Experts at our MB-820 simulating exam have been supplementing and adjusting the content of our products. So our MB-820 Exam Questions are always the most accurate and authoritative. At the same time, our professional experts keep a close eye on the updating the MB-820 study materials. That is why our MB-820 training prep is the best seller on the market.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q63-Q68):

NEW QUESTION # 63

A company has the following custom permission set:

```

permissionset 50000 "Sales Person Permission Set"
(
    Assignable = false;
    Caption = 'Sales Person Permission Set';
    Microsoft
    tabledata Custom = RIMD;
    tabledata "Payment Terms" = RMD;
    tabledata "Currency" = RM;
    tabledata "Sales Header" = RIM;
    tabledata "Sales Line" = RIMD;
)
    
```

You need to make the permission set visible on the Permission Sets page.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

- Publish the app with permission set to an environment.
- Add the page "Permission Sets" = X value to the Permissions property.
- Add the ObsoleteState = No property.
- Add the IncludedPermissionSets = SUPER property.
- Rename the permission set object to "Sales Person".
- Remove the Assignable = false property.
- Add the tabledata "Expanded Permission" = RIMD value to the Permissions property.
- Change the Assignable property value to true.

Process for making permission sets visible

Answer:

Explanation:

Explanation:

To make the permission set visible on the Permission Sets page, perform the following actions in sequence:

- * Change the Assignable property value to true.
- * Add the ObsoleteState = No property.
- * Publish the app with the permission set to an environment.

Process for making permission sets visible:

In Business Central, the Assignable property determines whether a permission set is shown in the user interface for assigning to users. By default, if Assignable is set to false, the permission set is hidden.

Therefore, it should be set to true to make the permission set visible.

The ObsoleteState property indicates whether an object is outdated (Obsolete) or not (No). If an object is marked as obsolete, it is typically hidden from the user interface. Therefore, setting ObsoleteState = No ensures that the permission set is not treated as outdated and remains visible.

Finally, publishing the app with the permission set to an environment updates the environment with the new or modified objects, including permission sets, making them available for assignment to users.

NEW QUESTION # 64

A company uses Business Central.

The company has sales orders that have a different location in the header than in the customer's card. You plan to add a check on sales order posting.

The check must meet the following requirements.

- * Sales Order must have the same Location Code as the Location Code set up on the customer's card.
- * Must not be run in preview mode.
- * Must be run even if the user is only shipping items and not invoicing.

You create an event subscription for codeunit 80 "Sales-Post" You need to identify which event to subscribe to Which event should you identify?

- A.

```
OnBeforePostSalesLines(SalesHeader, TempSalesLineGlobal, TempVATAmountLine, EverythingInvoiced);
```

- B.

```
OnAfterPostSalesDoc(SalesHeader2, GenJnlPostLine, SalesShptHeader."No.", SalesInvtHeader."No.", SalesInvoiceHeader."No.", SalesCrMemoHeader."No.", SuppressCommit, InvPickPutaway, CustLedgEntry, WhseShip, WhseReceive, PreviewMode);
```

- C.

```
OnBeforePostInvoice(SalesHeader, CustLedgEntry, SuppressCommit, PreviewMode, GenJnlPostLine, IsHandled, GenJnlLineDocNo, GenJnlLineExtDocNo, GenJnlLineDocType, SrcCode);
```

- D.

```
OnBeforePostSalesDoc(SalesHeader2, SuppressCommit, PreviewMode, HideProgressIndicator, Extended);
```

Answer: D

Explanation:

This event occurs before posting a sales document.

PreviewMode is available in the parameters, which allows checking whether the process is being run in preview mode.

This event is typically used for sales order posting and can be used for both shipping and invoicing.

This event matches the requirements because:

You can check if PreviewMode is false.

It can run for both shipping and invoicing.

NEW QUESTION # 65

You need to create the code related to the Subcontract Documents table to meet the requirement for the quality department. How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Standard triggers in code

```
codeunit 50100 Vendor
codeunit 50100 Vendor
table 50100 "Vendor Control"
tableextension 50100 "Vendor Control" extends Vendor
tableextension 50100 "Vendor Control" extends "Subcontract Documents"
{
    trigger OnDelete()
    trigger OnDelete()
    trigger OnModify()
    procedure OnDeleteSubcontractDocument()
}
var
    SubcontractDocument: Record "Subcontract Documents";
    errLbl: Label 'You cannot remove a vendor that has subcontract documents.';
begin
    SubcontractDocument.SetRange("Subcontract No.", rec."No.");
    SubcontractDocument.SetRange("Posted", false);
    if not SubcontractDocument.IsEmpty then
        error(errLbl)
        confirm(errLbl)
        error(errLbl)
        message(errLbl)
    else begin
        SubcontractDocument.SetRange(Posted);
        if SubcontractDocument.FindSet() then
            SubcontractDocument.DeleteAll();
    end;
end;
```

Answer:

Explanation:

Standard triggers in code

```
codeunit 50100 Vendor
codeunit 50100 Vendor
table 50100 "Vendor Control"
tableextension 50100 "Vendor Control" extends Vendor
tableextension 50100 "Vendor Control" extends "Subcontract Documents"
{
    trigger OnDelete()
    trigger OnDelete()
    trigger OnModify()
    procedure OnDeleteSubcontractDocument()
var
    SubcontractDocument: Record "Subcontract Documents";
    errLbl: Label 'You cannot remove a vendor that has subcontract documents.';
begin
    SubcontractDocument.SetRange("Subcontract No.", rec."No.");
    SubcontractDocument.SetRange("Posted", false);
    if not SubcontractDocument.IsEmpty then
        confirm(errLbl)
        error(errLbl)
        message(errLbl)
    else begin
        SubcontractDocument.SetRange(Posted);
        if SubcontractDocument.FindSet() then
            SubcontractDocument.DeleteAll();
    end;
end;
end;
```

NEW QUESTION # 66

You are cleaning up sandbox environments for a company.

The company requires data to be cleared from the environments each time an extension is published.

You need to configure the launch.json file.

Which schemaUpdateMode property should you set?

- A. Recreate
- B. ForceSync
- C. Synchronize
- D. ForceUpgrade

Answer: A

NEW QUESTION # 67

A company plans to import and export data with Business Central

You must configure an XMLport that provides the following implementation;

* Specifies import 01 export on the Request page at run time

* Formats the data in a non-fixed length CSV format

You need to create the XMLport.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

XMLport Configuration

Answer:

Explanation:

Explanation:

Direction: Both

Format: VariableText

You are configuring an XMLport for Business Central with the following requirements:

- * Specifies import or export on the Request page at runtime.
- * Formats the data in a non-fixed length CSV format.

XMLport Configuration:

- * Specifies import or export on the Request page at runtime. The Direction property must be set to Both.
- * This allows the XMLport to both import and export data depending on user selection during runtime.
- * Formats the data in a non-fixed length CSV format. The Format property must be set to VariableText.
- * VariableText is used for delimited text formats like CSV, which do not have a fixed length for fields.

NEW QUESTION # 68

.....

The Microsoft Dynamics 365 Business Central Developer (MB-820) exam questions can help you gain the high-in-demand skills and credentials you need to pursue a rewarding career. To do this you just need to pass the Microsoft Dynamics 365 Business Central Developer (MB-820) certification exam which is not easy to crack. You have to put in some extra effort, and time and

prepare thoroughly to pass the Microsoft MB-820 Exam. For the quick, complete, and comprehensive Microsoft Dynamics 365 Business Central Developer (MB-820) exam dumps preparation you can get help from top-notch and easy-to-use MB-820 Questions.
