AZ-305 Latest Test Sample - Exam AZ-305 Pattern

All our three versions are paramount versions. PDF version of AZ-305 practice questions - it is legible to read and remember, and support customers' printing request, so you can have a print and practice in papers. Software version of AZ-305 guide materials - It support simulation test system, and times of setup has no restriction. Remember this version support Windows system users only. App online version of AZ-305 study quiz - Be suitable to all kinds of equipment or digital devices.

To pass the Microsoft AZ-305 Exam, candidates must have a strong understanding of various Azure services, how they can be used in different scenarios, and how to design solutions that meet specific business and technical requirements. Candidates must also be familiar with various Azure deployment models and understand how to use them to deploy solutions.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q10-Q15):

NEW QUESTION # 10

You plan to deploy the backup policy shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 11

You need to design an Azure policy that will implement the following functionality:

- * For new resources, assign tags and values that match the tags and values of the resource group to which the resources are deployed.
- * For existing resources, identify whether the tags and values match the tags and values of the resource group that contains the resources.
- * For any non-compliant resources, trigger auto-generated remediation tasks to create missing tags and values.

The solution must use the principle of least privilege.

What should you include in the design? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

<https://docs.microsoft.com/en-us/azure/governance/policy/concepts/effects#modify>

NEW QUESTION # 12

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy various Azure App Service instances that will use Azure SQL databases. The App Service instances will be deployed at the same time as the Azure SQL databases.

The company has a regulatory requirement to deploy the App Service instances only to specific Azure regions.

The resources for the App Service instances must reside in the same region.

You need to recommend a solution to meet the regulatory requirement.

Solution: You recommend using an Azure policy initiative to enforce the location.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Explanation

Azure Resource Policy Definitions can be used which can be applied to a specific Resource Group with the App Service instances.

NEW QUESTION # 13

Your on-premises network contains a file server named Server1 that stores 500 GB of data.

You need to use Azure Data Factory to copy the data from Server1 to Azure Storage.

You add a new data factory.

What should you do next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/machine-learning/team-data-science-process/move-sql-azure-adf>

NEW QUESTION # 14

You have an app that generates 50,000 events daily.

You plan to Stream the events to an Azure event hub and use Event Hubs Capture to implement cold path processing Of the events Output Of Event Hubs Capture will be consumed by a reporting system.

You need to identify which type of Azure storage must be provisioned to support Event Hubs Capture, and which inbound data format the reporting system must support.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 15
