Salesforce-Data-Cloud Preparation Materials and Study Guide: Salesforce Data Cloud Accredited Professional Exam - Exams4sures

Advancement in Salesforce-Data-Cloud information and communications technology generates huge potential for moving business and production up the value-chain, and improving the quality of life of citizens. And there is no doubt that you can get all kinds of information in cyber space now, Salesforce-Data-Cloud Latest Torrent is not an exception. I strongly recommend the study materials compiled by our company for you, the advantages of our Salesforce-Data-Cloud exam questions are too many to enumerate; I will just list three of them for your reference.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q137-Q142):

NEW QUESTION # 137

A customer has multiple team members who create segment audiences that work in different time zones. One team member works at the home office in the Pacific time zone, that matches the org Time Zone setting.

Another team member works remotely in the Eastern time zone.

Which user will see their home time zone in the segment and activation schedule areas?

- A. The team member in the Eastern time zone.
- B. The team member in the Pacific time zone.
- C. Both team members; Data Cloud adjusts the segment and activation schedules to the time zone of the logged-in user
- D. Neither team member; Data Cloud shows all schedules in GMT.

Answer: C

Explanation:

The correct answer is D, both team members; Data Cloud adjusts the segment and activation schedules to the time zone of the logged-in user. Data Cloud uses the time zone settings of the logged-in user to display the segment and activation schedules. This

means that each user will see the schedules in their own home time zone, regardless of the org time zone setting or the location of other team members. This feature helps users to avoid confusion and errors when scheduling segments and activations across different time zones. The other options are incorrect because they do not reflect how Data Cloud handles time zones. The team member in the Pacific time zone will not see the same time zone as the org time zone setting, unless their personal time zone setting matches the org time zone setting. The team member in the Eastern time zone will not see the schedules in the org time zone setting, unless their personal time zone setting matches the org time zone setting. Data Cloud does not show all schedules in GMT, but rather in the user's local time zone. References:

NEW QUESTION # 138

Which two objects or fields are supported for ingestion using the Salesforce CRM connector?

- A. Standard Objects
- B. Standard Big Objects
- C. Custom Objects
- D. Custom Big Objects

Answer: A,C

Explanation:

Explanation

These two objects or fields are supported for ingestion using the Salesforce CRM connector. You can select standard or custom objects from your Salesforce CRM org and map them to Data Cloud data model objects.

NEW QUESTION # 139

To import campaign members into a campaign in CRM a user wants to export the segment to Amazon S3. The resulting file needs to include CRM Campaign ID in the name. How can this outcome be achieved?

- A. Include campaign identifier into the activation name
- B. **Include campaign identifier into the filename specification**
- C. Hard-code the campaign identifier as a new attribute in the campaign activation
- D. Include campaign identifier into the segment name

Answer: B

Explanation:

You can use the filename specification option in the Amazon S3 activation to customize the name of the file that is exported. You can use variables such as {campaignId} to include the CRM campaign ID in the file name.

NEW QUESTION # 140

How many Metrics can be present in 1 segment container?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

Only one metric can be present in one segment container. A segment container is a logical grouping of segments that share the same metric and granularity. A metric is a calculated insight that defines and calculates a multidimensional measure on your data. A granularity is the level of detail at which you want to analyze your data, such as daily, weekly, or monthly. You can create multiple

segment containers with different metrics and granularities, but each segment container can only have one metric.

NEW QUESTION # 141

Every day, Northern Trail Outfitters (NTO) uploads a summary of the last 24 hours of store transactions to a new file in an Amazon S3 bucket, and files older than 7 days are automatically deleted. Each file contains a timestamp in a standardized naming convention. What should a consultant consider when ingesting this data stream?

- A. Advise NTO to change their processes: this configuration is not supported
- B. Ensure the refresh mode is set to "Full Refresh" and the filename contains a wildcard to accommodate the timestamp
- **C. Ensure the refresh mode is set to "Upsert" and Refresh only new files" is selected**
- D. Ensure the refresh mode is set to "Full Refresh" and "Refresh only new files" is selected

Answer: C

Explanation:

This configuration will ensure that Data Cloud only ingests new files from the Amazon S3 bucket and updates or inserts new records

into the data stream without deleting existing records. References:https://help.salesforce.com/s/articleView?id=sfc360_a_data_cloud_amazon_s3.htm&type=5

NEW QUESTION # 142

.....

You can hardly grow by relying on your own closed doors. So you have to study more and get a certification to prove your strength. And our Salesforce-Data-Cloud preparation materials are very willing to accompany you through this difficult journey. You know, choosing a good product can save you a lot of time. For at least, you have to find the reliable exam questions such as our Salesforce-Data-Cloud Practice Guide. And our Salesforce-Data-Cloud preparation questions can help you not only learn the most related information on the subject, but also get the certification with 100% success guarantee.
