We have researched an intelligent system to help testing errors of the C-CPI-2506 Exam Materials. That is why our C-CPI-2506 practice engine is considered to be the most helpful exam tool in the market.

## SAP Certified Associate - Integration Developer Sample Questions (Q55-Q60):

### NEW QUESTION # 55

In the SAP Integration Suite, where can you change the virtual host name?

- A. Settings APIs
- B. Configure ? APIs
- C. Discover - APIs
- D. Design APIs

**Answer: A**

Explanation:

In the SAP Integration Suite, you can change the virtual host name in the Settings APIs. The Settings APIs allow you to configure various aspects of your API provider, such as the virtual host name, the base path, the authentication method, and the CORS settings. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

#### NEW QUESTION # 56

What does the messaging model of the Apache Camel Data Model consist of?

- A. Header, Exchange ID, in-message
- B. Header, body, attachment
- C. Header, body, properties
- D. Header, properties, attachment

**Answer: C**

Explanation:

The Apache Camel Data Model, which underpins SAP Cloud Integration's message processing model, consists of  
Header # Metadata about the message (e.g., content type, correlation IDs).

Body # Main payload of the message.

Properties # Exchange-level metadata, persisted throughout processing but not transferred with the message.

Other options mix in elements like attachments or exchange IDs, but the standard messaging model is header, body, properties.

#### NEW QUESTION # 57

Which Integration Flow element is best suited for executing custom Logic on the received cloud event data?

- A. Use an external REST API
- B. Employ a Mule Expression component
- C. Use a Java connector
- D. Run a Groovy script

**Answer: D**

Explanation:

For executing custom logic inside an integration flow:

Groovy script (via Script step) is the supported mechanism in SAP Cloud Integration.

External REST APIs can enrich data but are not for embedded custom logic execution.

Mule components are not part of SAP CPI.

Java connectors are not directly supported in SAP CPI runtime.

Thus, the best suited for executing custom logic is Groovy script.

#### NEW QUESTION # 58

You want to set up Exchange Properties in an integration flow. Besides a Content Modifier, what can you use?

- A. XML scripting
- B. Groovy SDK scripting
- C. Python scripting
- D. Batch scripting

**Answer: B**

Explanation:

In SAP Cloud Integration, Exchange Properties can be created and set using:  
Content Modifier # Standard way to configure properties.  
Groovy Scripting # Via the SAP CPI Groovy SDK, you can dynamically add or update exchange properties at runtime.  
Other options:  
Batch scripting, XML scripting, Python scripting # Not supported in SAP CPI.  
Thus, besides Content Modifier, you use Groovy SDK scripting.

#### NEW QUESTION # 59

Which log level must you use to examine the payload at specific processing steps in an integration flow?

- A. Trace
- B. Debug
- C. Info
- D. Error

**Answer: A**

Explanation:

In SAP Cloud Integration, the log levels are:

Info # Default, logs basic execution details.

Debug # Logs processing steps, but not message payload.

Error # Logs only failures.

Trace # Captures message payloads at specific processing steps, used for deep troubleshooting.

Thus, to examine payload at runtime, the log level must be set to Trace.

#### NEW QUESTION # 60

.....

The three versions of our C-CPI-2506 exam questions have their own unique characteristics. The PDF version of C-CPI-2506 training materials is convenient for you to print, the software version can provide practice test for you and the online version is for you to read anywhere at any time.
