Because our CASPO-001 Exam Questions contain the most updated knowledge and information. What is more, you can get the most authoritative CASPO-001 certification, which will make you stand out a crowd of normal people.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q58-Q63):

NEW QUESTION # 58

There are five teams working on a product. How many Product Owners would there be? (Choose the best answer)

- A. Let the team decide
- B. 0
- C. It depends
- D. 1

Answer: D

Explanation:

A single product has one Product Owner, regardless of the number of teams. The Scrum Guide states: "The Product Owner is one person, not a committee... Multiple Scrum Teams often work together on the same product. One Product Backlog is used to describe the upcoming work on the product."

- * A: Multiple Product Owners fragment accountability.
- * B: Correct-one Product Owner for one product.

NEW QUESTION # 59

Who is responsible for maximizing the value of the product? (Choose the best answer)

- A. Scrum Master
- B. Product Owner
- C. Senior Executives
- D. Developers

Answer: B

Explanation:

The Product Owner has explicit accountability for product value. The Scrum Guide states: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team."

- * A: The Scrum Master ensures Scrum effectiveness, not value.
- * B: Correct-value maximization is their role.

NEW QUESTION # 60

What is typical work for a Product Owner in a Sprint? (Choose the best two answers)

- A. Create financial reporting upon the spent hours reported by the Developers.
- B. Update the work plan for the Developers on a daily basis.
- C. Work with the Developers on Product Backlog refinement.
- D. Attend every Daily Scrum to answer functional questions on the discussed Sprint Backlog items.
- E. Collaborate with stakeholders, user communities, and product managers.

Answer: C,E

Explanation:

The Scrum Guide outlines the Product Owner's responsibilities as maximizing value through Product Backlog management, which includes:

- * C: "Developing and explicitly communicating the Product Goal" and refining the Product Backlog with Developers to ensure clarity

and readiness.

NEW QUESTION # 61

Incremental delivery means: (Choose the best answer)

- A. Deliver nonfunctional increments in the iteration retrospectives
- B. Improve and elaborate our Agile process with each increment delivered
- C. Release working software only after testing each increment
- D. Deploy functional increments over the course of the project

Answer: D

Explanation:

Incremental delivery in Scrum involves delivering usable product pieces iteratively. The Scrum Guide defines an Increment as: "a concrete stepping stone toward the Product Goal" that is "usable" and "meets the Definition of Done." Option D-deploying functional increments over the project-reflects this, emphasizing cumulative value delivery.

- * A: Nonfunctional increments contradict the "usable" requirement.
- * B: Testing is part of creating a "Done" Increment, not a post-delivery step.

NEW QUESTION # 62

True or False: Scrum is a methodology that tells in detail how to build software incrementally.

- A. True
- B. False

Answer: B

Explanation:

The Scrum Guide defines Scrum as "a lightweight framework that helps people, teams, and organizations generate value through adaptive solutions for complex problems." It provides roles, events, and artifacts but intentionally avoids prescribing detailed "how-to" processes for building software (e.g., coding practices, tools). This distinguishes it from a methodology, which offers specific steps. Scrum focuses on "what" (e.g., deliver an Increment) and leaves "how" to the team's discretion, making the statement false. Thus, B is correct.

NEW QUESTION # 63

.....

Don't let outdated study materials hold you back from passing the Certified Agile Scrum Product Owner (CASPO) (CASPO-001) certification exam.
