我々のMogiExamサイトは一番高質量のISO-14001-Lead-Auditor試験資料と行き届いたアフタサービスを提供して協力します。PECB ISO-14001-Lead-Auditor問題集は試験の範囲を広くカバーして、試験の通過率が高いです。他のサイトと比較して、我が社のISO-14001-Lead-Auditor試験問題集を購入すると決定します。商品の税金について、この問題を心配できません。顧客の利益を保証するために、税金は弊社の方で支払います。

PECB Certified EMS ISO 14001 Lead Auditor Exam 認定 ISO-14001-Lead-Auditor 試験問題 (Q29-Q34):

質問 # 29

You are auditing the ISO 14001 management system of a primary school (School 21st Century) located in downtown Lima, Peru. There are 400 students, attending classes from 9 am until 5.30 pm.

You have presented a nonconformity at the closing meeting:

Non-conformity - No environmental aspect has been identified related to the impact of the education provided by the school on students' awareness (as future adults) related to generic environmental issues.

Select the three best acceptable corrections that the school may take.

- A. Review the procedure for waste management in the school
- B. Revise the school's environmental policy to include environmental concerns
- C. Add the education on generic environmental issues to the list of environmental aspects of the school's EMS
- D. Hire an environment expert next week to deliver a lecture on the environment to all students
- E. Thoroughly review the syllabus for next year to include environmental issues whenever appropriate
- F. Hire an environmentalist next month to deliver a couple of lectures on the environment to all employees of the school, except students
- G. Establish environmental objectives for the school
- H. Ask the National Environmental Agency for reading materials to give to students before the lecture by the expert

正解: C、D、E

質問 # 30

An internal auditor of a manufacturer of aluminium products for the car industry asked to see the most recent management review minutes and found no reference to the completion of some of the current environmental objectives. He raised a nonconformity against section 9.3.c of ISO 14001 in Report IA202. The nonconformity (NC3) stated:

"Top management has not analysed why some of the environmental objectives have been met since the last management review."

When discussing the finding with the Environmental Manager, the auditor was informed that planned actions taken to complete the current environmental objectives were specifically covered in the internal audit programme and did not need any further work done. Select one of the options which would constitute an effective response by the Environmental Manager to the nonconformity.

- A. Revise the incomplete environmental objectives to make them more achievable within 12 months.
- B. Reject the non-conformity. Objectives do not have to be met within a year. Plans on how to achieve objectives are established and reviewed when conducting the internal audit programme.
- C. Schedule additional internal audits in the internal audit programme for the next year, specifically to cover the completion of all environmental objectives.
- D. Embark on a training programme for internal auditors on the setting and evaluation of environmental objectives.

正解: C

質問 # 31

An oil organisation has a natural gas treatment plant on land crossed by several small rivers. On one particular day, after heavy rainfall for 48 hours, some of those rivers burst their banks and flooded the water treatment facilities of the plant. The oil-contaminated water reached some scarcely populated areas nearby.

Soon after, an internal audit was carried out to particularly analyse this event that was considered a nonconformity. There were no records of such heavy rainfall in the past 200 years.

Which three of the following actions are 'corrections'?

- A. Revise the existing emergency plan
- B. Offer loans to the persons affected to build new houses far from the plant
- C. Send the contaminated land for processing
- D. Reinforce the riverbanks with cement
- E. Clean up the houses of the persons affected
- F. Clean up the affected land
- G. Build up some additional protection to the water treatment plant
- H. Relocate the water treatment plant to lower ground

正解： C、 E、 F

質問 # 32

You are conducting a Stage 2 certification audit of VitalSpark, a pharmaceutical organisation manufacturing vitamins and other healthcare medicines. In a separate area in the centre of their large site, a supplier produces oxygen supplies piped directly into the manufacturing processes of VitalSpark. They also deliver oxygen in bulk tankers to other customers. When you review the environmental aspects register, you find that the only environmental aspect recorded for this arrangement relates to the heavy goods vehicles of the supplier transiting the site.

You ask the EMS Manager about the environmental consequences to VitalSpark of this arrangement and are told that they are not significant since the supplier has its own services for water, sewage, waste and energy.

The EMS Manager tried unsuccessfully to communicate with the supplier who is located inside the VitalSpark site and outside the scope of the EMS.

You raise a non-conformance against clause 6.1.2 of ISO 14001:

"VitalSpark does not maintain documented information on aspects/impacts related to activities, products and services of the oxygen supplier." Which combination of two of the following actions proposed by VitalSpark would permit you to close out the nonconformity?

- A. VitalSpark will update its documented information on aspects/impacts to include those related to the oxygen supplier.
- B. VitalSpark will expand its audit programme to include audits of the oxygen supplier's organisation.
- C. VitalSpark will suggest that the oxygen supplier should undertake training in environmental awareness.
- D. The oxygen supplier will be requested to undertake a full environmental survey of its processes.
- E. VitalSpark will retrieve environmental data on a monthly basis from the on-site supplier.
- F. The oxygen supplier will be requested to implement an ISO 14001 management system within the next 3 months.

正解： A、 E

質問 # 33

Showitoff is an organisation specialising in the design and production of wall decorating materials for the domestic market. During an ISO 14001 certification audit of the site, the auditor comes across an open, walled area just outside the maintenance department. It contains various scraps of wood and metal as well as several rusty components. They are lying on an oily floor. When asked about it, the EMS Manager states that he presumes that the materials come from maintenance work.

The auditor interviews the Maintenance Manager in his department. He notes that shelves containing various spares are well labelled and neatly stacked. He asked about the "dump" outside and is told that it contains some excess materials that the Manager likes to keep in case they come in handy at some stage. The auditor points out that the "dump" might be classed under regulations as a landfill site, which requires an operating licence. The Maintenance Manager is not aware of such a licence.

The auditor decides to review the process for evaluation of compliance with environmental regulations in more depth. Select three options that provide a meaningful audit trail for this process.

- A. What are the qualifications of the EMS and Maintenance Managers?
- B. What environmental aspects have been identified as being associated with regulations?
- C. How is the cost of unused or excess materials calculated?
- D. How is the material content of scrap items verified?
- E. Are operators trained in the identification of legal requirements?
- F. How are maintenance staff made aware of regulatory requirements?
- G. How is the handling of waste materials monitored?

- H. Is a regulatory expert employed on the internal audit programme?

正解: B、F、G
