

Exam 6V0-22.25 Bootcamp | Latest 6V0-22.25 Exam Answers

Without bothering to stick to any formality, our VMware Avi Load Balancer 30.x Administrator 6V0-22.25 learning quiz can be obtained within five minutes. No need to line up or queue up to get our 6V0-22.25 practice materials. They are not only efficient on downloading aspect, but can expedite your process of review. No harangue is included within VMware 6V0-22.25 Training Materials and every page is written by our proficient experts with dedication.

VMware 6V0-22.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Performance-tuning, Optimization, Upgrades: Covers Service Engine and group capacity limits, the impact of elastic scale out, and the performance trade-offs of enabling real-time analytics and logging.
Topic 2	<ul style="list-style-type: none">Planning and Designing: Covers the planning and design considerations for deploying Avi Load Balancer in an environment.
Topic 3	<ul style="list-style-type: none">Administrative and Operational Tasks: Covers day-to-day administrative tasks, specifically the process of creating and managing virtual services.
Topic 4	<ul style="list-style-type: none">Architecture and Technologies: Covers the core components of the Avi architecture including the Controller, Service Engines, load balancing characteristics at L4L7, HA modes, algorithms, health monitors, application profiles, policy engine, WAF, and certificate management.
Topic 5	<ul style="list-style-type: none">Installing, Configuring, and Setup: Covers the installation, initial configuration, and setup procedures for the Avi Load Balancer.
Topic 6	<ul style="list-style-type: none">Troubleshooting and Repairing: Covers log interpretation, real-time analytics enablement, health score analysis, and diagnosing issues including the effect of WAF on logging behavior.

Latest 6V0-22.25 Exam Answers - 6V0-22.25 Answers Free

We know that your work is very busy, and there are many trivial things in life. There is not much time you can spend on research. But our 6V0-22.25 exam questions can promise to take the exam 20 to 30 hours after you use our products. The idea of 6V0-22.25 study materials is to let you learn the most valuable things in the shortest possible time. And it is proved and tested by tens of thousands of our loyal customers. And our 6V0-22.25 training engine can help you achieve success with 100% guarantee.

VMware Avi Load Balancer 30.x Administrator Sample Questions (Q131-Q136):

NEW QUESTION # 131

What is the primary trigger for a predictive elastic scale out event in Avi Vantage?

- A. A recurring, scheduled event based on a time-of-day calendar.
- **B. The Avi Controller's analytics engine forecasting a traffic increase based on historical data.**
- C. An alert being triggered by a ControlScript.
- D. An administrator manually clicking the "Scale Out" button on the Virtual Service.

Answer: B

NEW QUESTION # 132

An Operator is analyzing a Virtual Service that is showing a "Connection Reset by Peer" error in the logs. The analytics reveal a high number of l4_server.tcp_resets. The application owner insists that the application code does not terminate connections in this manner. The health monitor for the pool is a simple TCP check, which is passing. What is a likely cause of this issue that is external to the application itself?

- A. A misconfigured Application Profile on the Virtual Service.
- B. The client's browser is closing the connection prematurely.
- **C. A stateful firewall located between the Avi Service Engine and the backend servers.**
- D. The Virtual Service is scaled out across too many Service Engines.

Answer: C

NEW QUESTION # 133

A Network Architect is designing a solution for a custom TCP application. The design requires that all connections from a single client IP address are always sent to the same backend server for the duration of the session. The Virtual Service is configured with the System-L4 Application Profile. Which Avi feature should be used to meet this requirement?

- **A. A Persistence Profile of type Client IP Address**
- B. An LB Algorithm - Least Connections
- C. A Health Monitor of type "TCP"
- D. An HTTP Request Policy

Answer: A

NEW QUESTION # 134

An administrator wants to prevent certain known malicious client IP addresses from accessing any application. At which point in the traffic processing pipeline does an HTTP Request Policy rule get evaluated?

- A. Before the SSL/TLS handshake is completed.
- B. After the request has been sent to the backend server and a response is received.
- C. During the initial TCP handshake.
- **D. After the SSL/TLS handshake is complete and the HTTP request has been received and parsed.**

Answer: D

NEW QUESTION # 135

Which functionality is not configured in the HTTP profile?

- **A. Web Application Firewall**
- B. X-Forwarded-For header
- C. HTTP to HTTPS redirect

- D. Compression

Answer: A

Explanation:

The HTTP Application Profile contains HTTP-specific behavior for a Virtual Service. VMware Avi documentation describes the HTTP profile as providing HTTP proxy functionality, including features such as redirects. Other HTTP profile capabilities include compression behavior and HTTP header handling such as X-Forwarded-For insertion. Web Application Firewall, however, is not configured inside the HTTP profile.

WAF is configured using WAF profiles and WAF policies, and a WAF policy is then associated with the Virtual Service. This separation is important because an HTTP profile controls HTTP proxy behavior, while WAF controls application-layer security inspection. Therefore, among the listed options, the functionality that is not configured in the HTTP profile is Web Application Firewall.

NEW QUESTION # 136

.....

Our company attaches great importance on improving the 6V0-22.25 study prep. In addition, we clearly know that constant improvement is of great significance to the survival of a company. The fierce competition in the market among the same industry has long existed. As for our 6V0-22.25 exam braindump, our company masters the core technology, owns the independent intellectual property rights and strong market competitiveness. What is more, we have never satisfied our current accomplishments. The highest record is up to five seconds. There has no delay time of the grading process. Slow system response doesn't exist. In addition, the calculation system of the 6V0-22.25 Test Question is very powerful and stable. We promise that the results of your exercises are accurate.
