All Salesforce CRT-211 practice test questions formats are ready for quick download.

Salesforce Certification Preparation for Advanced Administrator Sample Questions (Q146-Q151):

NEW QUESTION # 146
Cloud Kicks has just released a new Process Builder on the Account in production. The end users keep getting error messages that prevent them from completing their updates to the Account.
Which three things should the administrator do to resolve this issue?
Choose 3 answers

- A. Review the Error Email for the Process Builder and rectify the issues.
- B. Deactivate the Process Builder in production.

- C. Have the users refresh the Account page so they get the current Process Builder.
- D. Fix the Process Builder in a sandbox and migrate the change to production.
- E. Manually make the updates to the Account as the logged-in user.

Answer: A,B,D

Explanation:
To resolve the issue with the Process Builder, the administrator should do the following steps:
* Review the Error Email for the Process Builder and rectify the issues. The error email contains information about what caused the error and how to fix it.
* Deactivate the Process Builder in production. This will prevent further errors from occurring while the administrator fixes the Process Builder.
* Fix the Process Builder in a sandbox and migrate the change to production. This will ensure that the Process Builder is tested and validated before deploying it to production. References: https://help.

NEW QUESTION # 147
Cloud Kicks (CK) is working on adding a Knowledge base to its online customer community. The administrator suggests using Salesforce Knowledge to meet this requirement.
What are three reasons CK should utilize Data Categories when creating articles in Knowledge?
Choose 3 answers

- A. Up to five Data Category groups can be created for segmentation.
- B. Every article is required to have a Data Category for sorting.
- C. A Knowledge article can be tagged to more than one Data Category.
- D. Data Categories provide a way to secure access to the Knowledge base content.
- E. Data Categories help organize the Knowledge base content displayed.

Answer: C,D,E

Explanation:
Three reasons CK should utilize Data Categories when creating articles in Knowledge are:
Data Categories help organize the Knowledge base content displayed. Data categories are logical groupings of articles that reflect your business needs and processes. You can create a data category group and assign it to one or more article types, and then create data categories and subcategories within that group. Data categories help you organize your articles by topic or criteria and make them easier to find and browse by your users or customers.
Data Categories provide a way to secure access to the Knowledge base content. Data category visibility is a setting that determines which data categories users can access based on their profiles or permission sets. You can use data category visibility to control access to your articles based on their data categories and ensure that only relevant and appropriate content is displayed to different users or customers.
A Knowledge article can be tagged to more than one Data Category. A Knowledge article is a document that provides information or answers to common questions or issues. A Knowledge article can be tagged to one or more data categories within each data category group that is assigned to its article type. This allows you to classify your articles by multiple criteria and make them searchable and accessible by different users or customers.

NEW QUESTION # 148
What should an administrator consider when moving approval processes using a change set? * (1 Point)

- A. Change sets do NOT include the approval and rejection actions from the source organization
