some time and has appointed a new EMS Manager. The audit plan for a surveillance audit from the certification body includes the continual improvement, and the auditor requests the most recent minutes from the management review meeting.

Which six statements would represent output audit evidence for the management review?

- A. Procurement of new spill kits for operators.
- B. Minutes of previous management reviews.
- C. Staff feedback on environmental risks.
- D. Changes in the EMS documentation.
- E. Allocation of a bigger budget for the EMS department.
- F. Decisions related to continual improvement opportunities.
- G. Changes to the significant environmental aspects.
- H. Plan to prioritise environmental improvement as a business strategy.
- I. Updated environmental signs in the production facility.

- J. Report of performance of EMS objectives in the last year.

答案: A,D,E,F,H,I

解題說明:

In accordance with ISO 14001:2015 Clause 9.3 (Management Review), management review outputs must include decisions and actions related to continual improvement opportunities, needed changes to the environmental management system, implications for the strategic direction of the organization, and resource allocations.

The six selected options represent direct outcomes, actions, and decisions resulting from top management evaluation during a management review:

- * Decisions related to continual improvement opportunities (Option A): Mandated management review output under Clause 9.3.
- * Changes in the EMS documentation (Option B): Decisions regarding system updates and documentation modifications under Clause 9.3.
- * Plan to prioritise environmental improvement as a business strategy (Option E): Direct alignment of EMS direction with top management strategic business planning.
- * Allocation of a bigger budget for the EMS department (Option H): Decision on needed resources to support management system effectiveness.
- * Procurement of new spill kits for operators (Option I): Specific operational action item and resource provision decided by leadership.
- * Updated environmental signs in the production facility (Option J): Action item determined by top management to address operational controls and awareness.

Conversely, Option C (Report of performance of EMS objectives), Option D (Changes to significant aspects), Option F (Minutes of previous reviews), and Option G (Staff feedback) represent inputs to the management review process rather than decisions/outputs resulting from it.

References: ISO 14001:2015 Clause 9.3 (Management Review - Inputs and Outputs), Annex A.9.3, and CQI-IRCA ISO 14001 Lead Auditor Curriculum (Evaluating Management Review Records).

問題 #71

During discussions with the individual(s) managing the audit programme of a certification body, the EMS Manager of the client organisation asks that only one auditor is used for the audit duration to save on travel expenses.

Which combination of the following responses should the individual(s) managing the audit programme make?

Select two.

- A. Advise that the audit team make-up is a decision for the Certification Body.
- B. Suggest that the EMS Manager choose another Certification Body.
- C. Suggest asking the Certification Body management to consider the request.
- D. Advise the EMS Manager that his request can be considered for future audits.
- E. Advise that the contract has already been signed and cannot be revised.
- F. Advise that a remote audit could be conducted instead of an on-site audit.

答案: A,C

解題說明:

The correct answers are A and E.

A). Advise that the audit team make-up is a decision for the Certification Body - Correct For a certification audit, the Certification Body is responsible for determining the audit team composition.

This includes deciding the number of auditors, required competence, audit duration, technical expertise, impartiality, and ability to cover the full audit scope. The client may express a preference or raise a concern, but the client cannot dictate the audit team structure simply to reduce costs.

E). Suggest asking the Certification Body management to consider the request - Correct The request may be passed to appropriate Certification Body management for review. The Certification Body can consider whether the request is possible without compromising audit duration, competence, impartiality, coverage of the audit scope, or certification requirements. However, any change must remain under the Certification Body's control.

The other options are not appropriate:

B). Advise the EMS Manager that his request can be considered for future audits - Incorrect This avoids the current request rather than addressing it properly. The Certification Body may consider the request now, but only through its own competent review process.

C). Suggest that the EMS Manager choose another Certification Body - Incorrect This is unprofessional and unnecessary. The correct approach is to explain the Certification Body's responsibility and review the request appropriately.

D). Advise that the contract has already been signed and cannot be revised - Incorrect A signed contract does not automatically

prevent changes. Changes may be possible if reviewed and approved by the Certification Body, provided audit integrity is maintained.

F). Advise that a remote audit could be conducted instead of an on-site audit - Incorrect Remote auditing cannot simply be substituted to reduce travel expenses. The use of remote audit methods must be justified and must still allow the Certification Body to achieve the audit objectives. For many certification audit activities, especially where operational controls and site conditions must be verified, on-site evaluation may be necessary.

Therefore, the best two responses are A and E.

問題 #72

A management system meeting ISO 14001:2015 requirements is based on the Plan-Do-Check-Act (PDCA) cycle. Which two elements of the management system are part of the 'Check' stage of the PDCA cycle?

- A. Nonconformities
- B. Improvement
- C. Environmental policy
- D. Monitoring performance
- E. Control of the processes
- F. Management review

答案: A,D

問題 #73

.....

言行一致是成功的開始，既然你選擇通過苛刻的IT認證考試，那麼你就得付出你的行動，取得優異的成績獲得認證，VCESoft PECB的ISO-14001-Lead-Auditor考試培訓資料是通過這個考試的最佳培訓資料，有了它就猶如有了了一個成功的法寶，VCESoft PECB的ISO-14001-Lead-Auditor考試培訓資料是百分百信得過的培訓資料，相信你也是一百分能通過這次考試的。
