## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q27-Q32):

### NEW QUESTION # 27

Which of the following are examples of indirect digital access? Note: There are 2 correct answers to this question.

- A. A Production Order created through a non-SAP front-end
- B. An unattended bot in SAP Build Process Automation
- C. A Defect document created through an industry application
- D. A Time Sheet Record from a 3rd party application

**Answer: C,D**

Explanation:

Indirect digital access occurs when humans, devices, or systems use the digital core indirectly through non-SAP intermediary software, such as a non-SAP front end, a custom-solution, or any other non-SAP application<sup>1</sup>. Indirect digital access is measured by the number of documents created, updated, or deleted in the SAP system as a result of the indirect use<sup>2</sup>. Examples of indirect digital access include:

\* A Defect document created through an industry application: This is an example of indirect digital access because the industry application is a non-SAP software that triggers the creation of a document in the SAP system.

\* A Time Sheet Record from a 3rd party application: This is also an example of indirect digital access because the 3rd party application is a non-SAP software that triggers the creation of a document in the SAP system.

\* An unattended bot in SAP Build Process Automation: This is not an example of indirect digital access because the bot is using SAP software to access the SAP system directly, not through a non-SAP intermediary software.

\* A Production Order created through a non-SAP front-end: This is not an example of indirect digital access because the production order is not a document type that is counted for indirect digital access. The document types that are counted are: Sales Order, Invoice, Purchase Order, Service and Maintenance Document, Manufacturing Document, Quality Management Document, Time Sheet, Financial Document, and Material Document<sup>2</sup>. ### NEW QUESTION # 28

Which of the following analyses can you create from the Manage KPIs and Reports app? Note: There are 3 correct answers to this question.

- A. Review Booklets
- B. SAC Stories

- C. Lumira Dashboards
- D. Object Views
- E. Multidimensional Reports

**Answer: A,B,E**

#### NEW QUESTION # 29

What provides a foundation for the SAP Cloud ERP where integrations and extensions live?

- A. SAP Discovery Center
- B. SAP ABAP Environment
- C. SAP Business Technology Platform
- D. SAP Business Accelerator Hub

**Answer: C**

Explanation:

SAP Business Technology Platform (BTP) provides a foundation for the SAP Cloud ERP where integrations and extensions live. SAP BTP is a cloud-based platform that offers a range of services and capabilities to extend, integrate, and orchestrate SAP and non-SAP applications. SAP BTP enables customers and partners to build extensions that are decoupled from the core SAP S/4HANA Cloud system, ensuring lifecycle stability and avoiding modification of SAP code. SAP BTP also leverages the huge library of free integration packages and extension templates available on the SAP Business Accelerator Hub, which can be consumed and customized according to the customer's needs. All services are listed in the SAP Discovery Center, where customers can explore, try, and buy SAP BTP services.

SAP ABAP Environment, SAP Discovery Center, and SAP Business Accelerator Hub are not the foundation for the SAP Cloud ERP, but rather components or tools that are related to SAP BTP. SAP ABAP Environment is a service on SAP BTP that allows customers and partners to develop and run ABAP code in the cloud. SAP Discovery Center is a portal that showcases the available services and solutions on SAP BTP and guides customers through the end-to-end journey of discovering, trying, buying, and implementing them.

SAP Business Accelerator Hub is a repository of ready-to-use integration packages and extension templates that can be deployed on SAP BTP to accelerate the implementation of SAP S/4HANA Cloud. #### NEW QUESTION # 30

Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- A. Use the Test system to demonstrate SAP Best Practice processes.
- B. Define the organizational structure and chart of accounts.
- C. Conduct the Fit-to-Standard analysis to gather configuration values.
- D. Conduct the Digital Discovery Assessment to identify extension requirements.

**Answer: A,C**

#### NEW QUESTION # 31

Where can you find packaged integration content if there is no SAP Best Practices content available?

- A. SAP Fiori Apps Reference Library
- B. SAP BTP Cockpit
- C. SAP Business Accelerator Hub
- D. SAP Extensibility Explorer

**Answer: C**

Explanation:

If there is no SAP Best Practices content available for a specific integration scenario, you can find packaged integration content in the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central repository of integration content for SAP and
