## PK0-005 test online - CompTIA PK0-005 test dumps insides

Passing the CompTIA PK0-005 certification exam is not a tough thing to do but we make it so. The main reason is that we don't know how to study from the PK0-005 exam questions we have. We assume that we can study one night and can easily take the CompTIA Project+ Certification Exam PK0-005 Exam the next morning. This was possible only when we were the school. Now, it is not possible.

## CompTIA Project+ Certification Exam Sample Questions (Q132-Q137):

### NEW QUESTION # 132

Given the following information:

Task	Sequence	Duration
A	B,C	10
B	D,E	15
C	F	10
D	G	20
E	G	10
F	H,I	15
G	J	5
H	J	10
I	J	20
J	END	5

Which of the following represents the critical path of the project?

- A. A-C-F-I-J
- B. A-B-E-G-J
- C. A-C-F-H-J
- **D. A-B-D-G-J**

**Answer: D**

Explanation:

The critical path of the project is the longest sequence of tasks that must be completed on time for the project to finish on schedule. It determines the shortest possible duration of the project and shows the tasks that have no slack or float. Any delay in the critical path tasks will affect the project completion date. To find the critical path, we need to calculate the earliest start (ES), earliest finish (EF), latest start (LS), latest finish (LF), and slack (S) for each task. We can use the table and the network diagram given in the question to do this. The formula for calculating the slack is  $S = LF - EF$  or  $S = LS - ES$ . A task with zero slack is on the critical path.

The calculations are as follows:

Task | Duration | ES | EF | LS | LF | S  
A | 10 | 0 | 10 | 0 | 10 | 0  
B | 15 | 10 | 25 | 10 | 25 | 0  
C | 10 | 10 | 20 | 10 | 20 | 0  
D | 20 | 25 | 45 | 25 | 45 | 0  
E | 10 | 25 | 35 | 25 | 35 | 0  
F | 15 | 20 | 35 | 30 | 30 | 0  
G | 5 | 45 | 50 | 45 | 50 | 0  
H | 10 | 35 | 45 | 40 | 50 | 5  
I | 20 | 35 | 55 | 30 | 50 | -5  
J | 5 | 50 | 55 | 50 | 55 | 0

Based on the table, we can see that the tasks with zero slack are A, B, D, G, and J. Therefore, the critical path is A-B-D-G-J, which has a total duration of 55 days. The other options are not the correct critical paths, as they either include tasks with positive slack (such as C, E, F, and H) or have a longer duration than 55 days (such as A-C-F-I-J).

### NEW QUESTION # 133

Which of the following tools is best to use for storing lessons learned?

- A. Whiteboard
- B. Content management system
- **C. Wiki knowledge base**
- D. Workflow platform

**Answer: C**

Explanation:

A wiki knowledge base is a collaborative online platform that allows users to create, edit, and share information about a specific topic or domain<sup>1</sup>. A wiki knowledge base is best to use for storing lessons learned because it enables easy access, retrieval, and update of the lessons learned by project teams and stakeholders<sup>2</sup>. A wiki knowledge base can also support keyword search, version control, and linking of related documents<sup>3</sup>. A wiki knowledge base is different from a whiteboard, which is a physical or digital board that can be used for brainstorming, sketching, or presenting ideas; a content management system, which is a software application that allows users to create, manage, and publish digital content; and a workflow platform, which is a software tool that automates and streamlines business processes<sup>4</sup>. #### NEW QUESTION # 134

A project manager is meeting with business stakeholders to define the time frame for a go-live to occur without impacting business operations. Which of the following is the project manager working on?

- A. Downtime window schedule
- B. Customer notifications
- C. Risk analysis
- D. Validation check

**Answer: A**

Explanation:

A downtime window schedule specifies a timeframe during which systems can be taken offline or changed without affecting business operations. CompTIA Project+ includes this as part of deployment planning to ensure minimal disruption to stakeholders.

#### NEW QUESTION # 135

A global franchise requests that a company provide a solution to unify its operation worldwide. Additionally, the company would like the solution to provide operation reports in real time without asking the country franchise manager for these reports. Which of the following cloud models would the company suggest to the global franchise?

- A. PaaS
- B. XaaS
- C. IaaS
- D. SaaS

**Answer: D**

Explanation:

SaaS, or software as a service, is a cloud model that provides on-demand access to ready-to-use, cloud-hosted application software. SaaS is the best solution for the global franchise, because it can unify its operation worldwide by using the same software platform across different locations and devices. Additionally, SaaS can provide operation reports in real time without asking the country franchise manager for these reports, because the cloud service provider manages the data collection, analysis, and presentation in the cloud. SaaS also offers the benefits of scalability, reliability, security, and cost-effectiveness for the global franchise.

SaaS is different from IaaS, or infrastructure as a service, which provides on-demand access to cloud-hosted computing infrastructure, such as servers, storage, and networking. IaaS is not suitable for the global franchise, because it requires the franchise to manage and maintain its own software applications and data on the cloud infrastructure. IaaS also does not provide operation reports in real time, unless the franchise develops its own reporting tools and processes. SaaS is also different from XaaS, or anything as a service, which is a generic term that encompasses various types of cloud services, such as IaaS, PaaS, SaaS, and others. XaaS is not a specific cloud model that the company can suggest to the global franchise, but rather a broad category of cloud offerings. SaaS is also different from PaaS, or platform as a service, which provides on-demand access to a complete, ready-to-use, cloud-hosted platform for developing, running, maintaining, and managing applications. PaaS is not ideal for the global franchise, because it requires the franchise to develop and deploy its own software applications on the cloud platform, which may be more complex and time-consuming than using a ready-made SaaS solution. #### NEW QUESTION # 136

Which of the following provides the best justification for undertaking a project?

- A. Scope statement
- B. Business case
- C. Sponsor request
- D. Project charter

**Answer: B**

Explanation:

A business case provides justification for undertaking a project, programme or portfolio. It evaluates the benefit, cost and risk of alternative options and provides a rationale for the preferred solution. A business case is essential for demonstrating the value of the project and securing the approval and funding from the governance. A business case is different from a scope statement, which defines the project boundaries and deliverables; a sponsor request, which initiates the project idea and seeks support; and a project charter, which authorizes the project and assigns the project manager.
